

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

PREFACE

ONLY those who, by teaching English grammar, come into close contact with the young pupil, can know the difficulty of securing a satisfactory text-book. The problem of making an elementary treatise that is scholarly as well as sufficiently simple is one not easy of solution.

The temptation to make a subject easy by mechanical devices or by short-cut methods is strong with the teacher; and the writer who supplies the text-book is strongly drawn to those expedients that will make the manual merely the most teachable. On the other hand, there is a temptation to the student of historical English to suppose the grammar school child not only eager for the intricacies of linguistic development, but able to comprehend them.

The truth, as it appears to the present authors, is that the child wishes indeed to attain his ends by the most direct methods possible, but that he also desires to understand that which he labors upon. If he is confronted with the ramifications of historical grammar, his young mind is led aside from the direct road to knowledge; if he is taught unscholarly subterfuges, he will find more difficulties than the text-books attempted to avoid.

The following pages are the result of a systematic effort to combine simplicity with correctness. The same systems of numbering and grouping that characterized our "English Grammar" are followed in this book. The same

simplicity and directness of statement also appear. In all cases the pupil, not the teacher, is addressed.

The illustrative sentences are taken from standard literature. While the various authors' names are not given, it is hoped that the high plane upon which the science of grammar is thus placed will have its educative effect upon the pupil.

The series of sentences at the close of each of the parts of speech may be used either for parsing or to supplement previous illustrative exercises. Exercises in syntax are included for the convenience of teachers who find such work desirable, but they can be readily omitted by those who disapprove of them.

The chapter on Analysis will form a useful review of facts presented in the logical development of parts of speech. As the treatment of the subject includes the addition of such notes as are needed for a full understanding of the nature of the sentence, it will afford a profitable study in itself.

Although the death of Dr. W. M. Baskervill, after the completion of the manuscript of this book, but before publication, deprived the surviving author of his advice in the final revision, the work was so far advanced and had received the benefit of Dr. Baskervill's keen and scholarly criticism to such an extent that it has not suffered by his decease.

J. W. SEWELL.

ANALYSIS OF SENTENCES

CLASSIFICATION ACCORDING TO FORM	185
SIMPLE SENTENCES	186
COMPLEX SENTENCES	195
COMPOUND SENTENCES	201

INTRODUCTION

A **sentence** is the complete expression of a thought in words.

Language is made up of sentences, and in forming sentences a writer or a speaker must choose words according to their use and their meaning.

In the study of grammar we are to separate sentences into their parts, so as to study the nature of the words, their forms, and their uses. For example, in the sentence, "Children learn," one may see that the two words are not of the same nature, for *children* is the name of persons, and *learn* tells what they do. Again, grammar will ask why the form *children* is used instead of *child* or *child's* or *children's*, and why *learn* is used instead of *learns* or *learned*; and so on.

English grammar treats of the forms of English words, their uses, and their relations to one another in the sentence.

One way of studying the nature of the thousands of English words is to divide them into **parts of speech**. The parts of speech are the different classes of words used in the expression of thought.

In the sentence, "Children learn," it is plain that the two words belong to different classes; that is, they are different parts of speech.

In studying the parts of speech the purposes will be to find out: first, how to classify words according to their

use and meaning; second, what forms words may take to express relations to other parts of the sentence; third, when it is proper to use one form and when another.

Another way of studying sentences is by **analysis**, which means separating a sentence into its elements so as to show their relations to one another.

These two methods of studying the sentence cannot be kept strictly separate, for some knowledge of each is needed in order fully to understand the other; hence a short treatment of both should be given before making a more thorough study of either.

PARTS OF SPEECH — OUTLINE

In order to understand the parts of speech it will be necessary to study the uses of words in sentences; thus:—

NOUNS

(a) He was tumbled headlong into the dust; and Gunpowder, the black steed, and the goblin passed by like a whirlwind.

The words *dust*, *Gunpowder*, *steed*, *goblin*, and *whirlwind* are names of things. In order to know again anything we have once known, we usually give it a name; and the name word is called a **noun**.

Exercise

Mention the nouns in these sentences:—

1. The house has two rooms.
2. The tiger followed the man.
3. Pupils put their books upon the desks.
4. The farmer sows seed in the ground.
5. The coach was crowded, both inside and out, with passengers,

who, by their talk, seemed principally bound to the mansions of relations or friends, to eat the Christmas dinner. It was loaded also with hampers of game, and baskets and boxes of delicacies; and hares hung dangling their long ears about the coachman's box, presents from distant friends for the impending feast.

PRONOUNS

(b) So intent were the servants upon their sports that we had to ring repeatedly before we could make ourselves heard.

Instead of saying, "So intent were the servants upon the servants' sports," the writer here makes the sentence shorter and smoother by putting the word *their* for *the servants'*. *Their* is called a **pronoun**, meaning for or instead of a name. Again, instead of the name of the writer and that of his friend, the words *we* and *ourselves* are used. They also are pronouns.

Exercise 1

In the following sentences each pronoun is in italics; tell what each one stands for: —

I was informed by Frank Bracebridge that the parson had been a chum of *his* father's at Oxford, and had received this living soon after *the latter* had come to *his* estate. . . . The parson had pored over some old volumes so intently that *they* seemed to have been reflected into *his* countenance, *which* might be compared to a title-page of black letter.

Exercise 2

Find the pronouns in these sentences, and tell what each one stands for: —

1. We were learning our lessons.
2. This girl has lost her purse.
3. All the trees have dropped their leaves.
4. You have not opened your book.

ADJECTIVES

(c) A fine day, however, with a tranquil sea and favoring breeze, soon put these dismal reflections to flight.

It will be noticed that the words *fine*, *tranquil*, *favoring*, and *dismal* describe, or tell what kind of object or thing is spoken of; *fine* tells what kind of day, *tranquil* what kind of sea, etc. Such words are called **adjectives**, and each one is joined to a noun to describe the thing named.

Exercise

Mention the adjectives in the following sentences, and tell what noun each limits: —

1. Great trees from little acorns grow.
2. The flag has red and white stripes.
3. What beautiful flowers you have!
4. Our yard has large trees and broad walks.
5. Of all the old festivals, that of Christmas awakens the strongest and most heartfelt associations. There is a tone of solemn and sacred feeling that blends with our conviviality, and lifts the spirit into a state of hallowed and elevated enjoyment.

VERBS

(d) As we passed over a rising ground which commanded something of a prospect, the sounds of rustic merriment now and then reached our ears.

This sentence makes some statements; but if the words *passed*, *commanded*, and *reached* were left out, no statement would be made. These words are called **verbs**, since they are used for making statements about persons or things: *passed* tells what we did; *reached* tells what the sounds did, etc.

Exercise

Mention the verbs in the following sentence, and tell what each makes a statement about:—

1. The storm rattled the windows.
2. Somebody wrote me a long letter.
3. Our teacher read us a story.
4. Albert threw the ball away.
5. As Ichabod approached the stream his heart began to thump.

He summoned up all his resolution, gave his horse half a score of kicks in the ribs, and attempted to dash briskly across the bridge; but, instead of starting forward, the perverse old animal made a lateral movement and ran against the fence.

ADVERBS

(e) The English have always been fond of those festivals and holidays which agreeably interrupt the stillness of country life.

The statement, "The English have been fond of those festivals," is modified, or changed in meaning, by the word *always*, which expresses time, or tells how long; *always* is called an **adverb**, that is, a word joined to a verb, to modify the meaning. Likewise the word *agreeably* modifies *interrupt*, and tells the way, or manner, of the action.

Exercise

Mention the adverbs in the exercises under (a), (b), (d), and (g), and tell what verb each modifies.

CONJUNCTIONS

(f) He passed the tree in safety, but new perils lay before him.

Here two statements are made, and they are united into one sentence by the word *but*. A word that connects words or groups of words is called a **conjunction**. It merely links, or joins, but does nothing more.

Exercise 1

The conjunctions are in italics below; tell what words or word groups each connects:—

1. *As* we approached the house, we heard the sound of music, *and* now *and* then a burst of laughter.
2. His only resource on such occasions, *either* to drown thoughts *or* drive away evil spirits, was to sing psalm tunes.
3. To have taken the field openly against his rival would have been madness; *for* he was not a man to be thwarted.
4. He now suspected *that* the grave roysters of the mountain had put a trick upon him.

Exercise 2

Point out the conjunctions in the following sentences, and tell what each connects:—

1. This street has houses new and old.
2. God rules on the land and on the sea.
3. Go now, or stay with me.
4. He spoke quietly, but firmly.

PREPOSITIONS

(g) The rays of a bright morning sun had a dazzling effect among the glittering leaves.

In this sentence it is necessary to express some connection and relation between *rays* and *sun*, also between *had a dazzling effect* and *leaves*. The expression *of a bright morning sun* clearly shows possession or source; the word *of* connects *rays* and *sun*, and shows the relation of possession or source. *Among* connects the verb *had* with the noun *leaves* and expresses the relation of place. A word that connects words and shows the relation between them is called a **preposition**.

Exercise

Point out the prepositions in this sentence and tell between what words they show relation : —

1. Your book lies among mine on the shelf under the desk.
2. From the tower into which we went we saw far along the water.
3. The roof of the house is old, especially near the edge.
4. A sloop was loitering in the distance, dropping slowly down with the tide, her sail hanging uselessly against the mast.

INTERJECTIONS

There is one other class of words to be noted, those that merely express feeling; as, *Alas! What! Psha! Ho!* They are called **interjections**, which means thrown into the midst. They are merely dropped into the sentence to attract attention, and have no part in building up the sentence. They are not properly parts of speech.

USE DETERMINES PARTS OF SPEECH

Some words may be several parts of speech, according to the use they have in different places. It is the **use**, not the **form** of an English word, that determines what part of speech it is. For example, "An excited crowd swept *by*" (adverb); "Crowds were running *by* the jail" (preposition); "They heard that he *still* lived" (adverb); "The waves are *still*" (adjective).

Exercise

Write sentences using words as directed below : —

- (1) *Handle* as a noun and a verb. (2) *Light* as noun, adjective, verb. (3) *Brown* as noun, adjective, verb. (4) *Before* as adverb, preposition, conjunction. (5) *Water* as noun, adjective, verb. (6) *Iron*

as noun, adjective, verb. (7) *In* as adverb and preposition. (8) *Past* as noun, adjective, adverb, preposition. (9) *While* as noun, verb, and conjunction.

ANALYSIS — OUTLINE

Analysis is a very important subject in grammar, lying at the basis of most of the work in mastering good English.

A person can much better understand what he reads if he is able to tell at a glance the relations of all the parts of a sentence. While studying the parts of speech it is necessary to describe the use of words by their relations to one another in the sentence. This depends on analysis, and is to be learned only by careful thinking. Then, too, in writing sentences, no one can tell where to use the marks of punctuation without knowing when the sentence is complete, and what parts of it are related, and how.

For analysis, take the following sentence : —

The golden sun poured a dusty beam through the closed blinds.

Every sentence must have at least two parts : that of which something is said, and that which is said of it. *The golden sun* is called the **subject**, because it is the part brought especially to our notice, — that of which something is said ; the rest of the sentence is called the **predicate**, because it declares or says something about the subject. As no sentence can be made without these two members, they are often called the **main** or **principal elements** of the sentence.

Now, noticing more closely, we find that the one word *sun* names that of which the statement is made, and *sun* is modified by *the* and *golden*. *The golden sun* is called the

complete subject; *sun* is the **simple subject**, and *the* and *golden* are **modifiers** of the simple subject.

We also find that *poured a dusty beam through the closed blinds* is the **complete predicate**; *poured* alone is the **simple predicate**. The expression *through the closed blinds* tells where, and is a **modifier** of the simple predicate.

Exercise

Mention the complete subject and predicate, then the simple subject and predicate, of the following sentences: —

1. A ragged boy came into the room.
2. My best friend came here with me.
3. All your toys are scattered over the floor.
4. Suddenly came a loud shout.
5. That garden has beautiful flowers.
6. The old gardener is working diligently.
7. Slowly and carefully the boy wrote.
8. This work was done neatly.
9. Her old books were sold yesterday.
10. Every child should walk lightly.

Further, in the sentence "The . . . blinds," on p. 14, the meaning of the verb is not complete without the words *a dusty beam*. The sun poured — what, through the closed blinds? Answer, a dusty beam. *Poured* expresses action, and *beam* names that which receives the action of the verb; such a word is called the **direct object** of the verb. *Beam* is modified by *a* and *dusty*. The subject or object may be modified by a group of words, introduced by a preposition.

Exercises

1. Write six sentences using the following words as subjects of verbs: *ink, paper, lion, bear, lily, rose*.

2. Rewrite the six sentences in (1) so as to have an adjective modifying each subject.
3. Mention the complete subject of each sentence that you wrote in (2).
4. Write six sentences using the following verbs as predicates : *walks, found, howl, played, look, saw*.
5. Change the sentences in (4) so as to have an adverb modifying each verb.
6. Mention the complete predicate of each sentence that you wrote in (5).
7. Write sentences using as direct objects the words in (1) above.

Example : The nurse threw the *rose* away.

To sum up, the main elements are :—

- (1) The complete subject.
 - (2) The complete predicate.
- After full analysis, we find in the sentence on p. 14 :—
- (1) The simple subject.
 - (2) The modifiers of the subject.
 - (3) The simple predicate.
 - (4) A modifier of the predicate.
 - (5) The simple direct object.
 - (6) The modifiers of the direct object.

In order to complete the list, however, some more sentences must be examined. The following may be taken :—

1. Her eyes became red from weeping.
2. The frost made the leaves yellow.
3. This fell sergeant, Death, is strict in his arrest.

In sentence (1) *became* is the simple predicate, but as it does not express action, it cannot have an object. The adjective *red* completes the meaning of the predicate and

expresses quality of the subject. Such a verb is called **intransitive**, and such completing words are called **complements**.

In sentence (2) the simple predicate *made* is a **transitive verb**, but it is not complete even with the object *leaves*. The expression, "The frost made the leaves," is not clear; if we say, "made the leaves yellow," or "made yellow the leaves," it is plain at once how necessary is the word *yellow*. *Leaves* is really the object, not of *made*, but of *made yellow*. The word *yellow* is a complement, completing the verb *made*, and is also an adjunct of the direct object.

Exercise

(a) In the following sentences tell which words are complements:—

1. The old man became very poor.
2. Disease made the old man poor.
3. Our new lessons seem hard.
4. Diligent study makes hard things easy.
5. This tree will soon grow tall.

(b) Write five sentences having complements, some after transitive and some after intransitive verbs.

In sentence (3), p. 16, the subject *sergeant* needs the word *Death* to explain it; the latter, indeed, is equivalent to the added statement, "And his name is Death." A word thus added to another to modify and explain it is called an **appositive word**, or a term in **apposition** with another.

Add now these three to the list of elements:—

- (7) The complement of an intransitive verb.
- (8) The complement of a transitive verb.
- (9) An appositional modifier.

Exercise

(a) In the following sentences, which nouns are in apposition?

1. My friend Henry came with me.
2. Washington, our first President, was a Virginian.
3. Tell Albert, the porter, to come at once.
4. The best wrestler is your cousin George.
5. My brother, the lawyer, has moved away.

(b) Write five similar sentences of your own.

Review Exercise — Parts of Speech

Tell what part of speech each italicized word is in the following sentences : —

1. *Pandora stood gazing at the box.*
2. *It was made of a beautiful kind of wood.*
3. The surface was so *highly* polished that *she* could see *her* face in it.
4. Around the *margin* were *figures of graceful men and women.*
5. These various *objects* were *exquisitely* represented.
6. The *most beautiful* face of all was *in* the center of the *lid.*
7. Pandora *had looked at* this face a great many times.
8. The features *wore* a very *lively and mischievous* expression.
9. *Manners* are an *art.* Some are *perfect*, some *commendable*, some *faulty*; *but* there are none that are *of* no moment.

Review Exercises — Analysis

(a) Give definition of: complete subject, complete predicate; simple subject, simple predicate; direct object; transitive verb, intransitive verb; complement; appositional term.

(b) Write sentences using the following words as subjects: *book, pencil, slate, door, window, playground, apple, button, dollar, stove.*

(c) Write sentences using the above words as objects of transitive verbs.

(d) Write sentences in which the above words are modified by adjectives.

(e) Change the sentences of (c) so that the verbs shall be modified by adverbs.

(f) Write five sentences having nouns in apposition with other nouns. Write five sentences having nouns as complements of intransitive verbs. Write five sentences having adjectives as complements of intransitive verbs.

(g) Show by analysis the difference between, —

1. All good souls praise the Lord.
2. All good souls, praise the Lord.

(h) Analyze in full these sentences : —

1. I particularly noticed one young woman of humble dress but interesting demeanor.

2. My holiday afternoons were spent in rambles about the surrounding country.

3. Manners make beauty superfluous and ugly.

4. Never did Christmas board display a more goodly and gracious assemblage of countenances.

5. The interior of the church was venerable but simple.

6. A river formed the boundary — the river Meuse.

7. I made myself familiar with all its places famous in history or fable.

8. I admired for the hundredth time that picture of convenience, neatness, and broad, honest enjoyment, the kitchen of an English inn.

9. The temperate are the most truly luxurious.

10. The joyous disposition of the worthy Squire was perfectly contagious.

PARTS OF SPEECH

NOUNS

CLASSES OF NOUNS

1. Let us examine this sentence : —

In the Acadian land, on the shores of the Basin of Minas,
Distant, secluded, still, the little village of Grand Pré
Lay in the fruitful valley.

We find that two words are names of particular places : *Basin of Minas* and *Grand Pré*. The names are used only when the purpose is to speak of these places and no others. They are called proper nouns, from a Latin word meaning *one's own, belonging to one person or thing*.

A **proper noun** is a name of a particular person or place.

But there are other names in the sentence ; namely, *land, shores, village, valley*. These are general names : we may speak of the land of America, or the land of any state, county, or other division ; we may refer to the shores of the Gulf of Mexico, or the Atlantic Ocean, or of any lake, sea, etc. ; so with *village, valley*, and similar words. They are called common nouns, because common means *belonging to any* of a class.

A **common noun** is a name applied to any one of a class of persons, animals, or things.

2. Study now these additional sentences : —

1. The savage army was in war paint, plumed for battle.
2. No man is so sunk in vice and ignorance but there are still some hidden seeds of goodness and knowledge in him.

In (1), the word *army* is a general name, a common noun; but it differs from the class nouns of Section 1 in being the name of a number of persons taken together. Hence it is called a **collective noun**. Nouns of this kind are in very frequent use; as, *fleet, herd, flock, crowd, party*.

The word *war paint* is a common noun, being a name of general application; but instead of being the name of a separate object it is the name of a substance, of the material of which something is composed. Such are called **nouns of material**; other examples are *glass, iron, clay, silk*, etc.

3. In sentence (2), the words *vice, ignorance, goodness*, and *knowledge* are not names of objects, but of qualities. All are derived from other parts of speech. To explain: a person leads a *vicious* life (adjective) or a life of *vice* (noun); he *knows* (verb) or has *knowledge* (noun), etc. In each case where the noun is used, action or quality or condition is not asserted of the person, but is only named, or spoken of in the abstract; that is, apart from the object to which it belongs. All names of quality, condition, or action are **abstract nouns**.

4. To sum up the classes of nouns, we have:—

Proper nouns.

Common nouns, divided into $\left\{ \begin{array}{l} (a) \text{ Class names.} \\ (b) \text{ Collective.} \\ (c) \text{ Material.} \end{array} \right.$

Abstract nouns.

Exercises

1. Use the following common nouns in sentences: *table, orange, ceiling, clock, coal, iron, railroad, steamer*.

2. Make a list of ten other common nouns, and use them in sentences.

3. Find in a text-book of geography five proper nouns, also five in a text-book of history, and use these words in sentences.

4. Use in sentences the collective nouns that you find on p. 22.

5. Use the following abstract nouns in sentences: *weight, brilliancy, truth, fear, neatness, width, care, neglect.*

6. Of which class is each of the following italicized nouns? —

He was a kind and thankful *creature*, whose *heart* dilated in *proportion* as his *skin* was filled with good *cheer*, and whose *spirits* rose with *eating* as some *men's* do with *drink*. He could not help, too, rolling his large *eyes* round him as he ate, and chuckling with the *possibility* that he might one *day* be *lord* of all this *scene* of almost unimaginable *splendor*. Then, he thought, how soon he'd turn his *back* upon the old *schoolhouse*; snap his *fingers* in the *face* of *Hans Van Ripper*, and every other niggardly *patron*; and kick any itinerant *pedagogue* out of *doors* that should dare to call him *comrade*!

7. Mention the nouns in the following sentences, and tell which class each belongs to: —

As Rip and his companion approached them, they suddenly desisted from their play, and stared at him with such fixed, statue-like gaze, and such strange, uncouth, lack-luster countenances, that his heart turned within him, and his knees smote together. His companion now emptied the contents of the keg into large flagons, and made signs to him to wait upon the company. He obeyed with fear and trembling.

8. Write one or more class names corresponding to each collective noun in the following list: —

Swarm, drove, school, flock, regiment, crew, committee.

Example: A swarm of *bees* or *gnats* or *flies*, etc.

9. Write one or more collective nouns corresponding to each class noun in the following list: —

Ruffian, room, horse, listener, girl, neighbor, camel, citizen.

Example: A *horde* or *band* or *mob* of *ruffians*.

[NOTE TO TEACHER. — Pupils may be instructed to make up sentences of their own, or to select them from books. The latter plan is far better, as it keeps the pupil's attention upon good literature.]

5. **Inflection** means a change of form that a word undergoes to express a change in its use or meaning.

Five parts of speech are inflected: nouns, pronouns, adjectives, verbs, and adverbs.

Nouns have three kinds of inflection: **gender**, **number**, and **case**.

GENDER

6. One way to classify individual persons and to distinguish them from inanimate things is to speak of their sex; hence, all are divided into male and female.

In English grammar the words used as names of persons or animals are classified in a way to correspond to the sex of the living beings themselves: thus, the name of a male being is said to be of the **masculine gender**; the name of a female, of the **feminine gender**. The term sex belongs to the person or animal; the term gender belongs to the word naming the person or animal.

Names of inanimate things are called **neuter**, the word meaning neither masculine nor feminine.

Gender is the form or use of a word to designate an object as male, female, or without sex.

Examples: *Man, horse, ox*, masculine; *woman, mare, cow*, feminine; *book, stove, chalk*, neuter.

7. There is one class of words to which some attention should be given: persons may be referred to by nouns that do not determine the sex; as, *cousin, teacher, acquaintance, friend, parent*. If these are used in the sentence in such a way that the sex is made clear, they are at once classified as masculine or feminine. If the sentence does not show the sex of the person in question, the pupil

should merely say the nouns name living beings that may be of either sex.

Exercises

1. Use in sentences five masculine nouns.
2. Use in sentences five feminine nouns.
3. Use in sentences five neuter nouns.
4. Use in sentences the words *cousin, teacher, acquaintance, friend, parent*, so as not to show the sex of the person.
Example: My *cousin* will arrive to-day at noon.
5. Use the words in Exercise 4 so as to show the sex of the person.
Example: My cousin will bring *his* gun.

8. Gender forms belong only to masculine and feminine nouns. We have three ways by which the feminine noun is distinguished from the masculine:—

- (1) By placing a gender word before one without gender.
- (2) By adding a suffix to a masculine word.
- (3) By using a different word for each gender.

9. A **prefix** is a syllable added at the beginning of a word; as, *un-truth, mis-spell*. A **suffix** is a syllable added at the end of a word; as, *truth-ful, kind-ness*. An **affix** is either a prefix or a suffix.

I. Gender shown by Compounds

10. The pronouns *he* and *she* are often affixed to a noun that does not indicate sex: as, *he-goat, she-goat; he-wolf, she-wolf*.

Nouns indicating gender are often employed in the same way: as, *manservant, maidservant; salesman, saleswoman*.

The word *woman* belongs to this list. The old word *wif* meant *woman*, but was joined with the word *mann* to form *wif-mann*, this gradually changing to the form *woman*.

Frequently, instead of adding the suffix spoken of in Section 11, a feminine word is used before a noun that is clearly masculine in form. Examples are: *doctor, lawyer; woman doctor, woman lawyer.*

II. Gender shown by Suffixes

11. The suffix now most used to form a feminine from a masculine noun is *-ess*; as, *giant, giantess.*

Some points in spelling should be noticed here:—

(1) Some words do not change their form before adding the suffix; as, *host, hostess; baron, baroness.*

(2) Words of one syllable ending in a single consonant preceded by a single vowel double the final consonant before adding the suffix; as, *god, goddess.*

(3) A letter or a syllable may be dropped and *-ess* added to the root of the word; as, *abbot, abbess; sorcerer, sorceress.*

(4) A vowel preceding the final consonant may be dropped before adding *-ess*; as, *actor, actress; enchanter, enchantress.*

12. As stated in Section 10, it is customary now to use a gender word before the masculine instead of writing *editress, doctress, waitress*, etc.; that is, if we wish to make an *emphatic contrast* to the masculine form. Ordinarily, however, the masculine form is used to represent the feminine, the context showing the sex of the person.

Not only the words *author, poet, nurse, teacher*, etc., but also *lawyer, preacher, librarian, doctor, dentist, artist, sculptor, architect, editor, bookkeeper, cashier, superintendent*, and others frequently refer to women, who have

entered these professions; while in using such words as *dressmaker, housekeeper, typewriter*, we hardly think of a man.

Exercise. — Tell the gender of each noun in the sentences on pages 42 and 43.

13. A few words from foreign languages, with their original suffixes, are in good use as English words. Those most often met with are the following pairs : —

administrator, administratrix	hero, heroine
beau, belle	señor, señora
czar, czarina	signor, signora
don, donna	sultan, sultana
executor, executrix	testator, testatrix

Exercise. — Write sentences using all the foreign words given in this list.

III. Gender shown by Different Words

14. This distinction between masculine and feminine is not made by inflection, but by the use of pairs of words entirely unlike in form. The most important are : —

bachelor, maid or spinster	uncle, aunt
boy, girl	wizard, witch
brother, sister	boar, sow
earl, countess	buck, doe
father, mother	bull, cow
husband, wife	bullock, heifer
king, queen	drake, duck
lord, lady	gander, goose
monk, nun	hart, roe
nephew, niece	horse, mare
son, daughter	ram, ewe
tutor, governess	sire, dam

Exercises

1. The teacher should dictate a list of words, some masculine and some feminine, selected at random, and have the pupils write the corresponding word for each of these.
2. Write five sentences containing masculine nouns, and five using the same words as feminine nouns. (See Section 12.)

NUMBER

15. Number is the form or use of a word to show whether one person or thing is meant, or more than one.

Words meaning one thing, as *table*, *porch*, *lily*, are said to be of the **singular number**; those meaning more than one, as *tables*, *porches*, *lilies*, are of the **plural number**.

16. The most common way of forming the plural of nouns is by adding *-s* or *-es*. Any new words adopted into the language take this inflection.

Two other ways of forming the plural are found, but these do not apply to a large number of words: by adding *-en*, and by a change in the vowel of the word itself. Three words still have the ending *-en*: *oxen*, *children*, *brethren*. There are only a few with vowel change: *foot*, *feet*; *man*, *men*; *goose*, *geese*; *louse*, *lice*; *mouse*, *mice*; *tooth*, *teeth*.

17. It will be helpful now to give some suggestions in regard to when one should add *-s* and when *-es*.

(1) Words ending in *s*, *x*, *z*, *ch*, and *sh* (letters that will not unite with the sound of *s*) add *-es*; as, *glasses*, *boxes*, *topazes*, *churches*, *fishes*.

(2) A few words ending in *f* change this to *v* and add *-es* to form the plural; some of them are *beef*, *calf*, *leaf*, *loaf*, *self*, *wife*, *wolf*. Notice, however, that *brief*, *chief*, *dwarf*, *fife*, *hoof*, *proof*, *reef*, *roof*, *strife*, and *turf* add *-s*.

Wharf usually has *-ves* in the plural; *scarf* usually adds *-s*; *staff* has the plural *staves* unless a body of men is meant, when the form *staffs* is used; as, *staffs* of commanders or of newspapers.

(3) Words ending in *-y* preceded by a consonant sound, change the *y* to *i* and add *-es*; as, *ladies*, *soliloquies*. In such words as *soliloquy* and *colloquy* the *u* has the sound of the consonant *w*.

NOTE. — If the final *y* is preceded by a vowel, the regular ending *s* is used; as *turkeys*, *boys*, *Fridays*.

(4) Words of foreign derivation ending in *-o* may add *-s* or *-es*. The words *alto*, *cameo*, *canto*, *folio*, *oratorio*, *piano*, *solo*, and *zero* add *-s*; but *cargo*, *echo*, *embargo*, *hero*, *motto*, *negro*, *potato*, and *volcano* add *-es*.

The endings must be learned by close observation.

Special Remarks on Number Forms

18. Material and abstract nouns have no plural; but when such nouns take the plural inflection they assume a different meaning and become common class nouns; as, *glass*, *glasses*; *iron*, *irons*; *sorrow*, *sorrows*.

19. Certain nouns have only a plural form. Of the following list very few ever have a singular form: —

aborigines	bellows	matins	scissors
amends	billiards	nuptials	thanks
annals	dregs	oats	spectacles
antipodes	gallows	obsequies	vespers
assets	tongs	premises	victuals

The singular form *asset* is sometimes seen; as, "He used every available *asset*." The singular form *premise* is

a term used in logic ; the word *premises* usually means the surroundings or grounds about a building. The word *spectacle*, meaning scene, is not the singular of the word *spectacles*, meaning eye-glasses.

Exercise. — Write sentences using each word in the list on p. 29 as a subject.

20. Some words have the **same form for singular and plural** ; as, *deer, sheep, swine ; trout, salmon, shad ; cannon, heathen, yoke* (of oxen), *head* (of cattle), *sail* (a vessel), *Chinese*.

Such nouns as *pair, score, dozen, hundred*, have usually the same form for the plural if they follow numerals ; but if not limited by numerals or if used after certain prepositions, they take *-s* for the plural ; as, “ five *thousand* of the citizens ” or “ people by the *thousands*.”

21. Many words having a **plural form** are used as **singular** ; such as *optics, physics, mathematics*, and names of other sciences ; *pains* (care), *news, molasses, summons*. The words *means* and *politics* may be treated as singular or plural in meaning : we may say, “ a *means* of success,” or “ success by *these means* ” ; “ *politics* is his favorite study,” or “ *politics* are very annoying to him.”

22. A few singular words have **two plurals with different meanings** ; as : —

brothers (of a family), brethren (of a society or church)
cloths (kinds or pieces), clothes (garments)
dies (stamps for coins, etc.), dice (for gaming)
fishes (individuals or kinds), fish (collectively)
geniuses (persons of genius), genii (fabled spirits)
indexes (to books), indices (signs in algebra).

peas (separately), pease (collectively)
 pennies (separate coins), pence (collective value)
 shots (times fired), shot (collective balls)

The word *pence* may add *-s* in speaking of coins, thus making a double plural; as, "a few *sixpences*."

Exercise. — Make sentences using all these words.

23. The plural form of **compound words** depends upon the relation of their parts.

Some are closely united, so that we think of the parts as forming one unit: the last part adds *-s*; as: —

attorney-general	steamboat	handful
housewife	forget-me-not	maidservant
typewriter	kingfisher	spoonful
fellow-servant	goosequill	stepson

In most compound words which have the parts loosely joined by hyphens or even standing apart, and in which one member is described by another word or phrase, the chief member adds *-s*; as in the words: —

aid-de-camp	commander-in-chief	knight-errant
billet-doux	court-martial	father-in-law
attorney-at-law	cousin-german	hanger-on

We may also write *attorneys-general* and *knight-errants*.

A few compound words make both parts plural; as, *menservants*, *women lawyers*, *knights templars*.

Not all words ending in *-man* are compounds of the English word man; consequently some do not change the ending to *men*, but add *-s*. Examples are: *Brahman*, *firman*, *German*, *Mussulman*, *Norman*, *Ottoman*, etc.

Exercise. — Write sentences using the singular and plural of each noun in this Section.

Consult Webster's International Dictionary for all compound words.

24. In forming the plural of **proper names with titles**, as *Mr. Brown*, *Miss Hill*, *Mrs. Adams*, *Dr. Williamson*, there are two methods authorized by good usage. We may pluralize the name, and say, "the two *Mr. Browns*, or *Miss Hills*, or *Mrs. Adamses*, or *Dr. Williamsons*"; or we may pluralize the title, and say, "the two *Messrs. Brown*, or *Misses Hill*, or *Mesdames Adams*, or *Drs. Williamson*."

25. In making the plural of **letters, figures, signs, and words used merely as words**, there is likewise a choice of two methods. Some writers add the apostrophe and *s* ('s), some add only *s*; for example, "tall *h's*," "crooked *7's*," "*+ 's* like *×'s*," "too many *and's*"; or, "tall *hs*," "crooked *7s*," "*+ s* like *×s*," "too many *ands*."

In either case, always have regard for clearness; in the sentence, "He does not write *as* clearly," *as* may mean the letter *a* or the word *as*.

26. Foreign words are of two classes, and the pluralizing depends upon the nature of each word:—

(1) Those retaining a foreign plural only; such as *axis*, *criterion*, *erratum*, *analysis*, *antithesis*, *genus*; plurals *axes*, *criteria*, *errata*, *analyses*, *antitheses*, *genera*.

(2) Those having an English form of plural as well as their original form. Examples (in the plural) are:—

bandits or banditti
beaus or beaux
cherubs or cherubim
dogmas or dogmata
focues or foci

formulas or formulæ
memorandums or memoranda
seraphs or seraphim
stratums or strata
vertexes or vertices

Exercise

(a) Write sentences containing the plural of the following words : —

life	valley	half	strife	soliloquy	monkey	dwarf
reef	sheaf	ally	roof	wharf	story	attorney

(b) Write sentences containing the plural of the following words : —

brother	knight-templar	Brahman	antithesis
cameo	domino	genius	negro
goosequill	oratorio	cloth	spoonful
volcano	talisman	formula	Mussulman
father-in-law	piano	bandit	potato
Mrs. Young	attorney-at-law	Mr. Allen	hero

NOTE. — Make good use of the dictionary here.

CASE

27. Examine the following sentences : —

- 1. My father was amongst the mighty crowd.
- 2. He drew his cloak around him.
- 3. Night's silvery veil hung low.

In (1), the word *father* is the subject of the verb; in (2), the word *cloak* is the object of *drew*; in (3), the word *Night's* expresses ownership or possession; in (1), again, *crowd* is the object of the preposition *amongst*.

These four nouns have certain relations to other words in the sentence, and the manner of showing this relation is called case. Thus, *father* is in the case of subject, *cloak* in the case of object, etc.

28. **Case** is the form or use of a noun or pronoun to express its relation to other words in the sentence.

The **nominative case** usually expresses the relation of subject; the **objective case** expresses the relation of the

object; and the **possessive case** expresses the relation of possession, source, ownership, etc.

I. Uses of the Nominative Case

29. The most common use that the nominative case has is as subject. Other uses, however, are shown below:—

(1) **Subject**; as, “‘Fly pride,’ says the *peacock*.”

(2) **Predicate nominative**, or complement of an intransitive verb; as, “This is my own, my native *land*.”

(3) **In apposition** with another nominative word; as, “Rich gift of God, A *year* of time!”

(4) **Independent or absolute uses**, in which the noun is considered to be in the nominative case, but has no real office in the sentence. There are three of these uses:—

(a) Direct address; as, “O *Death*, where is thy sting?”

(b) Exclamation; as, “The *Old Manse*! — we had almost forgotten it.” Direct address is often put in the form of an exclamation; but direct address concerns a person or thing spoken *to*, while this exclamation concerns a person or thing spoken *of*.

(c) With a participle (a verbal form in *-ing* or *-ed* that does not assert), in a phrase independent of the rest of the sentence; as, “But the *rain* coming on, or the east *wind* blowing, or some other *reason* arising, his honor turns his horses’ heads down St. James’s Street.”

Exercise 1

Mention the nouns in the nominative case in these sentences, and tell what use each has:—

1. The forecastle was a roomy place.
2. Captain, will you give me the key?

3. There came a clash of steel upon the deck.
4. Night coming on, we made fast to a tree.
5. Adams, the skipper, had gone overboard.
6. Sitting in front of the fire was a tallish gentleman in a great coat, the only other occupant of the room.
7. It was a rather cool evening for the season of the year, and the gentleman drew his chair aside.
8. "My good fellow," said Mr. Winkle, his teeth chattering all the time he spoke, "I respect your attachment to my excellent friend."

Exercise 2

Illustrate nominative uses 1, 2, 3, and 4 (a) by five sentences for each use.

II. Uses of the Objective Case

30. The objective case has the following uses: —

- (1) **Direct object** of a verb; as, "Behold the *man*."
- (2) **Object of a preposition**; as, "I stood on the *bridge* at *midnight*."
- (3) **Indirect object**, naming the person or thing to or for whom something is done: it always precedes a direct object; as, "Hast thou given the *horse* strength?"
- (4) **Predicate objective**, or complement of a transitive verb; as, "The Spaniards made themselves *masters* of the Empire."
- (5) **Adverbial objective**, a noun used without a preposition to express time, distance, measure, value, etc.; as, "The next *night* it came again;" "but a few *steps* farther on;" "a *mile* wide;" "worth a *dollar*;" "*years* after," etc.
- (6) **In apposition** with another objective word; as, "Hardly a moment between the two lights, the *day* and the *lamplight*."

Exercise

(a) In the following sentences, mention the nouns in the objective case, and tell what use each has : —

1. Before I reached the ground the rain poured.
2. My uncle gave a broken cry and fell to the floor.
3. We gave the boy the remains of breakfast.
4. The man was drowned two weeks later.
5. Some people make money their idol.
6. Call Bates, the young fellow by the ladder.
7. They made themselves servants of the king of Spain.
8. But the next day, when the priest returned with fresh offerings to the tomb, he found that to the relics of heathen superstition some unknown hands had added a palm-branch.
9. But the law gives a man no power over the life of a slave.
10. Yet this was the last night for the gay Pompeii! the fabled city of Hercules! the delight of the voluptuous Roman!

(b) Write twenty sentences illustrating all of the uses of the objective case.

III. Use of the Possessive Case

31. The term possessive is given because ownership or some other close relation is usually implied : “The *gentleman’s* mode of speaking” means the mode characteristic of the gentleman ; “Our *fathers’* God” means the God whom our fathers worshiped ; “A sale of *ladies’* shoes” means a sale of shoes suitable for ladies to wear.

32. A possessive noun is generally equivalent to the preposition *of* and its object ; for example, in Section 31, “the *gentleman’s*” is equivalent to *of the gentleman* ; “our *fathers’*,” to *of our fathers* ; but “*ladies’* shoes,” as shown above, has a slightly different equivalent phrase.

On this account the prepositional phrase is often used instead of the possessive case, and especially if the possessive form is less smooth in sound.

33. Often we meet with a peculiar form called a **double possessive**, in which the preposition *of* is followed by the possessive case; for example, "He was brought to my house as a countryman *of my father's*."

This is called an **idiom**; that is, a correct expression not falling under the usual rules of grammar.

Sometimes the ordinary possessive or phrase does not make the meaning as clear as the double possessive. For instance, "The newspaper speaks of *my sister's portrait*" may mean a likeness of my sister executed by some one else, or a portrait painted by my sister to represent some other person. But "*this portrait of my sister's*" clearly means the portrait that my sister possesses. The double possessive is often used for convenience even when it is not necessary for clearness.

34. The noun modified by the possessive is sometimes omitted, such a word as *house*, *store*, etc., being understood; as, "A visit to my *uncle's*;" "the silks at *Macy's*."

The omission is noticed especially in case of well-known public places; as, "A dinner at *Delmonico's*" (restaurant); "the greatness of *St. Paul's* or *St. Peter's*" (church); "the season at *McVicker's*" (theater); "his career at *St. James's*" (court).

35. The apostrophe (') is called the possessive sign, and the pupil will need to exercise care in the use of it. The following directions will be found helpful:—

Singular nouns add *-s* to form the possessive case; as, *boy's*, *neighbor's*, *committee's*, *America's*.

Plural nouns not ending in *-s* also add *-s* to form the possessive; thus, *children's*, *deer's*, *men-of-war's*.

Plural nouns ending in *-s* add the apostrophe only; as, *attorneys'*, *friends'*, *committees'*, *neighbors'*.

36. Some few expressions have only the apostrophe in the singular; especially the phrases, "for appearance' sake," "for convenience' sake," "for conscience' sake," "for Jesus' sake." But the usual custom is to add *-s* even if the singular noun ends in an *s* sound; for example, "*St. James's* Square;" "the *princess's* bicycle;" "for her *mistress's* comfort;" "*Erasmus's* dialogue;" "*Pythagoras's* first rule."

37. Compound words form the possessive case singular and plural by the same rules as simple words; thus, "the *aid-de-camp's* orders;" "my *fellow-pupil's* troubles;" "the *women-servants'* wages;" "the *men-of-war's* gallant crews."

38. The **declension** of a noun is the orderly arrangement of the forms for number and case.

The following nouns are declined in full:—

	SINGULAR	PLURAL
<i>Nom. and Obj.</i>	fairy	fairies
<i>Possessive</i>	fairy's	fairies'
<i>Nom. and Obj.</i>	wife	wives
<i>Possessive</i>	wife's	wives'
<i>Nom. and Obj.</i>	negro	negroes
<i>Possessive</i>	negro's	negroes'
<i>Nom. and Obj.</i>	father-in-law	fathers-in-law
<i>Possessive</i>	father-in-law's	fathers-in-law's

Exercises

(a) Write sentences using the possessive singular and plural of the following words:—

Ox, Mussulman, postmaster-general, mulatto, thief, enemy, attorney,

sheep, Mrs. Jackson, brother-in-law, dwarf, Miss Hall, hero, bandit, Englishman, fellow-pupil, gentleman.

(b) Use the possessive equivalent of each of the following phrases : —

1. Shoes for men and boys.
2. Hats for ladies and misses.
3. The pianos of Knabe and Steinway.
4. The machines of Wilcox and Gibbs.
5. The marbles of Albert and Henry (together).
6. The marbles of Albert and Henry (separately).
7. Dresses for girls and women.
8. The boat belonging to Wilson and Baker.
9. The tennis court of the Reds and the Blues.
10. Books of the Putnams and the Scribners.

PERSON

39. Person is the form or use of a noun or pronoun to indicate the person speaking, the person or thing spoken to, or the person or thing spoken of.

The word representing the speaker is said to be of the **first person**; one representing the person or thing spoken to is of the **second person**; and one representing the person or thing spoken of is of the **third person**.

In the study of pronouns person is more important, because the personal pronouns have separate forms for the three persons; in nouns person depends upon the use of the words.

40. Nouns are most often of the third person, since they name the person or thing spoken of.

A noun is said to be of the first person when it stands in apposition with a pronoun which represents the speaker; as, "I, a household *pet*, naturally fell into her hands;" "We, the *children*, were all touched with pensiveness."

A common use is in proclamations ; as, "I, *Thomas Jefferson*, President of the United States of America, do hereby," etc.

Nouns denoting the person or thing addressed are of the second person ; as, "*Ye crags and peaks*."

PARSING OF NOUNS

41. Parsing is the statement of all the facts about the form of a word and its relation to other words in the sentence.

We have studied the classes of nouns, and learned to recognize the gender, number, person, and case ; now in parsing we shall take each word presented and give the facts about it separately.

In the work of parsing, the natural, sensible order is to tell what a word denotes or what it *does*, and then to tell what it *is*.

Parsing deals with the regular facts and laws of the language ; and the pupil should take notice at the start that in parsing we must make allowance for idioms, which may defy all rules and make their own laws.

42. To parse a noun, one should state : —

- (1) Its class (and sub-class, if a common noun).
- (2) Its gender.
- (3) Its number.
- (4) Its person.
- (5) Its case.

The parsing of one noun will suggest the method to be followed : —

Is yon mute thing carved by man's art a goddess ?

Thing is a name, therefore a noun ; the name of any object of its class, therefore a common class noun ; it names an object without life, hence is neuter gender ; names one object, therefore singular number ; names an object spoken of, and is third person ; subject of *is*, hence nominative case.

Follow this order with *man's*, *art*, and *goddess*.

SYNTAX OF NOUNS

43. Syntax is that department of English grammar which deals with the relations of words, and with their right use in sentences.

Nouns have no distinct forms for the nominative and objective cases ; hence no mistake can be made in using them in these cases. But some remarks are required concerning the use of the possessive case.

44. Two words in apposition are usually treated as one compound noun, the possessive sign being added to the last one only ; as, "The recital of *Hodge the farmer's* woes ;" "the length of *Victoria queen of England's* reign."

Often, however, it is found to be clearer as well as smoother in sound to use the prepositional phrase instead of a compound noun or a pair of appositional words ; as, "The woes of *Hodge the farmer* ;" "the reign of *Victoria queen of England* ;" "the gallant crews of *the men-of-war*."

45. If two nouns modify the same word and denote **joint origin, ownership**, etc., the apostrophe is added to the second modifier only ; as, "*Mason and Dixon's* line ;" "*Wheeler and Wilson's* machines." Examples are to be seen every day in newspaper advertisements and business announcements.

If one of two possessive nouns has its modified word

omitted and the other has its modified word expressed, **separate ownership**, etc., being implied, the apostrophe is used with both modifiers; as, "*Huyler's and Gunther's candies*;" "*Byron's and Shelley's poetry*."

Sentences for General Exercise¹

1. I studied medicine two years.
2. The chains that held my left leg were about two yards long.
3. The emperor descended from the tower.
4. My good master, Mr. Bates, recommended me.
5. At the place where the carriage stopped, there once stood an ancient temple.
6. The last of these voyages not proving very fortunate, I grew weary of the sea.
7. Death, self-interest, and fortune's changes are every day breaking up many a happy group, and scattering them far and wide.
8. We write these words now, many miles distant from the spot at which, year after year, we met on that day, a merry and joyous circle.
9. Happy, happy Christmas, that can win us back to the delusions of youth!
10. The last observation of Mr. Weller's bore reference to a demonstration that Mr. Winkle made at the instant.
11. And now show the man of misery and gloom a few of the pictures from our great storehouse!
12. The bride's father, our good friend here, is a noble person, and I am proud to know him.
13. "I have called from Dodson and Fogg's," said Mr. Jackson.
14. The ward meetings on election days are not softened by any misgivings of the value of these ballotings.
15. He was a complete family chronicle, which made him a great favorite with the old folks.
16. That keeps the good from our homes and hearts,
And lets the evil in.

¹ [NOTE TO TEACHER. — Lists of sentences so marked throughout the book may be used for parsing or to supplement the exercises on classification, inflection, etc.]

17. Ere long he reached the magnificent glacier of the Rhone ; a frozen cataract more than two thousand feet in height, and many miles broad.

18. Maiden, that read'st this simple rhyme,
Enjoy thy youth, it will not stay.

CAPITALS AND PUNCTUATION

46. Every word and expression used as a proper name begins with a **capital letter**.

They include such words as the following :—

(1) Names of persons, places, etc. ; as, *Garibaldi*, *New York*, the *City of Rocks*, *Buckeye State*, *Orphans' Home*.

(2) Words, either nouns or adjectives, derived from proper nouns ; as, *American*, *Parisian*, *Shakespearean*.

(3) Names of months, days of the week, special days appointed as holidays or for religious observance, etc. ; but *not* the names of the seasons. Examples are : *September*, *Sunday*, *Thanksgiving Day*, *Easter*, *Fourth of July*.

(4) Names of religious bodies and political parties ; as, *Mohammedan*, *Presbyterian*, *Tory*, *Democrat*.

(5) Names for the Deity ; as, *Jehovah*, the *Infinite*.

(6) Names of things personified ; as, "When *Music*, heavenly maid, was young ;" "Now came still *Evening* on ;" "But *Error*, wounded, writhes with pain."

(7) In titles of books, newspapers, essays, etc., not only the nouns have capitals, but all the principal words ; as, *An Introduction to Chemical Science* ; *The Scientific American* ; *The Nineteenth Century* ; *A Treatise on the Freedom of the Press*.

(8) Such words as *Street*, *River*, *Mountain*,¹ etc., if they

¹ Many good authorities use the small letter instead of the capital in the first three examples under (8).

are used in connection with proper names; the words of direction, *North*, *East*, etc., if they are used as nouns to name sections of country; and all titles used as part of proper names. Examples are: "This is *Fleet Street*, or *Euclid Avenue*; *Roane Mountain*; the prairies of the *West*; the *Duke of Wellington*; *Colonel Bonaparte*."

Exercise

Copy these sentences and use capitals wherever they are needed, giving reasons: —

1. Now came still evening on, and twilight gray
Had in her sober livery all things clad.
2. One of dickens's stories was published in the paper called "all the year round."
3. Honor the light brigade,
Noble six hundred !
4. He was a believer in the church of Rome.
5. Master simon gave them a christmas song.
6. These wise men came from the east.
7. But, Mr. speaker, the gentleman says we have a right to tax america !
8. Ben Jonson lived in queen elizabeth's reign.
9. I think uncle Henry lives on Broad street.
10. This essay, called "the rights of man," caused discussion throughout the united states of america.
47. The apostrophe has the following uses : —
 - (1) To mark the possessive case ; as, the *World's* Fair.
 - (2) To mark the plural of letters, figures, etc. ; as, *x's*, *8's*, *oh's*.
 - (3) To show that letters are omitted from words ; as, "'Tis (it is) distance lends enchantment ;" " *They'll* (they will) bare their snowy scalps ;" " *We've* (we have) been long together."

48. Some uses of the comma should be noticed here in connection with the study of nouns :—

(1) Nouns independent by direct address, unless exclamatory, are set off from the rest of the sentence by the comma ; as, “ *King Agrippa*, believest thou the prophets ? ”

(2) Nouns in apposition are separated by the comma, unless they are used as parts of one name ; for example, “ O gentle sleep, Nature’s soft *nurse*. ”

(3) Nouns used as nominative absolute with a participle are set off by the comma ; as, “ His father *yielding* to old age, the prince ascended the throne. ”

Exercise

Copy these sentences, insert apostrophes and commas where needed, and give reasons :—

1. O sir Im sorry to give you a pain!
2. Twas the fishers wife at her neighbors door.
3. The moon a phantom vessel sails
Past reefs of cloud in rugged lines.
4. The road passing straight through a waste moor the towers of a distant city appear.
5. I wouldnt hurt you for a farm
My pretty little neighbor!
6. He had under him in one of his dominions a briber a gift-taker a gratifier of rich men.
7. The end being given the means could not well be mistaken.
8. Anne the mother of Francis Bacon was distinguished both as a linguist and as a theologian.
9. He came clattering up to the school door with an invitation to Ichabod to attend a merry-making or “quilting-frolic” to be held that evening at Mynheer Van Tassels.
10. “Well my dear,” said her father with a quiet laugh, “I didnt say you dont manage for everybodys good.”

PRONOUNS

49. We have learned that the office of the pronoun is to stand for a name, or for a noun. It may have other uses in the sentence, but must have this quality of standing for a noun or its equivalent.

CLASSES OF PRONOUNS

50. The various classes of pronouns may be found by a study of the following sentences:—

As soon as the captain came, he rallied his men around him.

In this sentence, the words *he*, *his*, and *him* evidently stand for *captain*, and denote a person *spoken of*. They are called personal pronouns. Other personal pronouns, as *I*, *we*, *me*, etc., denote the person *speaking*; and yet others, as *you*, *thou*, *thee*, etc., denote the person or thing *spoken to*.

A **personal pronoun** is one that shows by its form whether it represents the person speaking, the person or thing spoken to, or the person or thing spoken of.

Exercise.—Write sentences using five of the personal pronouns mentioned above.

51. The person who effected so much by his eloquence was called Peter the Hermit.

In this sentence, two statements are put together. The main statement is, "The person was called Peter the Hermit;" and in this the word *person* is modified by the

expression, "who effected so much by his eloquence." The expression, "who effected so much by his eloquence," is equivalent to "*and he* effected," etc.; *and* being a conjunction connecting the two members of the sentence, and *he* referring to *person* in the main division.

A division of a sentence containing a subject and its predicate is called a **clause**.

Two clauses have now been shown in this sentence. The word *who*, being equivalent to *and he*, connects clauses, and also refers to a noun in the sentence.

A word that stands for some noun or equivalent of a noun in the sentence and also connects clauses is called a **relative pronoun**.

52. What was the Priory like?

Here the word *what* does not stand for any word in the sentence, but is used to ask a question. The answer might be, "It was like a church," or "It was like an inn;" and the word *church* or the word *inn* would take the place of *what* in the sentence. Hence, *what* stands for a word or a group of words, and is a pronoun.

A pronoun that is used to ask a question is called an **interrogative pronoun**.

- 53.** 1. These too belonged to the past.
2. I had no advantage over others of my age.
3. All was now placed beyond a doubt.

The words *these* in (1), *others* in (2), and *all* in (3), are terms that might modify nouns; as in the sentences, "*These* customs are strange;" "I saw *other* persons;" "*All* doubt disappeared." But in sentences (1), (2), and (3), the words do not modify, but stand for nouns; in (1),

these means the *things* previously mentioned ; in (2), *others* contains the idea of persons ; and so on.

A word primarily an adjective, but used to stand for a noun, is called an **adjective pronoun**.

Exercise.— Write five sentences using as adjective pronouns the words *some, several, all, any, everything*.

To sum up, the four classes of pronouns are **Personal, Interrogative, Relative, and Adjective**.

PERSONAL PRONOUNS

54. The declension of personal pronouns is as follows :—

FIRST PERSON		SECOND PERSON		THIRD PERSON		
		<i>Old</i>	<i>Common</i>			
	<i>Singular</i>	<i>Form</i>	<i>Form</i>	<i>Masc.</i>	<i>Fem.</i>	<i>Neut.</i>
<i>Nom.</i>	I	thou	you	he	she	it
<i>Poss.</i>	mine, my	thine, thy	your, yours	his	her, hers	its
<i>Obj.</i>	me	thee	you	him	her	it
	<i>Plural</i>		<i>Plural</i>	<i>Plural of all three</i>		
<i>Nom.</i>	we	ye	you	they		
<i>Poss.</i>	our, ours	your, yours	your, yours	their, theirs		
<i>Obj.</i>	us	you	you	them		

55. The pronouns of the first and the second person do not, by their form, indicate gender. They do not always refer to words in the sentence, but may stand for the names of persons speaking, or persons or things spoken to ; and

since they are used in direct speech, the gender need not be expressed by the form of the pronoun.

If, however, the context has a word to accompany the pronoun, the gender of the latter is clear ; for example : —

1. “ *I* like the old custom,” said the *Squire*.
2. *Niece*, I hope I see *you* well in health.
3. *Thou* hast done well, good *fellow*.

56. The singular pronouns of the third person, on the other hand, show by the form whether the object spoken of is a male or a female being, an inanimate object, or a living being whose sex is not important.

So exact are these forms in indicating gender that they are used to show whether certain nouns are regarded as masculine or feminine — for example, *friend*, *acquaintance*, *cousin*, etc. ; as in the sentences : —

1. My *companion* looked around *him* with transport.
2. The *invalid* retired with *her* maid to *her* bedroom.

They also accompany names of things personified, as shown in the following expressions : —

1. *Night*, sable goddess, from *her* ebon throne.
2. As if *Death* were raging, . . . seeking for *his* prey.

Exercise. — Write sentences using five nouns from Section 12 with masculine pronouns, then with feminine, as illustrated above.

57. There is no pronoun, however, of the third person *singular* to stand for terms that include both masculine and feminine. The first examples in Section 56 are used expressly to show that a male *or* a female person is spoken of ; but when certain nouns or other words imply that both male *and* female persons are meant, the pronouns are de-

fective. For instance, what shall we use to fill this blank :
 "Every friend of mine has —— own plans" ?

The preferred way is to let the masculine pronoun stand for both masculine and feminine names ; as, "*his* own plans," in the sentence just quoted. Other examples are :—

1. Who can tell, when *he* sets forth to wander, whither *he* may be driven ?
2. *Every one* had *his* tale of shipwreck and disaster.
3. Any *man or woman* with a pennyworth of brains . . . must have gone off into a digression of *his* own.

Sometimes writers use both a masculine and a feminine pronoun in such a case ; as :—

No *male or female* remembers *his or her* first inclination any more than *his or her* own christening.

But there is no such difficulty when several objects or persons are represented by a plural pronoun. The forms *they, their, them*, are the only plurals for all genders :—

1. (Persons) The *villagers* doffed *their* hats to the Squire.
2. (Things) The *sounds*, as *they* receded, became more soft.
3. (Persons and things) What has become of the charms of music, by which *men and beasts, fishes, fowls, and serpents* were so frequently enchanted, and *their* very natures changed ?

58. Occasionally the plural forms *we, our*, etc., are used to represent only one person, especially a ruler ; thus :—

We have summoned to *our* presence a Jewish maiden.

They are also often used by authors and editors, who are speaking with the purpose of making their words prominent but themselves less prominent ; for example :—

We shall be pardoned, *we* hope, if *we* call the attention of *our* readers to the causes and to the consequences of that great event.

59. A form originally plural is used as a singular pronoun of the second person. We no longer say *thou*, *thee*, etc., in ordinary speech, but *you*, *your*. These forms are used in speaking to one person or more than one, always taking a plural verb, however, whether one or more are addressed. It is not correct to say, "You *was* a good friend," or the like.

The forms *thou*, *thine* or *thy*, *thee*, and *ye*, are often called the **solemn forms**, since they are used in the Bible, also in prayers and other kinds of worship; no quotations are needed to illustrate this familiar usage.

They may be called the **poetic forms** also, since they occur frequently in poetry and elevated prose style; as:—

1. There was a boy, *ye* know him well, *ye* cliffs.
2. I fear *thee* and *thy* glittering eye.
3. Bishop of Beauvais! *thy* victim died upon a scaffold, — *thou* upon a down bed.

60. The word *it* has several distinct uses:—

(1) **The regular use as a pronoun**, to refer to some word or expression in the same sentence or a sentence close by. This reference may be *backward* to a preceding word; as:—

1. The cheerful *fire* glanced *its* rays through the lattice.
2. Indeed, *he was the idol of the younger part of the company*. . . .
I could not wonder at *it*.

In the first sentence, *it* stands for the noun *fire*; in the second, *it* stands for the whole statement preceding.

The reference may be *forward* to some noun or its equivalent in the sentence or a sentence close by ; as :—

1. None but those who have experienced *it* can form an idea of the delicious *throng of sensations*.

2. Shorn as *it* is of *its* ancient and festive honors, *Christmas* is still a period of delightful excitement.

61. Beside the regular use just given, there are some that are strikingly idiomatic, quite unlike the reference to particular expressions. These uses are :—

(2) **It introductory** : here *it* does not really stand for a noun and take the exact place of it in a sentence, but occupies a place as subject, while the *real or logical subject* is a word, phrase, or clause following the predicate. Though *it* is singular, the real subject may be a plural word ; as :—

1. *It* was a fine, sunny *morning*.

2. "*It* was *the English*," Kaspar cried,
"Who put the French to rout."

3. *It* is impossible to resist the gladdening influence of fine weather and fair wind.

4. *It* is a beautiful arrangement that this festival has been made the season for the gathering together of family connections.

(3) **Impersonal subject** ; as in the following common expressions :—

It is raining. *It* turned cold. *It* thundered and lightened. *It* was very late, etc.

Here the verb has no other subject than *it*, which is a meaningless word in this use, the real idea being in the verb which follows, or in such a word as *rain*, *weather*, *air*, *time*, etc., in the mind of the speaker.

(4) **Impersonal object** ; merely completing the assertion

of the verb, but having no meaning of its own; for example:—

1. How she (the ship) seems to lord *it* over the deep !
2. She sweeps *it* through the court with troops of ladies.

62. The name for which the pronoun stands is called its **antecedent**, from a Latin word that means going before. The antecedent, as the term implies, usually comes before the pronoun, as shown in the sentences under Sections 56, 57, etc.

Exercise

(a) Tell what is the antecedent of each personal pronoun of the third person in these sentences:—

1. My own demurs to these harsh judgments were not so many as they might have been.

2. My brother did not share my inexpressible delight; his taste ran in a different channel.

3. No motive existed any longer for living near to a great trading town, so long after the commercial connection with it had ceased.

4. Cicero tells us that he never liked an orator who did not appear in some little confusion at the beginning of his speech.

5. To teach is to learn; according to an old experience, it is the very best mode of learning.

6. Every one ought to reflect how much more unhappy he might be than he really is.

(b) In the following sentences, tell which use the pronoun *it* has in each instance:—

1. It was a very good time for talking.

2. It has been my lot to have my roving passion gratified.

3. I might fill a volume with the reveries of a sea voyage—for with me it is almost a continual reverie—but it is time to get to shore.

4. Certain it is, the place still continues under a spell.

5. He lorded it over his little empire, the school.

6. When I awoke, it rained.

Nominative Case of Personal Pronouns

63. The nominative forms of these pronouns have, like nouns, the following uses :—

- (1) **Subject** of a verb ; as, "Thither *we* went."
- (2) **Predicate nominative**, or complement of an intransitive verb ; as, "You are *he* who decided the victory."
- (3) **In apposition** with a nominative word ; as, "There is the hero, *he* who saved our lives."
- (4) **Direct address** (*thou*, *ye*, and *you*), either alone, as in this expression, "O *ye*, whom wrath consumes!" or, much oftener, an adjunct of a noun addressed ; as, "*Thou* Wind, that ravest without."
- (5) **In an absolute phrase**, usually with a participle ; as, "I was obliged to part from my friends, *they* having been called away by a message."

Exercise. — Write ten sentences illustrating all the above uses.

Objective Case of Personal Pronouns

64. The objective forms of the personal pronouns have mainly the same uses as objective nouns :—

- (1) **Direct object** of a verb ; as, "Touch *us* gently, Time!"
- (2) **Object of a preposition** ; as, "For I will fly to *thee*."
- (3) **Indirect object** of a verb, as, "Sing *me* the song."
- (4) **In exclamations** the objective form *me* is often used ; as, "Ah, *me* ! what rumor do I hear?"

Exercise. — Write fifteen sentences illustrating uses (1), (2), and (3) above, five for each use.

Possessive Case of Personal Pronouns

65. The possessive forms *my*, *our*, *thy*, *your*, *her*, *its*, *their*, stand before nouns and modify like adjectives.

Besides these there are the possessive forms *mine, ours, thine, yours, hers, and theirs*, which imply possession but are seldom used to stand before a noun. The word *his* may stand before a noun or be used without a noun following.

This use of possessive forms, modifying but not standing before the modified noun, is called *absolute*, which means cut loose from the modified word; and the pronouns so used are called **absolute personal pronouns**.

They are not a separate class, but a special use of the personal pronouns. Examples of their use are:—

1. 'Twas *mine*, 'tis *his*, and has been slave to thousands.
2. Some provinces have tried the experiment, as we have tried *ours*; and *theirs* has succeeded.

Compound Personal (or Reflexive) Pronouns

A pronoun is used reflexively when it is the direct or indirect object of a verb, and also refers to the same person or thing as the subject of that verb.

Certain words are classed separately as reflexive pronouns. They are more properly called **compound personal pronouns**, as they are not always reflexive. They consist usually of the possessive form of the personal pronoun united with the word *self, selves*; as, *myself, yourselves*.

The following is a list of these compounds:—

FIRST PERSON		SECOND PERSON		THIRD PERSON		
		<i>Old</i>	<i>Common</i>			
		<i>Form</i>	<i>Form</i>	<i>Masc.</i>	<i>Fem.</i>	<i>Neut.</i>
<i>Sing.</i>	<i>myself</i>	<i>thyself</i>	<i>yourself</i>	<i>himself</i>	<i>herself</i>	<i>itself</i>
<i>Plur.</i>	<i>ourselves</i>		<i>yourselves</i>		<i>themselves</i>	

All these are in the nominative or the objective case.

Exercise.—Select five of these pronouns and use them in sentences, first as nominative, then as objective case.

INTERROGATIVE PRONOUNS

66. The office of an **interrogative pronoun** is to ask a question and stand for the noun or equivalent of a noun that would answer the question.

The interrogative pronouns are *who*, *which*, and *what*.

67. Sentences are most often put into the form of a statement; as, "A burnt child fears the fire."

Notice that the words of this sentence are placed in the following order: (1) Subject (*a burnt child*); (2) Predicate (*fears*); (3) Object (*the fire*). This is known as the **regular** or **normal** order of words in a sentence.

68. Sentences may also be put into the form of a question; as, "Who calls me at the dead of night?"

This sentence has the regular or normal order, just like that of the statement quoted above; but in many questions the subject does not come first; for example:—

A

1. What sort of a house is Woodstock?
2. Who and what could it be?
3. What was the Cyclops doing here?

The real relations of the words may best be seen if they are arranged in the regular order:—

B

1. Woodstock is what sort of a house?
2. It could be who and what?
3. The Cyclops was doing what here?

In group A, the first word in each sentence asks the question; but we see from group B that the subjects are *Woodstock*, *it*, and *the Cyclops*.

Sentences that ask direct questions are called **interrogative sentences**.

Exercise

Rearrange the words of these sentences if necessary, then tell the office of each italicized word: —

1. And by *what* appeal hereafter shall we attempt to rouse up native valor?
2. *Who* can estimate the power of gentle influences?
3. *What* could the little bird mean by pouring forth such a song at midnight?
4. *Which* way should the unhappy victim turn?
5. *Whom* had he gained by this contempt?
6. For *what* had we come up to London?
7. *Which* would my uncle the captain prefer?
8. *Who* is she in bloody coronation robes?
9. *What* was the reason that the Greeks and the Romans had not the advantage of printed books?
10. This soldier, this officer — *who* are they?

NOTE. — The pupil should be careful to use an interrogation point after each interrogative sentence.

69. The following sentences illustrate the uses and also the forms of the interrogative pronoun *who*: —

1. *Who* can say how extensive the effect of this single break may be?
2. *Who* were the persons that lodged in this house when it was first built?
3. *Whose* monument is this? A neglected poet's who died not long ago.
4. I turned to share the transport — Oh! with *whom*
But Thee, deep buried in the silent tomb?

Exercise. — State in which case each interrogative pronoun is in the above sentences, and why.

70. From the sentences in Section 69 it may be seen that *who* as an interrogative pronoun refers to *persons only*; that it is inflected for case, but not for number; and that, since it asks *about* a person, it is always of the third person.

71. The following sentences show the uses of the interrogative pronoun *which*:—

1. A rich young English peer in the reign of George the Second; a wealthy patrician in the reign of Augustus; *which* would you rather have been?

2. *Which* of us was so witty? Was it I or you?

3. *Which* of the children can the fond mother punish?

4. There was war with its horrors, and peace at a sacrifice—*which* would he prefer?

Exercise.—Tell the use of each interrogative pronoun in these sentences, and tell in which case each is.

72. These show that the interrogative pronoun *which* asks about either persons or things; that it is not inflected for case, the form for the nominative and objective being the only one; nor is it inflected for number, as the simple form refers to one person or thing or more than one; that it is always of the third person; and that it is *selective* in its use, that is, it picks out one or more from a number of known objects.

73. The uses of the interrogative pronoun *what* are shown in the following sentences:—

1. *What* have I but my word, and my honor?

2. And *what* had been his conduct in that country?

3. When we sum up all the useful truths which we owe to that philosophy, to *what* do they amount?

4. After all, *what* were the charms that had laid the lorn youth a slave at her feet ?

Exercise. — Tell the use of the italicized word in each sentence; then tell in which case it is.

74. It will be observed that the interrogative pronoun *what* stands for *things*; that it is not inflected for case, or for number; that it is always of the third person; that it is usually singular, but may be the complement after a plural subject.

75. The forms of the interrogative pronouns, then, are: —

	SING. AND PLUR.	SING. AND PLUR.	SING. AND PLUR.
<i>Nom.</i>	who ?	which ?	what ?
<i>Poss.</i>	whose ?	———	———
<i>Obj.</i>	whom ?	which ?	what ?

Whose, being a possessive form, is always a modifier; *who* (with *whose* and *whom*), *which*, and *what* are also relative pronouns (Section 79); *which* and *what* are also interrogative or relative adjectives; and *what* has still other uses, to be mentioned later.

Exercises

1. Write six sentences using the forms *who*, *whose*, and *whom* as interrogative pronouns — two sentences for each word.
2. Write four sentences using *which* as an interrogative pronoun — two sentences for the nominative use, and two for the objective use.
3. Write four sentences, using *what* as you used *which* in Exercise 2.

RELATIVE PRONOUNS

76. The relative pronoun does the double work of joining two clauses (Section 51) and of standing for a noun.

It is so called because words of this class usually *relate* to an antecedent in another clause. Sometimes the name **conjunctive pronoun** is given them because they connect clauses, as conjunctions do.

77. In order to find out the antecedent of a relative pronoun, the best way at first is to divide the sentence into its clauses and find out what word the pronoun takes the place of. For example, the sentence, "He maintained the same cheerfulness of heart upon the scaffold which he used to show at his table," is made up of two statements: "He maintained . . . scaffold," and "he used to show this cheerfulness at his table." It is clear that *which* takes the place of *cheerfulness*.

Exercise.—Mention the antecedent of each relative pronoun in sentences 1, 2, 4, 5, 7, and 8 of the Exercise on pages 70, 71.

78. As to the **case** of these words, that depends upon the *use of each relative pronoun in its own clause*. The same rules about case hold good here as with nouns, personal and interrogative pronouns, etc.

79. The **simple** relative pronouns are *who*, *which*, *that*; the word *what* is sometimes called a **double** relative pronoun; and *whoever*, *whichever*, *whatsoever*, etc., are called **indefinite** or **compound** relative pronouns.

Exercise

(a) Unite the following sets of statements, using relative pronouns to join them:—

1. All the men were lost. They were in the ship.
2. My hair was tied down. It was very long.
3. One made a speech. He was a nobleman.

4. One soldier was killed. His sword was broken.
5. Their horses are useful. They are very small.
6. The men have come. You sent for them.
7. The watch is lost. The boy had bought it.
8. Those are the men. Their sons are in the army.

(b) In the sentences you have made, tell whether each relative pronoun is the subject of its clause, the object, or a possessive modifier.

80. The following sentences illustrate the forms and the uses of the relative pronoun *who*: —

1. I, *who* had been placed under the tuition of one of my guardians, remained some time longer under his care.
2. To us *who* have seen the solution, the question presents few difficulties.
3. O Time ! *who* know'st a lenient hand to lay
Softest on sorrow's wound.
4. O ye *who* teach the ingenuous youth of nations,
I pray ye flog them upon all occasions.
5. The clergyman *who* then dwelt in the manse stood watching the outbreak of a long and deadly struggle.
6. The hermit had called the dogs *who* made this clamor to aid him in his defense.
7. We *whose* names are hereunto subscribed do solemnly declare, that we do believe that two and two make four.
8. A few barons, *whose* names ought to be dear to their country, joined Bruce in his attempt.
9. O thou ! with *whom* my heart was wont to share
From Reason's dawn each pleasure and each care.
10. It is not merely, sir, those *whom* I, John Lambert, priest, have joined, let no man put asunder.

Exercise. — Point out the antecedent of each relative pronoun, and give its gender, person, and number.

81. The above sentences show that the relative pronoun *who* relates usually to persons, though sometimes to ani-

mals; that it is inflected for case, but not for gender, number, and person. The agreement of the pronoun with its antecedent is, however, often shown by the form of the verb of which the pronoun is the subject.

82. The quotations below will illustrate the forms and uses of the relative pronoun *which*: —

1. We heard a distant thwacking sound, *which* he informed me was a signal for the serving-up of dinner.

2. The poor lady was herself agitated by the flutter and agitation *which* she saw in her young companion.

3. We were escorted by a number of gentlemanlike dogs, the last of *which* was of a race that had been in the family time out of mind.

4. The gallant Frith the eye might note,
Whose islands on its bosom float,
 Like emeralds chased in gold.

5. The highroads were choked with loaded wains, *whose* axle-trees crackled under the burdens of wine casks and hogsheads of ale.

6. At the same time he delivered a letter, *which* my friend read to me as soon as the messenger had left him.

Exercise. — In the above sentences, point out the antecedent of each relative pronoun, and give the person, number, and case of the latter.

83. A study of the first four sentences in Section 82 shows that *which* relates to *animals and things*; that it has one case form for the possessive, and one for the nominative and objective; that it does not change its form to indicate the gender, person, and number of its antecedent.

84. The following quotations illustrate the uses of the relative pronoun *that*: —

1. Dear Babe, *that* sleepest cradled by my side.

2. My garden, *that* skirted the avenue of the manse, was of precisely the right extent.

3. Who *that* has seen the world, has not admired that astonishing ease with which fine ladies drop you and pick you up again?

4. You, friends, *that* have stood by me all these years, help me now!

5. I was making some remarks upon a flock of peacocks, *that* were basking upon a sunny wall.

6. Such a solitude as the Old Manse, where he plucks the fruit of trees *that* he did not plant.

Exercise. — Give the gender, person, number, and case of each relative pronoun in the above quotations.

85. As shown in Section 84, *that* relates to *persons*, *animals*, and *things*; it has only one form for singular and plural number, and for all genders, numbers, and cases.

86. To sum up all the facts about the simple relative pronouns, we find that: —

Who and its forms usually refer to persons, but sometimes to the higher animals as well.

Which and its forms refer to animals and things.

That relates to persons, animals, and things.

Who has three case forms, *which* has two, while *that* has only one form.

The declension of *who* and *which* is just like that of the interrogatives, except that the relative *which* has a possessive form, *whose*.

Exercise

Write sentences using the relatives *who*, *which*, and *that*, as follows: —

(1) *Who* as subject, third person singular; (2) *who* as subject, second person plural; (3) *who* as object of a verb, third person plural; (4) form of *who* as possessive, first person singular; (5, 6, 7) *which* and its forms as nominative, possessive, and objective, third person plural; (8, 9, 10) *that* nominative plural, objective plural, objective singular, second person.

87. *What* is often called a **double relative pronoun**, because it is considered equivalent to *that which* or *those which*. By some writers it is called an **indefinite relative** because usually no definite antecedent is expressed.

To explain more fully, we will take a sentence : —

The window looked out upon *what* in summer would have been a beautiful landscape.

(1) It means “upon *that which* would have been,” etc. ; in which expression *that* is the object of *upon* and *which* is the subject of *would have been*. Or, another way : —

(2) As it stands, the object of *upon* is the noun clause *what in summer . . . landscape* ; in this clause *what* is the subject, *would have been* is the predicate, etc.

88. The following sentences serve to illustrate the uses of the relative pronoun *what* : —

1. In the world some persons assimilate only *what* is ugly and evil.
2. *What* was good and nourishing food for the spirits of one generation will not do for the next.
3. It is my belief that social intercourse cannot long continue *what* it has been.
4. I wandered among *what* once were chapels.
5. The trial of skill was made with *what* were called the arms of courtesy.
6. Nothing retained any sap except *what* was written for the passing day and year.

Exercise. — Give the number and case of *what* in each of the sentences just quoted.

89. The relative pronoun *what* is always neuter and of the third person ; it is usually singular, but may be plural ; it has only one form for number and case.

90. When *who*, *which*, and *what* are joined with the suffix *-ever* or *-soever*, the **indefinite** or **compound relative pronouns** are formed. In general they have the same uses as the relative pronoun *what*; thus:—

1. *Whoever* has made a voyage up the Hudson must remember the Catskill Mountains.

2. "Pass on, *whosoever* thou art," was the answer given by a deep, hoarse voice from within the hut.

3. For unto *whomsoever* much is given, of him shall be much required.

4. *Whatever* had looked ugly was now beautiful.

5. He would hit me with his stable broom or the fork, *whichever* he might have in his hand.

Exercise.—In the above sentences, tell the case of each indefinite relative pronoun, and see whether each refers to a person or to a thing.

91. All the sentences that were studied under interrogative pronouns were **direct questions**, that is, quoted directly, in the language of the questioner himself.

Instead of quoting a question exactly as a person asks it, we may put it into our own words so as to make it part of another sentence; thus: "His curiosity began to awake, and he demanded of the guide *who and what he was*." This latter part is called an **indirect question**. The original words were, "Who and what are you?"

It is to be noticed that usually only a direct question is inclosed in quotation marks and followed by an interrogative point.

92. Hitherto all interrogative pronouns have been studied in direct questions and all relative pronouns in direct statements; but in fact interrogative pronouns are often found in an indirect question contained in a statement, and

relative pronouns may form part of a sentence making a direct question.

In deciding which kind of pronoun any word is, determine (1) whether it has an antecedent; (2) whether it introduces an indirect question.

Exercise

- (a) Write five sentences having direct questions.
- (b) Change these to indirect questions.
- (c) Tell which kind of pronoun each italicized word is in the following sentences: —

1. It need not be inquired where or from *whom* he learned the lesson of filial disobedience.

2. *Who* were the persons in *whom* he placed the greatest confidence, and *who* took the warmest interest in his schemes?

3. It moaned as near as near can be,
But *what* it is she cannot tell.

4. I pray your Lordship to let me know *whom* you will favor.

5. How can I talk to gentlemen when I do not know *which* of them have received gratification?

6. *What* is so pleasant as these jets of affection *which* make a young world for me again?

7. He had twenty friends *who* would release him from his confinement; to *which* of them should he apply, was the question.

8. He demanded again of the unknown culprit *what* he came there for, and *whom* he was seeking.

- (d) Rewrite Nos. 4 and 8 so as to form direct questions.

93. An important distinction between clauses introduced by relative pronouns is yet to be made; and it will best be brought out by studying two sentences: —

1. Like all men who know but a few books, he looked up to them with a kind of idolatry.

2. They all liked the lad, whose frank, cordial ways and honest face got him a welcome in most places.

In sentence (1), the statement, "Like all men, he looked up to them," etc., would not be a truthful one; the action is stated, not of "all men," but of "all men who know but a few books." The clause, *who know but a few books*, is called a **restrictive clause**, because it restricts or limits the meaning of the word it modifies.

In sentence (2), the reader is supposed to know who the lad is; the clause, *whose frank, cordial ways*, etc., is not needed to describe the lad, but adds another fact to what is already known. It is really equivalent to "*and his frank, cordial ways*," etc. — a conjunction and a personal pronoun, and is called a **coördinate or unrestrictive clause**.

A relative clause that is necessary to the meaning of the word it modifies, is a **restrictive clause**.

A relative clause that adds a fact to one already clear and complete, is an **unrestrictive clause**.

The pronouns *who* and *which* introduce both kinds of clauses; *that*, usually a restrictive clause only.

94. In many cases nothing but the punctuation shows whether the clause is restrictive or not. If a comma were placed after *men* in sentence (1) above, and if the comma were omitted after *had* in sentence (2), the meaning of each sentence would be changed.

A comma is always used to separate an unrestrictive relative clause from the rest of the sentence.

Exercise

(a) Tell which of the relative clauses in the following sentences are restrictive, and which unrestrictive: —

1. Mr. Harry, who ought to have known better, was lying on his face quite motionless.

2. You who are ill and sore from the buffets of Fate, have you one or two of these sweet physicians ?

3. Doubtless there were thousands of men employed who were as good as they.

4. He was engaged in capturing those guns at Louisburg, of which the arrival caused such joy.

5. His nose curved boldly forth, flushed with a frost-bitten bloom that seemed the trophy of December.

(b) Distinguish in meaning these sentences as they stand, from the same with commas inserted : —

1. A traveler falls in with a berry [,] which he has never seen before.

2. When we sum up all the useful truths [,] which we owe to that philosophy, to what do they amount ?

3. His object was to free millions of his subjects from penal laws and disabilities [,] which hardly any person now considers as just.

4. He could turn his eyes nowhere without meeting some object [,] which reminded him that he was a stranger.

5. He had to deal with a people [,] whose noble weakness it is not to press too hard on the vanquished.

(c) Punctuate such of the following sentences as need it, and give the reason in each case : —

1. He was soon at ease with his honest host whose manners were quite simple and cordial.

2. What honest man that can choose his lot would be a prince, let us say?

3. A gravel walk ran around this green beyond which was a wall and gate-sign.

4. Her complexion which was exceedingly fair was further ornamented with a pair of red cheeks which he took to be natural roses.

5. Almost all who beheld him, nay, even those who cheated him, trusted him.

6. This was no other than Mr. Wolfe who was soberly eating a chicken and salad.

7. "I must make them a present," said he, clapping his hand into his pocket which was filled with the crisp notes.

8. He was living with a man and woman who had seen the world, though they lived retired from it.

Analysis of Complex Sentences

95. In studying analysis in the Introduction we took up only those sentences which have one subject and predicate, and found out what elements these sentences contained.

A sentence having only one statement, question, or command is a **simple sentence**.

96. In Section 51, however, we studied a group of words having two clauses so knit together as to form one sentence.

The main division, "The person was called Peter the Hermit," is one that makes a complete meaning when standing alone, that does not need the aid of any other clause; the other division, "who effected so much by his eloquence," does not make sense when standing alone, but, like an adjective, modifies the word *person* in the preceding clause.

A **main, principal, or independent clause** is one that makes a statement, question, or command without the aid of another clause.

A **subordinate or dependent clause** is one that does not make complete sense when alone, but is a subordinate element in a sentence.

A **complex sentence** is one that consists of one main clause, and one or more subordinate clauses.

In the study of relative pronouns especially, a knowledge of complex sentences is very necessary.

97. In the two sentences following may be seen two kinds of dependent, or subordinate clauses :—

1. The great stream which fertilizes the soil is the chief highway of Eastern commerce.

2. How dost thou know what he containeth ?

We may, in analyzing these, first treat each as a simple sentence, taking as its subject the subject of the main clause. This is the analysis :—

In (1), *The great stream which fertilizes the soil*, is the subject; *is the chief highway of Eastern commerce* is the predicate. To be more minute, the bare or simple subject is *stream*, modified by a clause *which fertilizes the soil*; which clause, modifying a noun, must be an **adjective clause**. This clause may then be analyzed : subject *which*, predicate *fertilizes*, etc.

In (2), *thou* is the subject, *dost know what he containeth* is the predicate; of the predicate, *dost know* is the verb, *what he containeth* is the object, and, having this use, must be a **noun clause**. This clause should now be analyzed like a simple sentence.

An **adjective clause** is one having the use of an adjective. A **noun clause** is one used as subject, complement, object, etc., like a single noun.

Exercise

Point out the dependent clauses in the following sentences; tell how each clause is used, then analyze it like a simple sentence :—

1. Amidst all the evils that threaten me, I will look up to Him for help.
2. How many men are country curates that might have made themselves aldermen in London !
3. Till about twelve o'clock in the morning, these needy persons know not what they shall say.

4. My landlord, who was a jolly good-natured man, took it into his head that I wanted company.

5. I love to read books which he delighted in.

6. What I have to say regards only the vain part of the sex, whom for certain reasons, which the reader will hereafter see, I shall distinguish by the name of idols.

7. He was not ill qualified to conduct the work which he had planned.

8. Those had little reason to laugh who encountered them in the hall of debate or in the field of battle.

ADJECTIVE PRONOUNS

98. In studying words of this kind, some care will be needed in deciding whether or not the given word modifies a noun. If it does not modify any noun, either expressed or understood, it is a pronoun; if it does modify some noun, expressed or understood, it is an adjective (unless it happens to be the possessive case of a pronoun). For example:—

1. He shrugged his shoulders, shook his head, cast up his eyes, but said nothing. *This*, however, always provoked a fresh volley from his wife.

2. *One* taste provoked *another*; and he reiterated his visits so often to the flagon, etc.

In (1), the word *this* stands for the sentence before it, but does not modify; it is a pronoun. In (2), *another* modifies *taste* understood, just as *one* modifies *taste* expressed, and both are adjectives.

Exercise

In the following paragraphs, tell which of the italicized words are pronouns, and which adjectives:—

1. They were dressed in a quaint, outlandish fashion. *Some* wore short doublets; *others*, jerkins, with long knives in their belts; and

most of them had enormous breeches, of similar style with *that* of the guide's. *One* had a large head, broad face, and small piggish eyes. The face of *another* seemed to consist entirely of nose. They *all* had beards.

2. The blast that bore it to our ears swept us out of *all* further hearing. I shall never forget *that* cry. It was *some* time before we could put the ship about, she was under *such* headway. We cruised about for *several* hours in the dense fog. We fired signal guns, and listened if we might hear the halloo of *any* survivors; but *all* was silent.

99. Adjective pronouns are of three classes, demonstrative, distributive, and indefinite.

Demonstrative pronouns are used to point out some special object, person, or expression.

Distributive pronouns are used in speaking of persons or things separately.

Indefinite pronouns stand for an uncertain number of persons or things. They may be simple or compound.

100. The **demonstrative pronouns** are *this, that* (plurals *these, those*), *such, the same, the former . . . the latter, the one . . . the other*.

Their use is shown in the following sentences:—

1. (a) When any one exposed himself, *this* was made evident by the bullet which was sent in search of him.

(b) The head, the diadem, the arm,—*these* all had sunk.

2. (a) Have you forgotten me? *That* might well be the case if I were as much altered as yourself.

(b) The behavior of the present family was contrasted with *that* of the old lord and lady; who were better folks than *those* now in possession.

3. He hurled the mace against the head of the Emir, for *such* his enemy appeared.

4. Ichabod pulled up, and fell into a walk, thinking to lag behind; the other did *the same*.

5. His Eastern attendants wore silver collars round their throats, and bracelets of the same metal upon their swarthy arms and legs, of which *the former* were naked from the elbow, and *the latter* from mid-leg to ankle.

6. In this city Alcander and Septimius were fellow students together. *The one* the most subtle reasoner of all the Lyceum; *the other* the most eloquent speaker.

Exercise.—Mention the word or expression for which each demonstrative pronoun stands in these sentences.

101. *That* and *those* have several uses: *That* may refer to a group of words, as in Section 100, (2) (a). *That* and *those* may stand for some single word, being used to prevent the repetition of that word, as in Section 100, (2) (b). *Those* is often used as the antecedent of a relative pronoun, to refer to a number of persons; thus, “‘As to *those* who have bad constitutions,’ he said, ‘let them die.’”

The former . . . the latter and *the one . . . the other* are useful words in pointing out two persons or objects named in a sentence, *the former* or *the one* referring to the first mentioned, *the latter* or *the other* referring to the last.

102. The distributive pronouns are *each*, *either*, *neither*, *each other*, and *one another*.

Examples, showing the use of the first three:—

1. I could almost doubt which of us is the visionary form, or whether *each* be not the *other's* mystery.

2. Pleasure and study are not to be thus mixed together; the Romans lose both, and prove they have no souls for *either*.

3. Their eyes met, and *neither*, for some moments, had power to withdraw his gaze.

Either and *neither* refer regularly to two things, but *each* to any number, though singling out one by one. All three words are frequently used as adjectives.

Each other and *one another* are sometimes called **reciprocals**. For example:—

1. The clergyman and his father looked at *each other*.
2. The fine ladies buzzed into *one another's* ears over their pews, and uttered their praises and comments.
3. All the passengers were rubbing their eyes, comparing watches, and congratulating *one another*.

103. Some of the **simple indefinite pronouns** are shown in the following quotations:—

1. *Some* purchased the paltry wreaths with their lives, *others* by a toilsome servitude of years, and *many* sacrificed whatever was most valuable.
2. To *all* who love human faces best for what they tell of human experience, Nancy's beauty has a heightened interest.
3. The livid and motley hues completed a countenance which *none* could behold without repugnance, and *few* without terror and distrust.
4. And there *several* were taking the slight morning repast that made an Italian breakfast.
5. The witch did not reply—she seemed like *one* who has awakened for a moment from the dead.

Exercise.—Write sentences using five of the above adjective pronouns in the nominative case, then in the objective.

104. The **compound indefinite pronouns** are made up of the adjectives *some*, *any*, *every*, and *no*, with the words *body*, *thing*, *one*: *somebody*, *any one*, *everything*, *nobody*, etc. They are all singular, though referring to any of an indefinite number; when antecedents, they are followed by a singular pronoun.

These compounds join with the word *else* to form other compounds; as, *some one else, everybody else, anything else*, etc.

That these groups are used as single pronouns is shown by the way in which they form the possessive case; thus:—

If Mr. Pickwick had declined to keep himself up for *anybody else's* sake, it would have occurred to him that he might as well for his own.

Exercise.—Write sentences using three of the above words as subjects, four as objects, three as possessives.

PARSING OF PRONOUNS

105. The parsing of adjective pronouns differs little from that of nouns. For example, in the sentence, "One might have mistaken him for the genius of famine," *one* is an adjective pronoun, simple indefinite; singular, masculine, or feminine; third person; nominative case, subject of the verb.

In parsing pronouns in general, follow the order for parsing nouns; also, if the pronoun is a simple relative, tell what its antecedent is.

SYNTAX OF PRONOUNS

106. When personal pronouns refer to two or more antecedents in the same sentence, clearness requires that the pronouns should be used in such a way that the meaning can be clearly seen. Observe this sentence:—

A hale, ruddy-faced, white-headed farmer appeared to be the wit of the village, for I observed all his companions to wait with open mouths for his retorts, and burst into a gratuitous laugh before *they* could well understand *them*.

In this we can hardly fail to see that *they* refers to *companions* and *them* refers to *retorts*; but now and then sentences are so carelessly put together that the reader can get the meaning only after a good deal of trouble; and sometimes the apparent meaning is ludicrously different from that intended.

When Pittacus, after the death of his brother, who had left him a good estate, was offered a great sum of money by the king of Lydia, he thanked him for his kindness, but told him that he had already more by half than he knew what to do with.

In this case some labor might be avoided by the use of a direct quotation, thus: "When . . . Lydia, he said, 'I thank you for your kindness, but I have already more by half than I,'" etc.

His father died soon after his birth, and his early life was spent in poverty.

This absurd statement would be avoided by the repetition of the antecedents, or by the use of some distinguishing word; as, "His father died soon after the *boy's* birth, and the early life of *the latter* was spent in poverty."

107. Pronouns must *agree with* their antecedents in gender, person, and number. For instance, if the antecedent of a personal pronoun is singular, masculine, third person, the pronoun will be *he*, *his*, or *him*; if the antecedent is feminine, so will the pronoun be; etc.

If the antecedent of a personal pronoun is a word in the third person, singular number, that does not make clear the sex of the person named, the pronoun is to be of the masculine gender, third person, singular number.

Examples of the agreement of personal pronouns : —

1. Every *student*, before *he* is matriculated, must subscribe *his* assent to the thirty-nine articles.
2. As soon as I was able to converse with the *natives*, I began to feel some satisfaction in *their* company.
3. *Every one* looked on *himself* as in the utmost danger.
4. Every *man* who rises above the common level has received two educations : the first from *his* teachers ; the second, more personal and important, from *himself*.

Exercise. — Mention the antecedent of each pronoun in these four sentences, and show in what respects they agree.

108. An error frequently made is caused by one's forgetting that the antecedent may be singular in form while referring to many persons or things separately ; and that consequently the pronoun should take the singular form. An example of this error is, "*Any one* who has a question *they* wish answered can drop it into the box."

NOTE. — A collective noun referring to persons or things as a unit will take a singular pronoun ; as, "The Ways and Means *Committee* had just completed *its* labors." But if the collective noun refers to the individuals of the collection, a plural pronoun is used ; as, "The quiet *congregation* of trees set *their* feet in the flood."

109. Another error is caused by making the pronoun agree in person and number with some word near the antecedent and not with the antecedent itself. Example of the correct construction : "*Each* of us [two] shall count *his* own wrinkles on the other's brow and *his* white hairs upon the other's head."

Instead of this, a careless writer would have said, "Each of us shall count *our* wrinkles," etc., which is not only bad syntax, but also nonsense.

110. Sometimes, on account of haste in writing, an introductory pronoun of one person and number is followed in the same sentence by pronouns of other persons and numbers referring to the same person as the first; also the old and the common form of the second person may be thoughtlessly confused in the same sentence; as, "*Everyone* should be careful to keep *your* own pen"; "Wilt *thou* go with me, or can *you* best succeed alone?"

111. In using pronouns care must be taken to mark the nominative uses by the nominative forms, and the objective uses by the objective forms.

Objective forms may be improperly used for the nominative forms in the following ways:—

(1) In the language of the ignorant or heedless, who employ the objective forms as subjects of verbs expressed; as, "There now, father, you won't work in the garden till it's all easy, and you and *me* can mark out the beds."

(2) In such a sentence as this, "If such as *thee* are noble, then are we vile sinners indeed," the writer forgets that the verb is understood after *thee*, and that *as* is not a preposition. The nominative form should be used to mark the use of the word as subject: "If such as *thou* [art], are noble, then are," etc. The same error often occurs after the conjunction *than*. Example of the correct use: "I think nobody could be happier than *we* [are]."

(3) A common misuse of the nominative forms for the objective is the placing of nominative pronouns as objects of verbs and prepositions; especially when two pronouns of different persons, or a noun and a pronoun, are used

together. The proper way to determine which form of the pronoun is correct is to take each of the words separately, and see if it can stand in the position and express correctly the relation.

In the sentence, "The policeman directed *her* and *I* to the wrong place," it is right to say, "The policeman directed *her*," but we may not say, "directed *I*."

(4) The objective form of the relative and of the interrogative pronoun *who* is sometimes misused for the nominative, and the nominative form for the objective. "He is a boy *whom* I know is careful" should be changed to "He is a boy *who* I know is careful," since *who* is the subject of the verb *is*. "Who do I owe this to?" should be changed to "Whom do I owe this to?" since *whom* is the object of the preposition *to*.

112. To avoid misunderstanding, a relative pronoun should be placed as near as possible to its antecedent. "Wanted, a nurse to take care of a baby who can sew" should be changed to "Wanted, a nurse who can sew, to take care of a baby," since it is the nurse who can sew, not the baby.

113. In order that a subject may be made more striking and emphatic, it is sometimes mentioned and then repeated in the form of a pronoun instead of having its verb just after it in the usual way; as, "Thy *rod* and thy *staff*, they comfort me."

Such repetition of words is called **pleonasm**.

Notice that the purpose is *emphasis*, and the arrangement of words is intentionally made; but when, in speaking, people *carelessly* repeat a subject, the only effect is

that the sentence is slovenly; as, "Napoleon fought well, but Blücher *he* was late."

114. An error of another kind is the omission of pronouns that are necessary to the meaning of the sentence. This occurs often in business letters; in the language of those who imitate this manner of expression in their writing; and sometimes in sentences where the omission causes a different meaning from that intended.

Exercise

Explain the use of italicized words in these sentences:—

1. The committee differed in *their* opinions to-day.
2. The tired child came to *its* mother's arms.
3. The speaker thought that every mechanic, every farmer, every tradesman should give *his* hearty support.
4. Either the judge or the lawyer must acknowledge *his* error.
5. I dislike mathematics because *it* is difficult.
6. The jury gave *its* verdict within an hour.

Sentences for General Exercise

1. They squeezed the heads of some with knotted cords till they pierced their brains, while they threw others into dungeons swarming with serpents and toads.
2. What has the law of Moses done for thee that thou shouldest die for it?
3. This having the rainy months of March and April to water it, sprung up very pleasantly, and yielded a very good crop.
4. Being anxious to discover who and what he really is, and how connected with me, and what are to be the results to him and to myself of the joint interest which seems to be permanently established between us, I have determined to notice a few of his remarkable points.
5. When we feel that another is to share the self-same fortune with ourselves, we judge more severely of our prospects and withhold our confidence.

6. The more we kept in each other's company, the greater co-combs we mutually grew. But neither of us need apprehend any such misfortune now.

7. In its upper stories are apartments where the inhabitants of earth may converse with those of the moon.

8. We will rank together all who have the symptom of dizziness in the brain, and as fast as any drop by the way supply their places with new members.

9. With their sad sisterhood are mingled many youthful maidens who have sickened in aristocratic mansions, and for whose aid science has unavailingly searched its volumes and whom breathless love has watched.

10. We will assign them as partners those lonely laborers and handicraftsmen who have pined as with a dying thirst after the unattainable fountains of knowledge.

11. The remainder, if any, may connect themselves with whatever rank of the procession they shall find best adapted to their tastes and consciences.

12. Thus threatened, the unhappy scarecrow had nothing for it but to puff away for dear life.

13. Let even an affectionate Goliath get himself tied to a small tender thing, dreading to hurt it by pulling, and which of the two, pray, will be master?

14. Can thy gods, whosoever they be, look with wrath on a conflict with such as these?

15. Now, old boy, pray the gods that that victor be neither of the Romans!

16. The fox, who had attended the steps of his fell mistress, uttered a dismal howl.

17. The challengers, rallying each from his pavilion, mounted their horses and descended to the platform.

18. Not for the world would I have sought sympathy from her, or from anybody else.

19. The surgeon who attended me at one time talked of trepanning. This was an awful word; but I now doubt whether anything serious had followed.

20. For what had we come? To see London. And what were the limits within which we proposed to crowd that little feat?

21. Whatever may be the number of those in whom this faculty of dreaming splendidly can be supposed to lurk, there are perhaps not many in whom it is developed.

22. She could turn her hand to anything; of which I will give you two memorable instances.

23. The man certainly did utter the jest; but who it was that he stole it from is another question.

24. What could be done—who was it that could do it—to check the storm-flight of these maniacal horses?

25. Like the fabled opossum we have read of, who, when he spied the unerring gunner from his gum-tree, said, “It’s no use, Major, I will come down,” so S. gave himself up to his pursuers.

26. He confided the command of his various cities to such as had distinguished themselves by valor.

ADJECTIVES

CLASSES OF ADJECTIVES

115. To discover the different classes of adjectives, let us examine the following sentences : —

1. Telemachus was for jumping overboard ; but the *tough old* crew held the *silly, bawling* lad.
2. A *red-headed* calf was observing her with *alarmed* doubt.

The words in italics all modify the nouns that follow them, and all describe, or tell what kind of crew, lad, calf, etc. They are called **descriptive adjectives**.

1. It was a bright autumn Sunday, *sixteen* years after.
2. Throwing on *some* dried leaves, he raised a flame.
3. There were not *many* days that he was not seen riding.

The word *sixteen* mentions an exact, definite number ; *some* and *many* express an indefinite amount or number ; hence such are called **adjectives of quantity**.

1. Mother Rigby took the pipe from her own mouth, and thrust it into the crevice which represented *the same* feature in the pumpkin visage of the scarecrow.
2. She was not familiar enough with *those* monotonous lanes.

In these two sentences are found the same words that were studied as demonstrative pronouns. Since they now modify, they are called **demonstrative adjectives**.

1. He would play with them for *what* stakes they chose to name.
2. *What* objects are the fountains of thy happy strain ?

Some words that were treated of under pronouns may modify nouns. Since such words are usually pronouns, they are called **pronominal adjectives** when they modify.

116. The classes of adjectives, then, are descriptive, quantitative, demonstrative, and pronominal.

Descriptive adjectives tell of what kind an object is, or describe it by telling some of its qualities.

Quantitative adjectives tell either exactly or in a general way how much of a thing is spoken of, or how many persons or things are meant.

Demonstrative adjectives stand before a noun and point out which person or thing is referred to.

Pronominal adjectives are words that, though generally pronouns, stand before nouns and modify them.

117. **Descriptive adjectives** may be either simple words or compounds of several words, or adjectives derived from proper nouns; examples of these are:—

1. There cannot be a *stronger* proof of the degree in which the *human* mind had been misdirected than the history of the two *greatest* events of the *middle* ages.

2. The mere substitution of the *Academic* for the *Peripatetic* philosophy would have done little good.

3. On the *greatest* and *most useful* of all *human* inventions, the invention of *alphabetical* writing, Plato did not look with much complacency.

4. The one was a *slouch-hatted, long-cloaked, sour-faced* fanatic like the rest of you; the other was a *short, sturdy* fellow,—a *black-haired* knave.

Exercise

(a) Tell what noun each descriptive adjective modifies in these sentences.

(b) Write twenty sentences with descriptive adjectives, some modify-

ing the subject, some the predicate nominative, some the direct or indirect object.

118. The following sentences show the various kinds of **numeral adjectives**. These may signify: (1) an exact cardinal number; (2) an indefinite number; (3) persons or things separately:—

1. Not *one* Londoner in *ten thousand* can lay down the rules for the proper use of "shall" and "will." Yet not *one* Londoner in a *million* ever misplaces his "shall" or "will."

2. It has been observed by *many* writers that Socrates was *several* times present when it was being acted.

3. There were none left but *a few* servants and stragglers of the army.

4. One consideration I hope will have *some* weight.

5. They may do so without *any* hindrance to business.

6. The exercise consists in brandishing two short sticks grasped in *each* hand and loaded with lead at *either* end.

7. He entertains his mother *every* night with observations that he makes both in town and in court.

8. When the arguments press equally on both sides in matters that are indifferent to us, the safest method is to give up ourselves to *neither* [side].

Exercise

Copy all the adjectives in italics above, and divide them into three classes.

119. The **demonstrative adjectives** are the same words that were studied as demonstrative pronouns and the ordinal numerals; thus:—

1. In my *third* paper I mentioned some of *these* false wits among the ancients; and in *this* I shall give the reader two or three that flourished in *the same* early ages.

2. Some persons, he said, might accuse him. He desired *such* persons to remember, etc.

3. Now here are two objects : *one* is the protection of the persons and estates of citizens from injury ; *the other* is the propagation of religious truth. *The former* belongs to this life ; *the latter* to *that* which is to come.

Exercise

(a) Tell what noun each demonstrative adjective modifies in these three sentences.

(b) Select five demonstrative adjectives from Section 119, and use these in sentences of your own.

120. Pronominal adjectives may be interrogative, relative, or exclamatory.

Examples of the **interrogative adjectives** are :—

1. Now *which* way could they wend? All was rayless.
2. In the whirl of London life, *what* man sees his neighbor, *what* brother his sister?

The following sentences illustrate the use of the **relative** and the **exclamatory adjective** :—

1. He leaped aside, *which* movement saved him from instant death.
2. *What* fearful shapes and shadows beset his path!

NUMBER AND COMPARISON

121. There are two ways in which certain adjectives change their form to express different meanings ; these inflections are for **number** and **comparison**.

122. The words *this* and *that* (plurals *these* and *those*) are the only adjectives that are inflected for number ; most adjectives modify both singular and plural nouns, but do not change their form to correspond to that of the noun modified.

123. A great many adjectives express quality ; as, " He was *happy* himself, and disposed to make all the world *happy*." In the word *happy*, nothing is implied as to the amount of the quality of joyfulness or happiness.

If it be desired to indicate more of the quality, one may say, " He became *happier* in his old age."

The form *happiest* expresses as high a degree of the quality as can be shown by the form of the adjective ; as, " His *happiest* moments were the busiest."

Comparison is that inflection of an adjective which expresses different degrees of a quality.

124. There are three degrees of comparison, as illustrated above. Degree means step, and the degrees express the amount of quality step by step. They are : —

The **positive** degree, indicating the simple quality ; the **comparative** degree, indicating a greater degree of the quality ; the **superlative** degree, showing the greatest degree of the quality.

125. There are only two inflections for comparison ; *-er* to form the comparative degree, and *-est* to form the superlative. But there are so many words in English which would become harsh and awkward if another syllable were added, that the adverbs *more* and *most* are widely used to denote the two degrees of comparison. The adverbs *less* and *least* are used to denote comparison on a descending scale ; as, *less happy*, *least happy*.

As a general rule, words of one syllable take the endings *-er* and *-est*, as also do words of two syllables that may be smoothly pronounced with these endings ; and all others

express the degrees by means of *more* and *most*. Yet this must not be regarded as a fixed rule: for *more* and *most* may be used before any words, no matter what the number of syllables — in Section 123 it would be just as correct to say *more happy*, *most happy*; it is largely a matter of taste, after all.

126. Many descriptive adjectives have meanings that do not admit of degrees in comparison; for example: —

Present, past, future; preferable, superior, inferior; main, chief, principal; immutable, divine, everlasting; supreme, almighty; universal, complete, round, level, etc.

Exercise

Tell which of the following words are capable of comparison, and use their comparative and superlative forms in sentences: —

Loud, wonderful, fierce, modern, unceasing, daily, predominant, healthy, red, new, unconscious, sharp-tongued, gentle, miniature, handsome, familiar, superficial, moral, shallow, large, perpetual, beautiful.

127. The following adjectives are compared irregularly: —

good or well	better	best
bad, evil, ill	worse	worst
little	less	least
many, much	more	most
old	elder, older	eldest, oldest
near	nearer	nearest, next
far	farther, further	farthest, furthest
late	later	latest, last

Exercise

Write sentences using each of the comparative and each of the superlative forms given in the above table.

PARSING OF ADJECTIVES

128. In parsing adjectives, the pupil should understand that the adjective does not always come just before its noun. When immediately before the noun, it is called **attributive**; as:—

He passed through the streets with a *hasty* step, but a *quick* and *observant* eye.

The adjective has two uses besides the above:—

The **appositive** position, in which the adjective is more loosely connected with the noun and may be taken as completing a verb understood. Examples of this are:—

1. *Quick* and *watchful*, the agile Greek leaped lightly aside [meaning, "The agile Greek, *who was* quick and watchful"].
2. The poor old slave knew not with what arguments to enlighten an ignorance so *dark* and yet so *beautiful* [*"that was* so dark and yet so beautiful"].

The **predicate** position, in which the adjective helps the verb to assert some quality of the subject or the object:—

1. The words grow *chilled* and *trite* if I banish from them allusions to the gods.
2. Who art thou, that callest thyself *greater* in art?

In parsing an adjective, tell:—

- (1) The class and sub-class to which it belongs.
- (2) The degree of comparison, if compared.
- (3) What word or expression it modifies.

Also give the number, if the word has number.

SYNTAX OF ADJECTIVES

129. Care should be used in the placing of all adjective modifiers, especially phrases and clauses.

Sometimes when a writer has in his mind a certain idea which seems clear to him, he puts it into such words as to make an obscure or even a ridiculous statement ; thus : —

1. He dropped his knife in his retreat against the wall, which his rapid antagonist kicked under the table.

2. We have received a basket of oranges from our friend G. B., for which he will please accept our compliments, some of which are nearly six inches in diameter.

In the first sentence, the clause “which . . . table” really modifies *knife*, but is placed so as to modify *wall*. (See Section 112.) The pupil should criticise the second sentence for himself.

130. Few remarks need be made about the agreement of an adjective and its noun in number, since only two adjectives are inflected for number. But an error is often made in the use of a plural adjective with the words *sort* and *kind*; as, “*These* kind of books,” “*Those* sort of trees.”

The user of such expressions thinks of the noun in the phrase following, and not of the one modified by the adjective ; one should say, “*this* kind,” “*these* kinds,” “*that* sort,” etc.

131. When, by the use of the **comparative** degree, an object is compared with different objects *of the same class*, this fact should be indicated by the word *other* before the second term. If this sentence, “Under the administration

of Cromwell, England was more dreaded than any power in Christendom," is taken as it stands, England was not in Christendom or was more dreaded than itself, which is absurd; write rather, "than any *other* power," etc.

The word *other* should not be used when an object is compared with a *different class* of objects; as, "The old knight thought that London Bridge was a greater piece of work than any of the seven wonders of the world."

132. In using the **superlative** degree, *other* should not follow, because the thing compared is always included in the class of objects with which it is compared. The sentence, "England was the most dreaded of all the other powers in Christendom," would be as faulty as the first one in Section 131, from which *other* was omitted.

133. As the comparative and superlative degrees are expressed by the use of *-er*, *-est*, or *more*, *most*, it is never correct to use both together, as "*more bolder*."

Such errors are not likely to occur often, but one scarcely better is sometimes made by pupils and is found now and then in print,—that of using *more* and *most* with words naturally of comparative or superlative meaning; as in the sentences:—

1. He is now the manager of one of the *most leading* printing companies in New York.

2. While my successor may be *more preferable* to the politicians, I am reasonably sure that, etc.

Sentences for General Exercise

1. But the question with respect to them is not where they were, but which way they were going.

2. Listen to me ; I have not myself dabbled in these lesser mysteries, but I know one who hath.

3. Cabinets of gems, each cabinet a gem, filled up the interstices of the columns ; the most precious woods lined the thresholds and composed the doors.

4. I am not that being — cold, insensate, and morose — which I have seemed to be.

5. Thou art full of the romance of thy native Thessaly, and a strange mixture of sense and all conflicting superstitions.

6. In a deep recess, at a little distance, was a covered seat, in which two or three poorer travelers were resting.

7. The first door leads to the staircase ; the second is but a false recess, in which stood a statue of bronze.

8. "Oh! years ago," said she in a voice unlike her usual tones, so plaintive was it, and so soft, "I was not the thing that I am now."

9. This was the first time when the risk that he himself ran by this method of vengeance occurred to a mind ordinarily wary and circumspect.

10. It was only at the outer side of these tables that the guests reclined ; the inner space was left untenanted, for the greater convenience of the waiters.

11. In the far Judea, and in the city of Nain, there dwelt a widow, humble of spirit and sad of heart ; for of all the ties of life one son alone was spared to her.

12. The passion of love in its nature has been thought to resemble fire ; for which reason the words *fire* and *flame* are made use of to signify love.

13. Every reader's memory may supply him with innumerable instances of the same nature.

14. For, high-souled Maid, what sorrow would it be
That Mountain floods should thunder as before,
And Ocean bellow from his rocky shore,
And neither awful Voice be heard by thee!

15. This, he thought, could only be accomplished by means of Cromwell, and the greater part of England was of the same opinion.

16. He is griping and gold-thirsty to a proverb ; the witness of such men is to be bought.

17. My dream was past; it had no further change,
 It was of a strange order, that the doom
 Of these two creatures should be thus traced out.
18. That day and the next were spent in tranquillity.
19. Is it for a brave soldier to inquire from what quarter his enemies are to come?
20. Restless and anxious, the priest consumed the day in wandering through the most sequestered walks.
21. Wherever he goes he pays a visit to whatever prince or gentleman of note resides upon his road.
22. A low murmuring sound, as of stifled voices and clanking chains, now reached me.

ARTICLES

134. In the Introduction it was explained that the word *the* is an adjective, since it always limits the meaning of a noun. This word and *an* (or *a*) are called **articles**. They always modify, and the noun modified is never omitted unless some other adjective follows the article; as, "The *old* way and the *new*." In some grammars, articles are classed as a separate part of speech.

135. *An* or *a* is more like a numeral adjective in its meaning, being a worn-down form of *one*; *the* is nearest to a demonstrative adjective in meaning, being a worn-down form of the demonstrative *that*.

An or *a* is used in speaking of *any* object of a class; as, *an* apple, *a* man, *a* flower; *the* is used in speaking of some *particular* object that has been mentioned, or one that the reader or listener is familiar with; as, *the* apple, *the* man, *the* flower, — some special one.

A good example of their use is the following: —

He saw Silas Marner leaning against *a* stile with *a* heavy bag on his back, instead of resting *the* bag on *the* stile.

After *stile* and *bag* have been introduced by means of *a*, they are spoken of as familiar terms by means of *the*.

The is called the **definite** article; *an* or *a*, the **indefinite**.

136. The form *an* is used before vowel sounds; the form *a* before consonant sounds.

The sound of the first letter of a word must be noticed, for often a consonant is silent and the word begins with a vowel sound; on the other hand, some letters may be vowels or consonants, according to their position, and hence the word may begin seemingly with a vowel, but really with a consonant.

Examples: *a* youth, *a* luxury, *an* eager welcome, *a* humble soul, *an* honor, such *a* one, *a* union.

Exercise. — Write sentences using *an* or *a* before each of the following words: *honorable, orange, humble, harbor, age, church, year, ocean, European, American.*

137. When two or more adjectives, joined by conjunctions, modify the same noun, the article is used before each adjective, provided the noun expressed and that understood refer to different persons or things. For example: —

1. Temple took part in the famous controversy about *the* ancient and *the* modern learning.

2. After hesitating for some time between *a* military and *a* commercial life, he had at length been placed, etc.

Instead of repeating the article before each of two *singular* nouns in such case, one article may be used before the first adjective, followed by the noun in the plural; thus: —

They watched his lips in the hope that he would, at least, let fall some unguarded word, indicating the hopes or fears entertained by *the* English and Dutch *governments*.

138. When two or more nouns, names of different persons or things, are joined by conjunctions, the article is used before each noun, for confusion might arise from the omission of the articles; as, "This hall is a lasting monument to *the* painter and *the* sculptor" [two persons].

Exercise

Tell the difference between these sentences as they stand, and the same with the articles omitted: —

1. God is just in all his dealings with [a] people.
2. I have lost a German and [an] English dictionary.
3. The nation began to find out to what [a] man it had intrusted, without conditions, all its dearest interests, on what [a] man it had lavished its fondest affection.
4. Though a prelate might hold that Paul directed men to obey [a] Nero, it might not be perfectly safe.
5. In every part of the country, the name of [a] courtier had become a by-word of reproach.
6. While Joseph was in jail he interpreted the dream of the butler and [the] baker.

VERBS AND VERBALS

139. Verbs have already been spoken of as asserting words; they tell or declare something of a person or thing, which is called the subject; as:—

1. Four times his horse *had been shot* under him.
2. We *feel* that we *are surrounded* by great men.
3. She *smiled* inwardly, whilst following the lad's narrative, to recognize in his simple tales about his mother, traits of family resemblance.

We find here assertions of action or being made by means of verbs; some simple, some consisting of phrases of two or three words.

A **verb** is a word used as a predicate, to say something about a person or a thing.

140. Besides the word having a subject, in sentence (3), Section 139, there are two others having something of the nature of verbs, — *following* and *to recognize*. Both of these express action, but neither of them has a subject; both merely have the verbal idea without the power of asserting, and to them is given the name, **verbals**.

For the present no full discussion of these words will be given, but this at least may be said: a word ending in *-ing*, *-ed*, *-d*, *-t*, or *-n*, and belonging to some noun or pronoun without describing it, is a verbal called a **participle**; a verbal word having the simple form of a verb, and used as a noun or a modifier, is called an **infinitive**.

Following is a participle, since it ends in *-ing* and belongs to the subject *she* without describing it; *(to) recognize* is an infinitive, because it has the simple form of a verb and modifies *smiled*.

Exercise

Tell whether each of the italicized words below is a verb, a participle, or an infinitive, and give your reason: —

1. He *reached* his destination at length, and *found* no small company *assembled*.
2. Mr. W. *paid* his money, and *was accommodated* with a seat in the gallery *commanding* a perfect view.
3. Lord March, who *was* by no means prodigal of politeness, *seemed to show* singular deference to him.
4. Whilst thus *engaged*, Lord M. *spied* the Virginian.
5. We *had promised to have* our sport together.
6. It was beautiful *to see* our ladies *forgiving* one another, *smiling, joking*, after the hard words of yesterday.
7. He wept genuine tears, *finding* he *could produce* them.
8. The warriors, when the bugle *sang* truce, *fraternized* and *exchanged* tobacco pouches and wine, ready *to seize* their firelocks and *knock* each other's heads off when the truce *was* over.

CLASSES OF VERBS

141. As to their use, verbs are divided into fewer classes than most of the other parts of speech. For one division, examine the verbs in the following sentences: —

1. He *has rescued* two unfortunate people.
2. He *saw* the beef-bone reflected.
3. With each bumper his admiration *grew* stronger.
4. What a shock that seizure *had been*!

In (1), *has rescued* has the object *people*; in (2), *saw* with its complement *reflected* has the object *beef-bone*. These are called **transitive verbs**, from a Latin word, meaning to

go over, since the action is represented as passing over from the subject to some object.

In (3), *grew* expresses action, but is completed by the adjective *stronger* without needing an object; in (4), *had been* is completed by the noun *shock*, yet does not express action, but being, or existence. Verbs of this class are called **intransitive**, since no action passes over.

Exercises

(a) Tell which of the verbs in the preceding exercise are transitive and which are intransitive.

(b) Write three sentences having intransitive verbs followed by predicate nouns, three followed by predicate adjectives; three with transitive verbs followed by direct and indirect objects, three followed by direct object and predicate objective.

142. Often the same verb may be transitive or intransitive, according to its use in the sentence; for example, "The man *sleeps*," "The man *is sleeping* his last sleep;" "The sailor *drowns* in the roaring sea," "The roaring sea *drowns* him;" "Plants *grow* here," "This gardener *grows* fine plants."

143. Again, verbs may be divided into **auxiliary** and **principal** verbs. Our language has not many separate forms to express the various circumstances of action or being, as Latin and Greek have, hence we must use compound forms. These are made up of an auxiliary verb, and a participle or an infinitive of the verb which is to express the kind of action or state.

To illustrate, in the expressions, "Society *has lost* many of its local peculiarities," "Rude as *may be* their minstrelsy," "I *have been awakened* by them," "Music

must be in time," "Its gilded vaults *shall lie* in rubbish," the auxiliaries are *has, may, have been, must, and shall*.

The word auxiliary means helping; the forms of the verbs *be, have, shall, will, may, can, and must* are frequently used in helping to make verb phrases.

144. Principal verbs, or notional verbs, as they are also called, are those that have a meaning and force of their own; they contain the real verb idea, instead of merely helping to give meaning to some other verb.

Of the above list of auxiliary verbs, *be* and *have* may at times be principal verbs; as in the sentences, "He *was*, in truth, an odd mixture," "He *has* a broad, full face."

Exercise

In this paragraph, distinguish transitive verbs from intransitive, and auxiliary from principal verbs:—

The animal he bestrode was a broken-down plow-horse, that had outlived almost everything but his viciousness. He was gaunt and shaggy, with a ewe neck, and a head like a hammer. His rusty mane and tail were tangled and knotted with burs. One eye had lost its pupil, and was glaring and spectral, but the other had the gleam of a genuine devil in it. Still he must have had fire and mettle in his day, if we may judge from his name, which was Gunpowder. He had, in fact, been a favorite steed of his master's, the choleric Van Ripper.

145. Either by inflection or by combination with the auxiliaries, verbs may express the relations of tense, voice, person, number, and mood.

TENSE

146. As there are three divisions of time, the three chief tenses are the present, the past, and the future; for

example, "The boy *stands*," "the boy *stood*," "the boy *will stand*."

Tense is that form of the verb which indicates the time of the action or being.

The verbs *stand* and *stood* show by their form that the action is thought of as being somewhere in present or in past time; *will stand* is a verb phrase made up of an auxiliary and an infinitive, to express action somewhere in future time. In each of the three the action is entirely **indefinite** as to beginning, continuance, or completion in its particular period.

147. If the purpose is to speak of an action as finished with reference to some other time, the **perfect tenses** are used; as, "The boy *has stood* there ten minutes;" "The boy *had stood* there ten minutes when he sat down;" "The boy *will have stood* there much longer before he may sit down."

The first sentence means that the action began in the past and has continued till the *present time*; the second, that the action was completed before some other action taking place in *past time*; the third, that the action is to be completed before another action in *future time*.

Has stood is in the **present perfect** tense; *had stood*, in the **past perfect**; *will have stood*, in the **future perfect**.

148. Not only this idea of action completed with reference to some particular time may be expressed, but a still more exact impression is made by the **definite, or progressive, forms**. Thus, instead of the simple, indefinite forms in Section 146 and the perfect forms in Section 147, one may say, "The boy *is standing, was standing,*

will be standing, has been standing, had been standing, will have been standing."

These express clearly the continuance of the action. It is true, a verb like *stand* has in itself an idea of continuance, yet the forms just given are more vivid and definite than those preceding. If such verbs as *shoot, call, throw, spring, choose*, etc., are used in the definite forms, the effect is still more noticeable.

The definite forms are composed of the verbs *is, was, will be, have been*, etc., and an imperfect participle.

149. To sum up, the forms and phrases of a verb for expressing action in present, past, and future time may be exhibited in the following table :—

PRESENT TIME

<i>Indefinite,</i>	He calls.
<i>Definite,</i>	He is calling.
<i>Perfect,</i>	He has called.
<i>Perfect definite,</i>	He has been calling.

PAST TIME

<i>Indefinite,</i>	He called.
<i>Definite,</i>	He was calling.
<i>Perfect,</i>	He had called.
<i>Perfect definite,</i>	He had been calling.

FUTURE TIME

<i>Indefinite,</i>	He will call.
<i>Definite,</i>	He will be calling.
<i>Perfect,</i>	He will have called.
<i>Perfect definite,</i>	He will have been calling.

Exercise. — As in the above table, write the tense forms of the verbs *begin, blow, come, grow, take* (see Section 169).

150. Usually each tense form represents the time for which it is named, but to the general rule there are some noteworthy exceptions. By special meaning or by connection with other words in the sentence, some tense forms may express action or being in the following ways :—

(1) The present tense may represent past time in vivid narration, the event being pictured as actually going on before the speaker ; as, “ A soft hand *is held* out after this pretty speech, a pair of very well-preserved blue eyes *look* exceedingly friendly. Harry *grasps* his cousin’s hand,” etc.

(2) The present often represents future time, in both independent and dependent clauses ; as, “ He *takes* a trip to New York next month ; ” “ When he *comes* home, please tell him I have called.” This latter use is very common.

(3) The present perfect also may represent future time in a dependent clause ; thus, “ I will not return till he *has come* with some message for me.”

(4) The past tense may represent present time in such sentences as, “ If he *asked* me [now], I *should tell* him ; ” “ If my mother *were* here, I *should endure* the pain better.”

Exercise

(a) Tell in what tense each verb is in the following sentences, and what time each expresses :—

1. I spoke rudely to my friend, and would ask pardon.
2. How far had it gone, was now the question.
3. We feel that we are surrounded by the congregated bones of the great men of past times, who have filled history with their deeds, and earth with their renown.
4. And now they pause, and the soft voices of the choir break out into sweet gushes of melody : they soar aloft and warble along the

roof, and seem to play about these lofty vaults like the pure airs of heaven.

5. The stillness, the desertion and obscurity, that were gradually prevailing around, gave a deeper and more solemn interest to the place.

6. When this book is concluded, I shall change the livery which my books have worn.

7. He always asked everybody to sit and drink, and partake of his best. Had he a crust, he would divide it; had he a haunch, he would share it.

8. Her servant arrived with her tea. If I told you she took a dram with it, you would be shocked.

9. Every one around the table will have heard of it.

10. "Well, if your honor does stay, there is good beef and carrot at two o'clock," says the skeptic, and closes the door on the solitary prisoner.

(b) Mention the transitive and the intransitive verbs in the above sentences.

(c) Mention the auxiliary and the principal verbs in these sentences.

(d) Mention the verbals in these sentences.

VOICE

151. In these two sentences — (1) "The Normans *built* great castles," (2) "Great castles *were built* by the Normans" — exactly the same idea is expressed.

Sentence (1) has as subject the word *Normans*, naming the persons performing an action, and as object the word *castles*, naming that upon which the action was directed. In sentence (2), on the other hand, the word *castles*, which was the object in (1), becomes the subject; and the name of the persons acting is placed as the object of the preposition *by* in a phrase. These sentences serve to show the difference between the **active** and the **passive voice**.

The **active voice** is that form of the verb by which the subject represents the agent or doer of an action. The

passive voice is that form of a transitive verb by which the subject names the person or thing that receives an action.

The agent may not be expressed with the passive voice ;
as : —

The grate had been removed from the wide fireplace.

152. The passive voice is made up entirely of verb phrases, some form of the verb *be* (Section 158) and a perfect participle ; as *were built*, Section 151 (2), and *had been removed* in the sentence above.

The present and past tenses have definite forms ; for example, "Castles *are being built*, or *were being built*." These are specially useful, since the present and past (indefinite) tense forms often do not express action, but state or condition. The sentences, "The house *is built*," "The house *was crowded*," speak of the condition of the house, and really have a predicate verb with participle complement ; but such sentences as, "The house *is being painted*," "The house *was being raised*," express action clearly and definitely.

Exercise

(a) Point out the active and the passive forms, and tell whether each expresses action or condition : —

1. The dinner was served up in the great hall, where the Squire always held his Christmas banquet.
2. As the evening was far advanced, the Squire would not permit us to change our traveling dress.
3. Many of their faces had evidently originated in a Gothic age, and had been merely copied by later generations.
4. I am half inclined to think that the old gentleman was himself somewhat tinctured with superstition.
5. It was the belief that some wrong had been left unredressed by the deceased, or some treasure hidden.

6. The door suddenly flew open, and a train came trooping into the room, that might almost have been mistaken for a breaking-up of the court of Fairy.

7. I also felt an interest in the scene, from the consideration that these fleeting customs were posting fast into oblivion, and that this was perhaps the only family in England in which they were still observed.

8. The gray walls are discolored by damps; the sharp touches of the chisel are gone from the rich tracery.

9. Even this reminder of the olden customs is being swept away by the onward march of trade.

(b) Write ten sentences having active verbs, then change them to passive verbs.

(c) Give the tense of each verb in the nine sentences above.

(d) Tell which verbs are transitive, and which are intransitive in the nine sentences above.

PERSON AND NUMBER

153. Again, the verb is inflected for **person** and **number**; that is, the verb has certain forms to correspond with the person and number of its subject; as, "I *spea*k;" "The man *spea*ks;" "We *spea*k;" "You *spea*k."

If the old form of the personal pronoun of the second person singular is used, the verb has forms answering to this — "thou *speake*st." An old form of the third person singular, as, "He *speake*th," is also sometimes used. But usually the only forms of the verb indicating person and number are in the present tense; the first person singular, "I *spea*k," may be distinguished from the third person singular, "He *spea*ks;" and this last is different from the third person plural; as, "They *spea*k;" "Men so *spea*k."

These few forms are, however, very important in questions of correct usage; hence, the rule is given as a general one that verbs agree with their subjects in person and number.

When the subject is a relative pronoun, the antecedent must determine the person and number.

Exercise

(a) Give the person and number of each verb : —

1. He counted the moments as they passed, and beheld that his last sands were falling.

2. Their acquirements, doubtless, were different, and so were the objects of their literary pursuits.

3. We see before us a probable train of great events.

4. Night fell as we were walking, and the clouds, which had broken up in the afternoon, settled in and thickened.

5. I saw he was speaking, but the roaring of the falls and the trouble of my mind prevented me from hearing.

6. Every man looked as if a great estate had been left him.

7. He told his friends, with smiling resignation, that they ought to admire his philosophy.

8. If you would repose without disturbance, I would advise that you commend yourselves, during the watches of the night, to Him unto whom night is even as midday.

(b) Write sentences having : (1) the verb *call* in the second person singular, present tense, definite, passive ; (2) the verb *break* in the third person singular, present perfect tense active, with subject relative pronoun ; (3) the verb *spend*, third person plural, past perfect tense passive ; (4) the verb *find*, first person plural, past tense active ; (5) the verb *write*, third person singular, future tense passive.

MOOD

154. One other inflection remains to be spoken of, that of **mood**. The term is from a Latin word meaning manner, or way. As here used, mood indicates the way in which action or being is thought of — whether as an actual fact, or something commanded, or something merely supposed to happen under doubtful or impossible circumstances.

There are three moods: the **indicative**, the **imperative**, and the **subjunctive**.

155. The commonest of the moods is the **indicative mood** which expresses action or being as an actual fact. The expression of the fact may be in several ways: —

(1) A simple assertion; thus, “As I *passed* to my room, I *heard* the sound of music in a small court.”

(2) A question; as, “To what purpose *is* all this?”

The indicative mood uses all the tense forms given in Section 149, and all the persons and numbers.

Exercise. — Write ten sentences — six statements and four questions — each having a verb in the indicative mood.

156. The **imperative mood** expresses a command, an entreaty, or a request; as, “*Send* it to the public halls; *proclaim* it there; *let* them see it.” “*Give* me thy hand, *let* me wipe the dew from thy brow.”

As a command, request, or entreaty is addressed *to* a person, the subject of an imperative verb is regularly of the second person, and so is the verb. In ordinary speech, the subject is not expressed; see examples above.

If a negative command is to be expressed, a verb phrase made up of the verb *do* and an infinitive is used with *not*; as, “*Do not go.*” In poetic or solemn style, however, *do* is not used; as, “*Tell* me not in mournful numbers;” “*Lead* us not into temptation.”

To take the place of an imperative verb of the first person plural or the third person, a verb phrase consisting of *let* and an infinitive is used: “*Let* us *hear* with delight;” “They have Moses and the prophets; *let* them *hear* them.”

These last must not be regarded as true imperatives of the first or the third person ; grammatically, the verb *let* is an imperative verb of the second person in each instance, with the subject *you* or *thou* understood.

Imperative verbs are used only in the present tense and the second person, singular and plural.

Exercise. — Write ten sentences, each having a verb in the imperative mood.

157. The **subjunctive mood** does not state a fact ; it regards the action or being as something merely conceived or imagined ; thus : (1) "I almost desired that the whole of life *might be spent* in that visionary scene." (2) "*Had* the engine *run* off the track, the bottomless pit, if there *be* such a place, *would* undoubtedly *have received* us."

In the first sentence, the verb *might be spent* is used to express a wish — a thing merely thought of, and not a fact, else no one would wish for it. (The verb *desired* is in the indicative mood, merely stating a fact.)

In the second sentence, the expression, "*had* the engine *run* off the track" — that is, *if* the engine *had run* off the track — clearly implies that the engine did *not* run off the track, hence the action is merely imagined to happen. And since this is true, the conclusion, "the bottomless pit *would* undoubtedly *have received* us," cannot express a fact, but what is merely conceived to follow an action that we have seen is itself not a fact.

Further, the clause, "if there *be* such a place," does not declare a fact, but doubt as to the existence of a certain place ; here again the idea of action or being is only conceived in the mind.

The subjunctive mood includes the present, past, present perfect, and past perfect tenses, with all persons and both numbers.

Exercise. — On page 135, find the sentences containing examples of the wish or mere supposition, and point out all the verbs that are in the subjunctive mood.

158. In some cases the verbs of the subjunctive mood have the same form as those of the indicative, and the mood must be determined by the nature of the sentence. But some of the forms are unlike those of the indicative mood, as may be seen by a comparison in the following tables: —

Verb *be*, indicative and subjunctive.

PRESENT TENSE	
INDICATIVE	SUBJUNCTIVE
<i>Singular</i>	<i>Singular</i>
1. I am	1. [If] I be
2. You are (Thou art)	2. You be (Thou be)
3. He is	3. He be
<i>Plural</i>	<i>Plural</i>
1. We are	1. We be
2. You, ye are	2. You, ye be
3. They are	3. They be
PAST TENSE	
<i>Singular</i>	<i>Singular</i>
1. I was	1. [If] I were
2. You were (Thou wast)	2. You were (Thou were) [wert]
3. He was	3. He were
<i>Plural</i>	<i>Plural</i>
1. We were, etc.	1. We were, etc.

PRESENT PERFECT TENSE

<i>Singular</i>	<i>Singular</i>
1. I have been	1. [If] I have been
2. You have been (Thou hast been)	2. You have been (Thou have been)
3. He has been	3. He have been
<i>Plural</i>	<i>Plural</i>
1. We have been, etc.	1. We have been, etc.

PAST PERFECT TENSE

<i>Singular</i>	<i>Singular</i>
1. I had been, etc.	1. [If] I had been, etc.

NOTE. — *If* is used in this table for convenience as a word introducing the subjunctive in a dependent clause; but this is not to imply that *if* is the only word so used, or that *if* is always accompanied by the subjunctive mood.

As an exercise, the student should mention the points of difference between the indicative and subjunctive forms above.

159. Verb *choose*, indicative and subjunctive.

PRESENT TENSE

<i>Singular</i>	<i>Singular</i>
1. I choose	1. [If] I choose
2. You choose (Thou choosest)	2. You choose (Thou choose)
3. He chooses	3. He choose
<i>Plural</i>	<i>Plural</i>
1. We choose, etc.	1. We choose, etc.

PAST TENSE

<i>Singular</i>	<i>Singular</i>
1. I chose	1. [If] I chose
2. You chose (Thou cholest)	2. You chose (Thou chose)
3. He chose	3. He chose
<i>Plural</i>	<i>Plural</i>
1. We chose, etc.	1. We chose, etc.

PRESENT PERFECT TENSE

Singular

1. I have chosen
2. You have chosen
(Thou hast chosen)
3. He has chosen, etc.

Singular

1. [If] I have chosen
2. You have chosen
(Thou have chosen)
3. He have chosen, etc.

PAST PERFECT TENSE

Singular

1. I had chosen, etc.

Singular

1. [If] I had chosen, etc.

160. The differences between the definite forms of the indicative and subjunctive may readily be seen by placing the imperfect participle of any verb after the forms of *be*, in Section 158; as, "He *is choosing*, [if] he *be choosing*; he *was choosing*, [if] he *were choosing*," etc.

161. The common uses of the subjunctive mood, then, are:—

(1) To express a wish, the subjunctive verb being in the principal clause; thus:—

1. Peace *be* with the heroes.
2. The foul fiend *take* the curfew bell!

This is often expressed by a verb phrase with *may*; thus:—

May all the stars *hang* bright above thy dwelling.

(2) To express a wish, the subjunctive verb being in the dependent clause, which is the object of the verb *wish*, or one of similar meaning; for example:—

1. O mother dear, that thou *wert* here!
2. "I would," said Geraldine, "she *were*!"

(3) To express a condition contrary to fact, the verb in the condition itself and that in the conclusion (main clause) both being in the subjunctive mood (Section 157); thus:—

If these wretches *were* princes, there *would be* thousands ready to offer their ministry.

The subjunctive in the conclusion is usually made up of a verb phrase having the words *should, would, could, might*, and an infinitive. Other examples of it are:—

1. I *should have taken* the poet for a very sagacious farmer of the old Scotch school [if I had not known him].

2. He *would have thanked* any one who had befriended him [= if he had befriended him].

Exercise.—Write nine sentences showing the uses of the subjunctive mood, three sentences for each use.

162. Since the subjunctive forms are often the same as the indicative, the student should always take special care to notice the *use* of the verb as well as the form. In many languages the subjunctive mood has many distinct forms, and to understand its uses will be valuable.

In the condition contrary to fact, the introductory *if* is often omitted, but the subjunctive use of the verb is readily seen; as:—

1. *Were* I to breathe it long, methinks it would make me ill.

2. *Had* he *been* a little richer, almost ever so little, the whole might have been otherwise.

Exercise

(a) Give first the use, then the mood of each verb in the following sentences:—

1. The Indian immediately started back, whilst the lion rose with a spring and leaped toward him.

2. The vicious man and the atheist have therefore no pretense, and would act unreasonably should they endeavor after it.

3. Think not man was made in vain, who has such an eternity reserved for him.

4. If the work performed was small, we must remember that he had his very materials to discover.

5. We had already stated our doubts whether direct pecuniary help, had it been offered, would have been accepted, or could have proved very effectual.

6. "Then God bless you," said Faith with the pink ribbons, "and may you find all well when you come!"

7. If he drudges, it is with his brothers, and for his father and mother, whom he loves.

8. Thine was a dangerous gift, when thou wast born—

 The gift of Beauty. Would thou hadst it not;

 Or wert as once, awing the caitiffs vile

 That now beset thee!

9. If he entered an inn at midnight, after all the inmates were in bed, the news of his arrival circulated from the cellar to the garret.

10. Oh! raise us up, return to us again;

 And give us manners, virtue, freedom, power.

11. It seems almost as if we were treading a mansion of that fabled city, where every being had been suddenly transmuted into stone.

12. The wedge will rend rocks, but its edge must be sharp and single; if it be double, the wedge is bruised in pieces and will rend nothing.

13. In the silent afternoons, if I listened, the thump of a great apple was audible.

14. If the mighty merchant whose benefactions are reckoned by thousands of dollars deem himself worthy, let him join the procession.

15. It would fill a volume in an age of pamphlets were I to record all my observations.

16. Many a time shall I disturb them there, and feel as if I had intruded among a company of silent worshipers, as they sit in Sabbath stillness among the tree-tops.

(b) Write six sentences using the indicative mood, six using the subjunctive, four using the imperative.

CONJUGATION

163. Conjugation is from a Latin word meaning joining together, and in Latin grammar refers to the adding of various endings to a verb-root, or stem.

In English, conjugation is the orderly arrangement of all the forms and auxiliaries that combine to express the various circumstances of action or being.

The verb *be* has a larger number of distinct forms than any other verb, since its forms include several different root words; as, *been, are, were*.

Most of the other verbs have only four or five distinct forms in common use; for example, the forms of the verb *talk* are *talk, talks, talking, talked*; of the verb *speak*, are *speak, speaks, spoke, speaking, spoken*. Besides these the old forms are sometimes used; as, *talkest, talketh, talkedst*.

164. Conjugation of the verb *be*.

Four tenses of the indicative mood and all of the subjunctive have been given (pages 109-111); the other forms and phrases are:—

INDICATIVE MOOD

FUTURE TENSE

<i>Singular</i>	<i>Plural</i>
1. I shall be	1. We shall be
2. You will be (Thou wilt be)	2. You, ye will be
3. He will be	3. They will be

FUTURE PERFECT TENSE

<i>Singular</i>	<i>Plural</i>
1. I shall have been	1. We shall have been
2. You will have been (Thou wilt have been)	2. You, ye will have been
3. He will have been	3. They will have been

IMPERATIVE MOOD

PRESENT TENSE

Singular
Be [you or thou]

Plural
Be [you or ye]

165. Synopsis of the verb *speak*.

A **synopsis** of a verb is the orderly arrangement of the different moods and tenses in only one person and number.

The third person singular will be used here, and the imperative mood will be added.

ACTIVE VOICE

INDICATIVE MOOD

<i>Present,</i>	He speaks.
<i>Present definite,</i>	He is speaking.
<i>Past,</i>	He spoke.
<i>Past definite,</i>	He was speaking.
<i>Future,</i>	He will speak.
<i>Future definite,</i>	He will be speaking.
<i>Present perfect,</i>	He has spoken.
<i>Present perfect definite,</i>	He has been speaking.
<i>Past perfect,</i>	He had spoken.
<i>Past perfect definite,</i>	He had been speaking.
<i>Future perfect,</i>	He will have spoken.
<i>Future perfect definite,</i>	He will have been speaking.

SUBJUNCTIVE MOOD

<i>Present,</i> [If, though, etc.]	He speak.
<i>Present definite,</i>	He be speaking.
<i>Past,</i>	He spoke.
<i>Past definite,</i>	He were speaking.
<i>Present perfect,</i>	He have spoken.
<i>Present perfect definite,</i>	He have been speaking.
<i>Past perfect,</i>	He had spoken.
<i>Past perfect definite,</i>	He had been speaking.

IMPERATIVE MOOD

<i>Present,</i>	Speak. (2d person.)
<i>Present definite,</i>	Be speaking.

PASSIVE VOICE

INDICATIVE MOOD

<i>Present,</i>	It is spoken.
<i>Present definite,</i>	It is being spoken.
<i>Past,</i>	It was spoken.
<i>Past definite,</i>	It was being spoken.
<i>Future,</i>	It will be spoken.
<i>Present perfect,</i>	It has been spoken.
<i>Past perfect,</i>	It had been spoken.
<i>Future perfect,</i>	It will have been spoken.

SUBJUNCTIVE MOOD

<i>Present, [If, though, etc.]</i>	It be spoken.
<i>Past,</i>	It were spoken.
<i>Past definite,</i>	It were being spoken.
<i>Present perfect,</i>	It have been spoken.
<i>Past perfect,</i>	It had been spoken.

IMPERATIVE MOOD

On account of its meaning, *speak* has no passive imperative. Of other transitive verbs, the forms are : —

<i>Present</i> (2d person),	Be seen, be smitten, etc.
-----------------------------	---------------------------

166. The subject *he* or *it* is merely representative ; any singular subject of the verb may be used instead.

In the present and past tenses active, a verb phrase consisting of *do* and the infinitive of any verb is used for emphasis, and these are called **emphatic forms** ; as, “*I do speak* clearly ;” “*I did speak* harshly.”

In poetry, *do* and *did* are often merely substitutes for the simple forms, and are not emphatic; as, "In our life alone *does* nature *live*;" "The ice *did split* with a thunder-fit."

The use of *do* in the imperative has been mentioned.

The **negative forms** of the present and past tenses active, indicative, are made up of *do* and *did* with *not*; as, "He *does not speak* well;" "They *did not speak* cordially."

To ask questions, *do* and *did* are used in the same tenses, inverting the order, and are often called **interrogative forms**; as, "*Do you know* him?" "*Did we intrude*?" In other tenses the forms remain the same, and only the order is changed; as, "And *will* your mother *pity* me?"

By combining the emphatic and interrogative forms with the negatives, we may form other phrases, such as, "I did not walk;" "Did they not walk with you?"

These remarks serve to show how numerous and how useful verb phrases are in English, for indicating the different shades of meaning and circumstances of action.

STRONG AND WEAK VERBS

167. As to the forms of the words, verbs are divided into **strong** and **weak** (or **old** and **new** conjugation).

Strong verbs are those that change the vowel, but do not add an ending, in forming the past tense; thus, *choose*, *chose*; *blow*, *blew*; *fling*, *flung*.

Weak verbs are those that add an ending *-d*, *-ed*, or *-t* to the simple or root form of the verb in forming the past tense; as, *flee*, *fled*; *tan*, *tanned*; *buy*, *bought*.

Weak verbs *may* change the root vowel to form the past

tense; but they add an ending to the root form, which strong verbs never do.

NOTE.—Weak verbs also include some words that neither change the vowel nor add an ending: *as, set, set; cast, cast; cost, cost; put, put*. Also some that drop *-d* for *-t*: *as, send, sent; build, built*.

168. A general description of any verb is usually given by means of the **principal parts**; that is, the forms used as a basis in making up the conjugation of the verb. They are the simple infinitive, the past tense, and the perfect participle; for example:—

Blow, blew, blown; come, came, come; buy, bought, bought; watch, watched, watched.

List of Strong Verbs

169. The following table includes most of the strong verbs of our language:—

NOTE.—Weak forms of these are placed in parentheses.

<i>Present.</i>	<i>Past.</i>	<i>Perf. Part.</i>	<i>Present.</i>	<i>Past.</i>	<i>Perf. Part.</i>
abide	abode	abode	break	broke	broken
arise	arose	arisen	chide	chid	chidden,
awake	awoke	awoke			chid
	(awaked)	(awaked)	choose	chose	chosen
bear	bore	borne	cleave	clove, cleave	cloven
		born		(cleft)	(cleft)
begin	began	begun	cling	clung	clung
behold	beheld	beheld	come	came	come
bid	bade	bidden	crow	crew	
		bid		(crowed)	(crowed)
bind	bound	bound	dig	dug	dug
bite	bit	bitten,	do	did	done
		bit	draw	drew	drawn
blow	blew	blown	drink	drank	drunk

<i>Present.</i>	<i>Past.</i>	<i>Perf. Part.</i>	<i>Present.</i>	<i>Past.</i>	<i>Perf. Part.</i>
drive	drove	driven	slide	slid	slidden
eat	ate, eat	eaten	sling	slung	slung
fall	fell	fallen	slink	slunk	slunk
fight	fought	fought	smite	smote	smitten
find	found	found	speak	spoke	spoken
fling	flung	flung	spin	spun	spun
fly	flew	flown	spit	spat, spit	spat
forbear	forbore	forborne	spring	sprang,	þprung
forget	forgot	forgotten		sprung	
forsake	forsook	forsaken	stand	stood	stood
freeze	froze	frozen	steal	stole	stolen
get	got	got [gotten]	stick	stuck	stuck
give	gave	given	sting	stung	stung
go	went	gone	stride	strode	stridden
grind	ground	ground	strike	struck	struck,
grow	grew	grown			stricken
hang	hung	hung	string	strung	strung
	(hanged)	(hanged)	strive	strove	striven
hold	held	held	swear	swore	sworn
know	knew	known	swim	swam,	swum
lie	lay	lain		swum	
ride	rode	ridden	swing	swung	swung
ring	rang	rung	take	took	taken
run	ran	run	tear	tore	torn
see	saw	seen	thrive	throve	thriven
shake	shook	shaken		(thrived)	(thrived)
shear	shore	shorn	throw	threw	thrown
	(sheared)	(sheared)	tread	trod	trodden,
shine	shone	shone			trod
shrink	shrank,	shrunk	wear	wore	worn
	shrunk		weave	wove	woven
sing	sang	sung	win	won	won
sink	sank (sunk)	sunk	wind	wound ^y	wound
sit	sat	sat	wring	wrung	wrung
slay	slew	slain	write	wrote	written

The perfect participle *got* is preferable to the form *gotten*, which is not now used in the best English writing; but *forgotten* is the correct participle of the verb *forget*.

The verb *hang* has two forms with different meanings in the past tense and past participle; *hanged* regularly refers to execution of persons by hanging, while *hung* means suspended, in speaking of other matters.

Irregular Weak Verbs

170. There are many weak verbs which do not add *-ed* to the root form, and these are called **irregular weak verbs**.

A few of the various kinds are given below : —

bring	brought	brought	catch	caught	caught
buy	bought	bought	seek	sought	sought
sell	sold	sold	tell	told	told
feel	felt	felt	lose	lost	lost
keep	kept	kept	shoe	shod	shod
bend	bended, bent	bended, bent	lean	leaned, leant	leaned, leant
build	buildied, built	buildied, built	work	worked, wrought	worked, wrought
have	had	had	make	made	made
lay	laid	laid	say	said	said
cast	cast	cast	put	put	put
cost	cost	cost	set	set	set

171. The perfect participle may be used alone as a verbal, as explained more fully in Sections 180 and 181; but it is put down in the above lists because it is used in so many verb phrases. The principal uses are as follows : —

(1) After the auxiliaries *have*, *had*, and *shall have* to form the perfect tenses active.

(2) After the forms of the verb *be* to form the various passive phrases.

Errors are often caused by careless or ignorant confusion of past tense and perfect participle forms; as, He *done*, for he *did*; we *seen*, for we *saw*; you *had took*, for you *had taken*; they *come*, for they *came*.

172. Two groups of verbs need special attention because they are so often misused: *lie* and *lay*, *sit* and *set*.

They are sharply different in meaning, but the slight similarity in form causes much confusion in the use of the words. The principal parts are here repeated, the imperfect participle being added for further distinction:—

lie	lay	lying	lain
lay	laid	laying	laid
sit	sat	sitting	sat
set	set	setting	set

Lie is an intransitive verb, and means to rest one's self, to recline; *lay* is transitive, and means to place or put in some position; as, "The dog *lies* at the door;" "The box *was laid* on the deck." (This verb *lie* is not to be confused with *lie*, to falsify.)

Sit is an intransitive verb, and means to rest on a seat of any kind; *set* is transitive when it means to place down an object. *Set* also has two meanings as an intransitive verb: to sink down or become fixed, as, "The sun *sets*;" "His eyes *set* in his head;" and to express various motions, as, "to *set out*," "to *set up* in business," etc.

may	might	will	would
can	could	must	_____
shall	should	ought	_____

174. All these are used with infinitives to form verb phrases. Some examples of such phrases are :—

	<i>Simple Infinitive</i>	<i>Perfect Infinitive</i>
<i>May</i>	write, be writing,	have written, have been writing
<i>Can</i>	write, be writing,	have written, have been writing
<i>Might</i>	write, be writing,	have written, have been writing
<i>Should</i>	write, be writing,	have written, have been writing
<i>Would</i>	write, be writing,	have been written, have been writing
<i>Ought</i>	to be written,	to have been written

And so on with the other words in Section 173.

NOTE.—As in the case of other verb phrases, the tense of a defective-verb phrase is determined by both of its parts; for example, *might be writing* consists of the past tense verb *might* and a simple infinitive, hence the phrase is in the past tense; *might have written* consists of a past tense verb and the perfect infinitive *have written*, hence the phrase is in the past perfect tense.

All except *ought* take the pure infinitive without *to*.

Since they are devoid of person and number forms, the mood of defective verbs must be determined from the manner of their use in the sentence.

Exercise.—Write sentences using six such phrases as the above in the indicative mood, and four in the subjunctive.

175. The regular auxiliaries to indicate future time are : *shall* with the **first person**, and *will* with the **second** and **third persons**, singular and plural.

I <i>shall</i> write	We <i>shall</i> write
You <i>will</i> write	You <i>will</i> write
He <i>will</i> write	They <i>will</i> write

Exercise

(a) Tell what use *shall*, *will*, *should*, and *would* have in the following sentences : —

1. Shouldn't you like to be present at a scalping match, and see a fellow skinned alive?

2. He would carry a fowling piece on his shoulder for hours together, trudging through woods and swamps.

3. She says that the death of every bird which is killed in her ground will spoil a concert, and that she shall certainly miss him the next year.

4. Tell him that we yield to his rapacity, as in similar circumstances we should to that of a robber.

5. Everything about the place went wrong, and would go wrong, in spite of him.

6. Why, you wouldn't like to keep the child, should you — an old bachelor like you?

7. The royal blood of our Saxon kings shall not be spilt while mine beats in my veins; nor shall one hair fall from the head of the kind knave who risked himself for his master.

8. I trust I shall remember the password.

9. Say what we did was imprudent. Would we not do it over again?

10. On the last day of his life General Wolfe said he would rather have written Gray's *Elegy* than have won a battle.

11. He set off with the thought that he should be able to dress up and magnify to the admiration of a select circle.

12. There was something in front of the fire that would have been tempting to a hungry man.

(b) Explain the difference between the following sentences as they stand, and the same with the other auxiliary substituted : —

1. Will [shall] he be allowed to join the club?

2. You shall [will] not enter the house again.

3. We should [would] not meet this man again if we remained here all day long.

4. My opponent declared that he should [would] know the name of the man who hissed him.

5. I shall [will] go; nobody will [shall] hinder me.

VERBALS

178. A **verbal** is a word that in a general way expresses action or being, but does not assert, and cannot be used as a predicate.

In the following pages the purpose is mainly to study such words separately, as verbals, and not in composition, as parts of asserting phrases.

There are three kinds of verbals: **participles**, **infinitives**, and **gerunds**.

179. A **participle** is an adjective verbal, which regularly belongs to a noun or to an equivalent of a noun without describing it.

The forms are familiar to the pupil, since so many of the simple participles were seen in verb phrases; such as, *walking, walked, bought, driven, held, seen*.

180. The simple participles and the phrases are:—

ACTIVE VOICE

Imperfect, Writing

Perfect, Having written

Perfect definite, Having been writing

PASSIVE VOICE

Imperf., Being written

Perf., Written, having been written

The form *written*, when used alone as a verbal, is always perfect and passive; when used in verb phrases, it may be active or passive (Section 171).

Exercise.—Write sentences using all the participles in the above table.

181. Participles have no exact tense. The time expressed by the **imperfect** participle depends on the tense

of the accompanying verb; as, "He comes, *bringing* good news" (present). "He came, *bringing* good news" (past). "He will yet come, *bringing* good news" (future).

The **perfect** participle has in it a vague idea of past time and of completed action; as, "*Having obeyed* the order, the officer came [comes, had come, etc.] back to report."

Exercise

(a) Write the participles of the verbs *bring*, *begin*, *set*, *sit*, *lie*, *lay*, *fall*, *see*, *build*.

(b) Tell which of the italicized words below are participles and which are adjectives, also whether each is in the attributive, appositive, or predicate position (Section 128).

1. A little *gurgling* sound ascended to the window.
2. The man's demeanor was that of one *walking* under some malignant influence.
3. Soon there emerged from under a *sculptured* portal the figure of a young girl *arrayed* with much taste.
4. His patients are *interesting* to him only as subjects for some new experiment.
5. By the *shattered* fountain grew the magnificent shrub, with purple gems *clustering* all over it.
6. *Having satisfied* his curiosity by this investigation, he looked for the object of his resentment, whom he observed *standing* on the same spot, with the same *composed* countenance which he had exhibited upon the *preceding* day.
7. The general came in out of breath, *having been riding* hard in pursuit of some deer.
8. The gage *having been delivered* to the noble knight, he was appointed to do this battle.

(c) Write sentences having the participles *interesting*, *entertaining*, *terrifying*, and *forsaken* in the attributive, the appositive, and the predicate use.

182. An **infinitive** is a verbal having the simple or root form of a verb, and is used as a noun or as a modifier of some word in the sentence.

Besides the simple infinitive, there are phrases used as single verbals, just as in the case of participles; but these infinitive phrases are always introduced by the root form of the verb. For example, in the sentence, "Stone seems *to have been robbed* of its weight and density," *have* is the simple form of the verb, though it is completed by the participles *been* and *robbed* in forming the compound infinitive.

183. The remarks as to the tense of participles apply to all the verbals; all derive their tense from that expressed by the verb used in connection with them.

The infinitive forms and phrases are:—

ACTIVE VOICE

<i>Simple,</i>	[To] write
<i>Imperfect,</i>	[To] be writing
<i>Perfect,</i>	[To] have written
<i>Perfect definite,</i>	[To] have been writing

PASSIVE VOICE

<i>Simple,</i>	[To] be written
<i>Perfect,</i>	[To] have been written

Exercise.—Write sentences using all the infinitives in this Section.

184. The word *to* is not a necessary part of the infinitive, though it is called the infinitive sign because it often introduces the infinitive; hence it is printed in brackets in Section 183.

The *to* is omitted: (1) in verb phrases with all the de-

factive verbs except *ought*; (2) after the object of such verbs as *let*, *feel*, *hear*, *see*, and usually *make* and *bid* (order); (3) often after *please*, *need*, and *dare*.

Examples

1. The twilight would of itself *have rendered* a disguise unnecessary. These peasants should *be restrained*.

2. Let it not *be objected* that he did little. He had seen George *go* to the front.

3. You need not *be surprised*. The villain dared not *attack* me.

185. The main uses of infinitives are as follows:—

(1) The **noun uses**, which are:—

(a) As subject, object, etc.; as:—

(Subject) *To try* by the strict rules of art would be unfair.

(Object) The chaplain had been hoping *to remain* there.

(b) As complement of an intransitive or a transitive verb; as:—

1. His mission was *to enlighten* the whole people.

2. The young gentleman had been allowed *to have* his own way.

(2) The **adjective use**, in modifying some noun; as:—

I found no ravenous beasts *to threaten* my life.

(3) The **adverbial uses**: (a) to modify some adjective or adverb; as:—

1. I was afraid *to lie* down on the ground, not knowing but some wild beast might devour me.

2. I killed a large bird that was good *to eat*.

(b) To modify a verb, and express the purpose or the result of an action; as:—

(Purpose) I punish you now *to guard* you from greater punishment hereafter.

(Result) I also wheeled around, but only *to see* the treacherous sands gathering above her head.

Exercise

(a) Write the infinitives of the verbs *draw, see, learn, be, think, prove, lose, give*.

(b) Classify the infinitives in the following sentences, and tell which use each has : —

1. To be a tutor to such a pupil is absurd.
2. The boys' friend warned the lad to be prudent.
3. Other servants darkened the porch windows with their crisp heads to hear him discourse.
4. She knew not from which she would like to part.
5. I am not a man to be moved by a woman's tears.
6. Let me endure the extremity of your anger.
7. He is likely to raise a clamor loud enough to be heard over twenty horns and trumpets.
8. I will keep my word to share weal or woe with thee.
9. To have saved you is a sufficient reward.
10. If you were to bid me jump out of yonder window, I should do it.
11. She happened to be going to see an old pauper.
12. His lordship appeared to have been waiting for some one to bring just such news.

(c) Write nine sentences illustrating the uses of the infinitives as shown in Section 185.

186. The **gerund** is a verbal which has the form of a participle, but the use of a noun.

It is to be distinguished, however, from the participle and the noun ; the participle never has the use of a noun, and a noun is never a verbal, since a mere naming word cannot have the power of governing.

The noun has only the *-ing* form, while the gerund has five forms like the participle, which are : —

ACTIVE VOICE

Imperfect, Writing

Perfect, Having written

Perfect definite, Having been writing

PASSIVE VOICE

Imperfect, Being written

Perfect, Having been written

187. The uses of the gerund are here illustrated:—

(I) As subject :—

Madame B. asked her if *sitting* backwards in the carriage made her ill.

(2) **As object of a verb or a preposition ; as :—**

1. The Squire preferred *talking* loudly, *scattering* snuff, and *patting* his visitors' backs.

2. The Earl had a way of *understanding* things without *speaking*.

(3) As an object while governing an object:—

It is seldom that the miserable can help *regarding* their misery as a wrong inflicted by those who are less miserable.

Exercise. — Write sentences using the five gerunds of the verb *write*; also those of the verbs *break*, *ride*, and *seek*.

188. There are numbers of words ending in *-ing* which not only cannot govern, but which are not even the names of actions ; they are only common or abstract nouns, as in these sentences :—

1. He turned and looked around his *dwelling*.

2. She had high veracity, delicate honor in her *dealings*.

3. I think those have the least *feeling* who act wrong.

4. This time of the year is considered most suitable for a *wedding*.

5. A *blessing* is flung abroad.

Exercise

(a) Mention the gerunds in the following sentences, and tell which use each one has :—

1. Perhaps it would be just as happy in life without being owned by its father.
2. He was noted for preferring vicious animals.
3. The legs were crossed, in token of the warrior's having been engaged in the holy war.
4. Drinking toasts seems a point of honor with them.
5. He was the singing master, and picked up many bright shillings by instructing the young folks.
6. I want to make up with you for having been exceedingly rude to everybody this morning.
7. I remember in this very room, so coaxing my father and mother and your grandfather.
8. The mere starting of a nail, the yawning of a seam, might give him entrance.

(b) Write sentences using gerunds as follows : three sentences with gerunds used as subjects and followed by objects ; the same modified by adverbs ; three sentences with gerunds as objects of prepositions and completed by objects ; three sentences with gerunds as objects of verbs and modified by adverbs.

189. There have now been distinguished four kinds of words ending in *-ing*, namely :—

- (1) **Nouns**, merely naming an object or a quality.
- (2) **Adjectives**, describing something named by a noun.
- (3) **Participles**, referring to nouns or pronouns, but not directly modifying their meaning, or describing.
- (4) **Gerunds**, expressing action, having the power of governing, but used like nouns in the sentence.

Exercise

(a) Tell what office each *-ing* word has in these sentences, and what part of speech it is :—

1. She was in the habit of speaking of and to him with a protecting air, which was infinitely diverting.

2. Here was a type of the beginning and the end of human pomp and power.
3. He was knowing enough with all his blushing cheeks.
4. The food would have been inviting to a hungry man if it had been in a different stage of cooking.
5. The pork had been hung so as to prevent the roasting from proceeding too rapidly.
6. He opened the door wide to admit Dolly, but without otherwise returning her greeting than by moving the armchair a few inches.
7. How easy it is for one benevolent being to diffuse pleasure all around him!
8. All bears marks of the gradual dilapidations of lime, which has something pleasing in its very decay.
9. A marble figure of Mary is stretched upon the tomb, round which is an iron railing.
10. Certain of the most authentic historians of these parts, who have been careful in collecting and collating the floating facts concerning the specter, allege that, the body of the trooper having been buried in the churchyard, the ghost rides forth to the scene of battle in nightly quest of his head; and that the rushing speed with which he sometimes passes along the hollow, is owing to his being belated.
11. Entering the Court of the Lions, I was almost startled at beholding a turbaned Moor seated near the fountain.

(b) Write sentences using each of the following words in as many of the four ways as you can : *packing, understanding, painting, entertaining, being considered, having lost.*

PARSING OF VERBS AND VERBALS

190. All the simple and compound forms given in Sections 164 and 165 are parsed as regular tenses of the verb, and none are analyzed into asserting words and infinitives or participles. The defective-verb phrases, as in Section 174, are separated into their elements, then the whole phrase is parsed like any simple verb. Verbals

are parsed by giving the class, the form, and the use in each instance.

The order for parsing verbs is as follows :—

(1) The class as to form, —strong or weak, —and principal parts.

(2) The class as to use, —transitive or intransitive.

(3) The voice, —active or passive.

(4) The mood, —indicative, subjunctive, or imperative.

(5) The tense, and whether definite or not.

(6) The subject, person, and number.

191. For further guidance, a model for parsing each of the above is now given.

Now that she found herself belated, even the animation of a vindictive purpose could not keep her from falling.

(1) *Found*: principal parts are *find, found, found*, hence it is a strong verb; has an object, *herself*, hence it is transitive; represents the subject as acting, and is active voice; states a fact, therefore indicative mood; expresses past time, and is in the past tense, indefinite; third person, singular number, because its subject is the pronoun *she*.

(2) *Could not keep* is a negative verb phrase, consisting of the verb *could*, the adverb *not*, and the simple infinitive *keep*. As a unit, the phrase is transitive, active voice, indicative mood, past tense, third person, singular; its subject is *animation*.

(3) *Belated* belongs to the word *herself*, and is a perfect participle active; has the double use of modifying the object *herself* and of being the complement of the verb *found*.

(4) *Falling* is active, imperfect in form, and is a gerund, since it is the object of the preposition *from*.

Sentences for General Exercise

1. There is an exquisite delight in picking up an arrow head that was dropped centuries ago and has never been handled since.

2. I could wish that the grave might be opened, for I would fain know whether either of the skeleton soldiers has the mark of an ax in his skull.

3. Many strangers come to view the battleground.

4. Do not believe these stories; believe nothing of me save what you have seen with your own eyes.

5. We have been standing on the greensward.

6. The brown spaniel, who had placed herself in front of him, and had been watching him for some time, now jumped up in impatience.

7. God of Zion protect us! What a dreadful sight!

8. Spare thy strength, good traveler, and I will undo the door, though it may be my doing so will be little to thy pleasure.

9. If thou lovest the prize, thou shalt be stripped of thy Lincoln green, and scourged out of the lists.

10. His first intention was to hire a horse and ride home forthwith, for to walk so many miles without a gun in his hand was out of the question.

11. He had something else to curse — his own folly.

12. Towards this happiness he was impelled fitfully, after having passed weeks in which he had avoided her as the far-off, bright-winged prize, that only made him spring forward, and find his chain all the more galling.

13. A thrill of indefinable horror shot through his frame on perceiving that those dewy flowers were already beginning to droop; they wore the aspect of things that had been lovely yesterday.

14. He must soon, he thought, be getting near the opening at the Stone Pits; he should find it out by the break in the hedgerow.

15. About twilight on the second day she found herself entering Paitya, without having had to swim any river in her walk.

16. If thou accomplish thy purpose, I will pay thee with my casque full of crowns.

17. If the long letters were bows, and the short letters broad arrows, I might know something of the matter.

18. His gold, as he hung over it, and saw it grow, gathered his power of loving together.

19. A dissertation on the book of Job—which only Job himself could have had the patience to read—filled at least a score of small thickset quartos.

20. Give me a stoup of wine, as jolly Prince John said, that I may wash away the relish.

21. Had I not been armed in proof, the villain had marked me down seven times with as little compunction as if I had been a buck in season.

22. May each stone in this vaulted roof find a tongue to echo that title into thine ear !

23. Could I but grapple with these horrors that hover round, as I have done with mortal dangers, Heaven should never say that I shrunk from the conflict !

24. The elder books seemed to have been earnestly written, and might be conceived to have possessed warmth at some former period.

25. He lifted his hands to his head, trying to steady himself, that he might think.

26. One morning he was disagreeably surprised by a visit from the professor, whom he had scarcely thought of for whole weeks, and would willingly have forgotten still longer.

SYNTAX OF VERBS AND VERBALS

192. In expressing a wish or a condition contrary to fact, the subjunctive form is to be regularly used, and the indicative is to be avoided. Examples have been given.

193. In a narration of past events the past tense may be used, or the present vividly representing past time ; but the two should not be confused in the same sentence.

(Correct use) "A scuffle *ensues*; a clatter *is heard* among the knives and forks of the dessert; a glass *tumbles* over and *breaks*." (Incorrect) "When he *is* in the boat, he *cries* to the hermit, 'Shrive me, holy man,' and then he *told* his story."

194. The general rule is, that subjects of **singular meaning** have the singular form of the verb, and subjects of **plural meaning** take the plural form of the verb.

This applies also to the predicate noun, since the use of a plural complement after a singular verb is very awkward; as, "Neither of the two great generals was wise and prudent statesmen," for "*a* wise and prudent *statesman*."

195. Singular subject and singular verb:—

(1) Words of singular form and singular meaning, the commonest form of agreement; as, "The day *was* clear."

(2) Collective nouns naming the collection as a unit; as, "The world *has* likewise *heard* those names."

(3) Words of plural form but singular meaning; as, "Physics *is* an important branch of education." "The writer tells us that 'The Visions of Mirzah' *was found* at Grand Cairo." "There *is* two hundred-zecchins in that pouch."

(4) Two or more singular words connected by *or* or *nor*; as, "The heart or the judgment or the moral sense or the taste *is* dissatisfied with this." "Not a hoof nor a wheel *was* to be heard."

(5) Two or more singular words preceded by the adjectives *each*, *every*, *no*, emphasizing each subject separately; as, "Each pendent twig and leafy festoon *was* in a blaze." "Every change of season, every change of

weather, indeed every hour of the day *produces* some change in the magical hues." "No sophistry, no vain logic *detains* him."

196. Plural subject and plural verb :—

(1) Words of plural form and plural meaning ; as, "These things *follow* each other by a general law."

(2) Collective nouns thought of as naming the individuals of the group separately ; as, "The quiet congregation of trees *are* fringed with foliage." "The audience *were* soon in excitement."

(3) Two or more singular subjects connected by *and*, a separate idea being presented by each ; as, "His step and mien *were* particularly sedate and lofty."

But several singular subjects may take a singular verb if they are regarded as making up one idea ; as :—

For the best of the cheer, and the seat by the fire
Is the undenied right of the Barefooted Friar.

Exercise.—Write sentences to illustrate all the above points on the syntax of verbs.

197. A common error in the use of the **participle** is the lack of proper connection between the participial phrase and the leading subject of the sentence ; as, "Despairing of any hope of return, there came a large bird, an albatross, lighting upon the ship."

The meaning seems to be that the large bird despaired of any hope of return, and the participial phrase should be so rewritten as to make the proper sense and connection with the word modified, thus : (1) "The sailors despairing, . . . there came," etc. ; (2) "Despairing of any hope of return, the sailors were surprised to see a large bird," etc.

198. Generally, the **simple infinitive** should be used to express the *same* time as an accompanying verb, and the **perfect infinitive** to express time *before* the action of the main verb; as: —

1. It is gratifying *to see* that feeling completely aroused. He would have liked *to spring* on Dunstan.

2. This extraordinary man is said sometimes *to have given* way to spiritual delusions. The priest seemed *to have exhausted* more of life than the Egyptian.

This rule applies to verb phrases having simple or perfect infinitives; as, "He felt that he could *draw* a magic circle around her." "It could not *be seen* that they intercepted for a moment the faint gleam athwart which they must *have passed*."

199. But whenever the main verb is *expect, wish, hope, intend*, and the like, the simple infinitive is to be used with any tense of the verb to express future time; as: —

1. My father *expects* [*expected*, etc.] to sail for Paris to-day.

2. They *had hoped* to reach the green banks of the Tagus before the noonday.

According to the usage of present-day English, the proper relations of words are violated in such a sentence as this: —

Then went the Captain with the officers, and brought them without violence; for they feared the people, lest they should *have been stoned*.

The proper form now is "should *be stoned*."

200. In such a sentence as, "I was astonished to hear of him stealing the money," the object of the preposition *of* is not the pronoun *him*, but the gerund *stealing*; the

pronoun is intended to modify the gerund, and is usually found in the possessive form *his*. The objective form also is used by writers, but many condemn this as wholly incorrect.

DIRECT AND INDIRECT DISCOURSE

201. A **direct quotation** is a copy of the exact words used by a writer or a speaker; an **indirect quotation** is a report in our own words of what a writer or speaker said; thus:—

(Direct):—

“What have I done, child?” said Priscilla, in some alarm. “Why, you asked them if they minded about being ugly!” said her sister Nancy.

(Indirect):—

Priscilla, in some alarm, asked what she had done. Nancy replied that she had asked them if they minded about being ugly.

202. Several points of difference between direct and indirect discourse are to be noticed:—

(1) Direct quotations are always indicated by quotation marks; direct questions have also an interrogation point. The quotation, if a sentence, begins with a capital letter, and is separated from the main clause by a comma, sometimes by a colon (:).

(2) Indirect quotations are united with the clause introducing them; they have no quotation marks or interrogation points, do not begin with a capital letter, and are not separated by commas or colons; as a rule, the statements begin with the word *that*, and the questions with *whether* or *if* or some interrogative word used in the direct question.

(3) The verb governing the direct quotation has no effect on the verbs in the quotation, each having the tense required by the meaning; but in the indirect quotation the verbs have such tenses as suit the governing verb.

(4) The direct quotation has the same freedom with pronouns as with verbs; the indirect quotation uses only such pronouns as agree with the persons in the main clause; as:—

(Direct):—

“Nay,” said I to her with a gush of tenderness, “I rejoice at the wrongs which drove thee to this blessed lawsuit!”

(Indirect):—

I exclaimed to her with a gush of tenderness that I rejoiced at the wrongs which drove *her* to this blessed lawsuit!

NOTES.—1. If a direct quotation is included within a direct quotation, the included one has single marks; “Why, you asked them, ‘Do you mind about being ugly?’” said her sister Nancy.

2. An imperative verb is usually changed to an indicative followed by an infinitive. (Direct) “Bring forth the converts!” cried a voice. (Indirect) A voice *ordered* them *to bring* forth the converts.

3. A past tense in the main clause may be followed by a present tense in the clause of indirect quotation, if the latter verb is intended to express a statement true at all times.

Exercise

(a) Copy the following from dictation; change the direct quotations to indirect, and the indirect to direct:—

1. “Come,” said I to my friend, “or I shall be tempted to make a theory—after which there is little hope of any man.”

2. Having been on speaking terms with one of those persons, I called him and inquired what was his business there.

3. “Sir,” he said to me with a sad, yet mild and kindly, voice, “do you call yourself a pilgrim?”

4. "I observe a few crumbling relics," said I. "But ever and anon, I suppose, Oblivion comes with her huge broom and sweeps them all from the marble floor."

5. Jem Rodney averred that, on coming up to him, he saw that Marner's eyes were set like a dead man's, and he spoke to him, and shook him, and his limbs were stiff.

6. Silas confessed that he could never arrive at anything higher than hope mingled with fear, and listened with wonder when William declared that he possessed unshaken assurance.

7. The emperor added that he hoped I should prove a useful servant, and well deserve all the favors he had already conferred upon me.

8. "You are to know," said his lordship to me, "that several committees have been lately called on your account; and it is but two days since his majesty came to a full resolution."

9. The secretary added that if it had not been for the present situation of things at court, perhaps I might not have obtained my liberty so soon.

10. "I'll take the first watch," said Alan. "You've done well by me, first and last; and I wouldn't lose you for all Appin."

(b) Criticise the two sentences below:—

1. A policeman awoke him and asked him what was he doing there at that time of night?

2. Professor A. asked N. would he not go with him, for he needed some one to mount specimens for him.

ADVERBS

203. Some examples of adverbs are here given :—

1. He observes *how heavily* the branches are weighed *down*.
2. We have sought a *somewhat* devious track in our walk.
3. He had resided *almost entirely* with the Squire.

The words *heavily*, *down*, and *entirely* are used to modify the verbs *are weighed* and *had resided*, and to tell how, or in what way, the action is performed ; the word *somewhat* modifies the adjective *devious*, and tells how much, or in what degree ; the words *how* and *almost* modify adverbs already mentioned, and tell in what degree.

Adverbs are words used to modify verbs, adjectives, and other adverbs.

204. Adverbs modify also phrases and clauses that are used as adjectives or adverbs ; as :—

Across the rafters were placed two boards *exactly* of the same size (phrase).

Just as he had got halfway through the hollow, the girths of the saddle gave way (clause).

Any verbal word may be modified by adverbs ; as :—

1. The very soul seems *almost* rapt *away* (participle).
2. He attempted to dash *briskly* across the bridge (infinitive).
3. He had left the neighborhood partly in mortification at having been *suddenly* dismissed by the heiress (gerund).

Exercise.—Write sentences with adverbs modifying the verb, predicate adjective, participle, infinitive, and gerund.

CLASSES OF ADVERBS

205. As to their office in the sentence, adverbs may be **simple**, **interrogative**, or **conjunctive**.

The adverbs in Section 203 are **simple**; that is, they only modify, and have no further office in the sentence.

Interrogative adverbs are those which modify and also are used to ask a question; as, "*Where* is the master who could have taught Shakespeare?"

Conjunctive adverbs are those which modify and also help to connect clauses; as, "*As* much wisdom may be expended on a private economy as on an empire."

Simple Adverbs

206. Simple adverbs are divided into five classes:—

(1) **Time**: *now, then, yesterday, to-morrow, to-day, soon, late, ever, never, lately, hereafter, thereupon*, etc.

(2) **Place**: *here, there, hither, thither, hence, thence*, and the compounds, *herein, therein, elsewhere, nowhere, anywhere else*, etc.

(3) **Manner**, telling how: *easily, thoroughly, otherwise, solemnly, deeply*, etc., most adverbs ending in *-ly*.

These three classes modify verbs exclusively.

(4) **Degree**, telling how much, and modifying adjectives and adverbs: *so, too, as, very, almost, enough*, etc.

(5) **Assertion**, modifying not some single word, but a whole statement, and changing its meaning: *probably, surely, perhaps, doubtless, certainly, hardly, not*, etc.

Exercise. — Write sentences having adverbs of each of the above five classes.

207. Many of the above words change from one class to another, according to the meaning they express:—

1. *So* died the hero (manner).
2. *So* far we cannot go (degree).
3. The plague spreads gradually but *surely* (manner).
4. *Surely* he cannot have betrayed us (assertion).

Sometimes the word *there*, instead of being used adverbially, merely introduces a sentence; as, "*There* is a time for everything."

Exercise.—Write sentences using the word *then* as an adverb of time and assertion; *so* as an adverb of manner, degree, and assertion; *certainly* as an adverb of manner and assertion; *far* as an adverb of place and degree; *there* as an adverb of place and as an introductory word.

Interrogative Adverbs

208. Interrogative adverbs introduce questions, and express **time, place, manner, reason, and degree**. The chief ones are: *when, where, why, and how*; as, "*How* and *when* had the child come into the hut?"

Conjunctive Adverbs

209. **Conjunctive adverbs** join clauses like conjunctions and may also be considered to modify like adverbs; as, "*As* the twig is bent, *so* is the tree inclined."

Conjunctive adverbs include two sub-classes:—

(1) Interrogative adverbs in indirect questions are conjunctive, since they both modify and connect; as:—

1. He did not learn *how* this failed.
2. Still no one asks *why* such measures are not taken.

(2) Of certain pairs of connecting words, the first, or modifying word, is usually an adverb, the second a conjunction; such are: *as . . . so, the . . . the, as . . . as,*

so . . . that, so . . . as. All the words of the first two sets are adverbs, but they help to connect; as:—

1. Yet *the* more the alchemist labored, *the* less hope had he of such an achievement.

NOTE. — *The* is not to be called an article in the above use.

2. *So* brilliantly were they polished as to resemble the finest specimens of emerald.

3. Some say we have already *as* good poets as any in the world.

Exercise. — Write ten sentences illustrating the use of different words as conjunctive adverbs, some modifying adjectives and some adverbs.

COMPARISON OF ADVERBS

210. Comparison is the only inflection of adverbs. Many words are used as adjectives and adverbs without change of form, and are inflected by the endings *-er* and *-est*; as, *high, deep, loud, wide, hard, long*, etc.

Most of the words compared irregularly as adjectives are used as adverbs (Section 127); but *better, best*, have the positive adverb, *well*; and *worse, worst*, the positive, *ill*, or *badly*.

Adverbs ending in *-ly* take the adverbs *more, less* and *most, least* to express the degrees of comparison; as, *more carefully, most carefully, least carefully*.

211. In observing the use rather than the form of adverbs, the student must keep in mind two things: that adverbs often do not end in *-ly*, and that very many words ending in *-ly* are adjectives.

Exercise

Point out the adverbs in the following sentences, and tell which kind each is:—

1. It is certainly the most unexcitable and sluggish stream that ever loitered imperceptibly toward its eternity, the sea.

2. The other Briton raised himself painfully upon his hands and knees and gave a ghastly stare.
3. Our garret was an arched hall, dimly illuminated through small and dusty windows.
4. There yet lingers with me a superstitious reverence for literature of all kinds.
5. How gently did its gray, homely aspect rebuke the speculative extravagances of the day!
6. Then Nature will love him better than at any other season, and will take him to her bosom with a more motherly tenderness.
7. The breeze would linger fondly around us, but since it must be gone it embraces us with its whole kindly heart and passes onward.
8. Such delusions always hover nigh whenever a beacon fire of truth is kindled.

PARSING OF ADVERBS

212. In parsing an adverb, the pupil should tell :—

- (1) The class and sub-class to which it belongs.
- (2) The degree of comparison, if it is compared.
- (3) What word or expression it modifies.

Sentences for General Exercise

1. Who can tell, when he sets forth to wander, whither he may be driven by the uncertain currents of existence, or when he may return?
2. But where, thought I, is the crew?
3. Their struggle has long been over; they have gone down amidst the roar of the tempest.
4. I regret to say that these customs are daily growing more and more faint, being gradually worn away by time, but still more obliterated by modern fashion.
5. His waistcoat is commonly of some bright color, striped, and his smallclothes extend far below the knees, to meet a pair of jockey boots which reach about halfway up his legs.
6. The kitchen was hung round with copper and tin vessels highly polished, and decorated here and there with a Christmas green.

7. He regrets sometimes that he had not been born a few centuries earlier.

8. So intent were the servants upon their sports that we had to ring repeatedly.

9. Supper was announced shortly after our arrival.

10. Though he was ostensibly a resident of the village, he was oftener to be found in the Squire's kitchen.

11. The more carefully his works are examined, the more clearly it will appear that this is the real clew to the system.

12. Could not Noll have given his poor relatives and brother-in-law a sop somewhere else?

13. As the Sandwich Islander believes that the strength of the enemy he kills passes into himself, so we gain strength of the temptation we resist.

14. Why should he assume these faults?

15. His sixty cords of wood had probably dwindled to a far less ample supply.

16. He is driven to entertain himself alone and acquire habits of self-help; and thus, like the wounded oyster, he mends his shell with pearl.

17. It was because he dug deep that he was able to pile high.

18. In his manners he was perfectly friendly, but so silent that he would often sit at the head of his table, and leave it without uttering a word.

19. The London people often wondered why he traveled with only one servant.

20. This clever woman tired of most things and people sooner or later.

21. How far had this pretty intrigue gone, was now the question.

22. It is remarkable that the longer Bacon lived the stronger this feeling became.

SYNTAX OF ADVERBS

213. Adverbs and adverbial expressions should be so placed that no one can doubt which words they modify. In the sentence, "Her injuries were so serious that she

was expected to die for a long time," the phrase *for a long time* is at the first glance taken to be a modifier of *to die*. To save trouble and error, the writer should have placed the phrase after *that* — "that for a long time she was," etc.

In the sentence, "I scarcely *ever* expect to have such a pleasure," the *ever* belongs to the infinitive, and should be placed before it — "I scarcely expect *ever* to have," etc. The words *even*, *merely*, *only*, *almost*, *nearly*, etc., are often misplaced.

214. In English of the present day, two negative words are equivalent to an affirmative. "I never have no luck" means "I have luck always." If the purpose is to make an affirmative statement, two negatives or none may be used; if a negative is intended, only one negative should be used.

Not, *never*, *no*, *none*, *nor*, *neither*, *nowhere*, *nobody*, etc., are the commonest negatives; but such adverbs as *hardly*, *scarcely*, and *but* have a negative meaning.

215. Errors are frequently made, especially in the predicate, by the improper use of adjectives for adverbs, or of adverbs for adjectives.

In the sentence, "The child had never looked so *sweetly*," the meaning intended is, The child never had been so sweet in its appearance; a quality of the subject is to be expressed, and the adjective *sweet* is the word needed.

In the sentence, "The silk was sent *direct* to me," the purpose is to describe the manner of sending, and the adverb *directly* is the word to use.

In general, if the purpose is to limit in some way the action of the verb, an adverb should be used; if the purpose is to express some quality or condition of the subject, an adjective is to be used.

The words most frequently misused are *real*, *most*, *near*, *good*, *previous*, for *really* (or *very*), *almost*, *nearly*, *well*, and *previously*.

Exercise. — Write five sentences in which the words *feel*, *appear*, *smell*, *cook*, *grow*, shall have adjective complements, and five in which they shall be modified by adverbs.

CONJUNCTIONS

216. Conjunctions are words used for joining words, phrases, clauses, and sentences.

(1) **Words**; as, "I seek the Vatican *and* the palace."

(2) **Phrases**; as, "With his will *or* against his will, he draws his portrait."

(3) **Clauses**: (*a*) independent, "Always pay; *for* first or last you must pay your entire debt;" (*b*) independent and dependent, "We meet *as* water meets water."

(4) **Sentences**; as, "It has overflowed stone fences and even rendered a portion of the highway navigable for boats. The waters, *however*, are gradually subsiding."

CLASSES OF CONJUNCTIONS

217. Conjunctions are divided into two general classes: **coördinate** and **subordinate**.

Coördinate conjunctions join words, phrases, and clauses of equal rank; that is, in the same construction, as (1), (2), (3) (*a*), above. **Subordinate conjunctions** introduce clauses that are subordinate to those with which they are joined, as Section 216 (3) (*b*).

Coördinate conjunctions are of four kinds: (1) those that couple, or join expressions in the same line of thought; as, *and*, *also*, *moreover*; (2) those that join expressions in opposition, or contrast; as, *but*, *yet*, *however*; (3) those that indicate a choice, usually between

two things; as, *either . . . or, neither . . . nor*; (4) those that express consequence or conclusion; as, *therefore, so, accordingly*.

The following sentences show the use of some of the coördinate conjunctions of each class:—

1. Hospitality must be for service and not for show, or it pulls down the host.

2. The portrait responded not; so I sought an answer for myself.

3. Strangers may present themselves at any hour and in whatever number.

4. It is a noble, generous liquor, and we should be thankful for it; but water was made before it.

5. We have seen or heard of many extraordinary young men who never ripened, or whose performance in actual life was not extraordinary.

6. It might indeed sharpen and invigorate the minds of those who devoted themselves to it; and so might the disputes of the orthodox Lilliputians and the heretical Blefuscudians about the big ends and the little ends of eggs. But such disputes could add nothing to the stock of knowledge. The human mind, accordingly, instead of marching, merely marked time.

7. The sweet of nature is love; yet if I have a friend, I am tormented by my imperfections.

8. Neither the travelers nor their steeds were visible.

9. He had never felt so lonely and dismal. He was, moreover, approaching the very spot.

10. Their business is not to check, but to act. The very same things, therefore, which are the virtues of Parliaments may be vices in Cabinets.

Exercise

(a) To which class of coördinate conjunctions does each conjunction in these ten sentences belong?

(b) Tell what each conjunction connects in the ten sentences above.

(c) Write eight sentences, using two words of each class of coördinate conjunctions.

(d) Write sentences containing coördinate conjunctions connecting (1) two noun clauses, (2) two adjective clauses, (3) two subjects, (4) two objects, (5) two predicate adjectives, (6) two adjective phrases, (7) two adverb phrases, (8) two adverbs modifying the same verb, (9) two verbs having the same subject and object.

Compound Sentences

218. Sentences that contain two independent clauses are known as **compound sentences**. Many examples have been given in the sentences above. The compound sentence may have more than two independent clauses, and also dependent clauses; the main point to notice is, that it must have at least two independent clauses.

219. Observe the following sentences : —

1. I do not know when the boat will arrive.
2. The hour when the boat arrives has passed.
3. I will meet you when the boat arrives.

In Section 97 the pupil learned to distinguish the noun clause from the adjective clause; in sentences (1) and (2) above, the conjunction *when* introduces a **noun clause** and an **adjective clause**.

In sentence (3), the conjunction *when* introduces a clause used to modify the verb *will meet* and to answer the question, At what time? Hence, the clause introduced by *when* is called an **adverbial clause**.

From this we see that some words may introduce several kinds of clauses; and that the kind of clause must be determined by its use in the sentence.

Exercises

1. Write three sentences using *where* to introduce a noun clause, an adjective clause, and an adverbial clause.

2. Write a complex sentence having two dependent clauses introduced by *how*.

220. Subordinate conjunctions are of several kinds: those of time, place, manner, cause or reason, comparison, purpose, result, condition and concession, and substantive.

The following list contains most of the subordinate conjunctions: —

after	how	that ¹	whence
as ¹	if	though	where
as if	in order that	till	wherever
as though	since ¹	until	while
because	so that	unless	whither
before	than	when	why

Exercise

(a) Learn the above subordinate conjunctions, and tell what each one expresses — whether time, place, etc.

(b) The following sentences show the various uses of subordinate conjunctions. Write the sentences from the teacher's dictation, and tell the exact use of each italicized word: —

1. This is perhaps the reason *why* we seldom hear of ghosts.
2. They passed on through the forest, *where* no church had ever been gathered.
3. He knew more about the matter *than* he chose to tell.
4. We know truth *when* we see it.
5. His spirits rose with eating and drinking *as* some men's do with drink.
6. He distributed beef and ale and bread among the poor, *that* they might make merry.
7. *As* he was a bachelor, and in nobody's debt, nobody troubled about him.
8. *If* left to himself, he would have whistled away life in perfect contentment.

¹ See Section 221.

9. His instrument was as old and battered *as* himself.
10. She felt *that* it was a very hard trial for the poor weaver.
11. The Squire, *though* he was not superstitious himself, was fond of seeing others so.

(c) Write sentences using all the subordinate conjunctions in the list (Section 220).

(d) Write sentences with the conjunction *why* introducing an adjective clause and an adverbial clause; *that* and *if* introducing noun and adverbial clauses.

221. The above list shows that some words are used as several kinds of conjunctions. As some of them get their meaning from that of the accompanying clause, one must examine the meaning of the whole dependent clause in order to classify a given conjunction. *That* may indicate purpose, result, and introduce a noun clause; *since* may express time and reason; *as* may express time, manner, reason, comparison, and result. Some of the words in the list may be used as prepositions and simple adverbs also.

Exercise

Tell what kind of conjunctions *that*, *as*, and *since* are in the following sentences: —

1. *That* all this might not be too onerous on the purses of his rustic patrons, he had various ways of rendering himself useful and agreeable.
2. But neither the government of France nor that of England is so disorganized *as* to be fit for the propagation of theological doctrines.
3. We are apt to murmur against the whole system of the universe, *since* it involves the extinction of so many summer days.
4. So tenacious was he on this point, *that* the poor sexton was obliged to strip down most of the trophies of his taste.
5. He has also sorted a choir *as* he sorted my father's pack of hounds.

6. It was but the rubbing of one huge bough upon another, *as* they were swayed by the breeze.

7. I observed *that* he exercised rather a mischievous sway with his wand.

8. It was now a twelvemonth *since* the funeral procession had turned from that gateway.

9. Rip's sole domestic adherent was his dog Wolf, who was as much hen-pecked *as* his master.

10. They could not do without him, *as* he was the best hand at a song and story in the household.

222. Correlative connectives are those that go in pairs, each being needed to complete the other. Some of these are in the following lists :—

(1) **Two or more coördinate conjunctions** : *both . . . and, not only . . . but (but also), either . . . or, neither . . . nor*; *as* :—

But *neither* climate *nor* poverty, *neither* study *nor* the sorrows of a homesick exile, could tame the desperate audacity of his spirit.

(2) **A subordinate with a coördinate conjunction** : *if . . . then, though (although) . . . yet*; *as* :—

1. *If* the poet write a true drama, *then* he is Cæsar, not the player of Cæsar.

2. *Although* they had various success, *yet* on the whole the advantage remained with the challengers.

See also Section 209 (2).

Exercise.—Write five sentences illustrating the use of the different kinds of correlatives shown above.

PARSING OF CONJUNCTIONS

223. In learning to parse conjunctions, it is well to note the fact that frequently a conjunction introduces a clause which is contracted; that is, its subject and part or all of

its predicate are omitted. In that case the missing part should be supplied in order that the meaning and connection may be made clear. For example, in sentences already quoted: "His instrument was as old and battered as [he] himself [was]." "If [he had been] left to himself, he would have whistled away life."

In parsing a conjunction, the pupil should state:—

- (1) The class and sub-class to which it belongs.
- (2) What words, phrases, etc., it connects.

Sentences for General Exercise

1. We are desirous, before we enter on the discussion of this important question, to point out a distinction.

2. Once while Hillard and other friends sat talking with us, there came a rustling noise, sweeping through the very midst of the company, so closely as almost to brush against the chairs.

3. It is of very much more importance that men should have food than that they should have pianofortes. Yet it by no means follows that every pianoforte maker ought to add the business of baker to his own; for, if he did so, we should have worse music and worse bread.

4. They could not have paid a more acceptable compliment to my abode, nor to my own qualities.

5. I never like to notice M. du Miroir, nor to acknowledge the slightest connection with him. He, however, has no scruple about claiming my acquaintance, even when his common sense might teach him that I would as willingly exchange a nod with Old Nick as with him.

6. Somewhere, not only an orator but every man should let out all the length of the reins.

7. Unless he be another Lado whose garments the depths of the ocean could not moisten, it is difficult to conceive how he keeps himself in any decent pickle, though I am bound to confess that his clothes seem always as dry and comfortable as my own.

8. He who has more obedience than I masters me, though he should not raise his finger.

9. He must find in that an outlet for his character, so that he may justify his work.

10. If you would serve your brother because it is fit for you to serve him, do not take back your words when you find that prudent people do not commend you.

11. He was more ambitious than noble.

12. As I passed its threshold, it seemed like stepping back into the regions of antiquity.

13. We step curiously and softly about, as if fearful of disturbing the hallowed silence of the tomb.

14. The monuments are generally simple, for the lives of literary men afford no striking themes for the sculptor.

15. This helped to account not only for there being more profusion in the holiday provisions, but also for the frequency with which the Squire condescended to preside in the parlor of the Rainbow Inn.

16. Supper was his favorite meal, because it came at his time of revelry, when his heart warmed over his gold.

17. He turned, and tottered towards his loom, and got into the seat where he worked.

18. Mr. Macey thought this was nonsense, since the law was not likely to be fonder of lawyers.

19. The rain and darkness had got thicker, and he was glad of it; though it was awkward walking with both hands filled, so that it was as much as he could do to grasp his whip along with one of the bags. But when he had gone a yard, he might take his time. So he stepped forward into the darkness.

SYNTAX OF CONJUNCTIONS

224. In the use of coördinate correlatives, care should be taken to use the proper words in sets, and to place them in corresponding positions; for example:—

1. The assailants might introduce into the underwood whatever force they thought proper, *not only* under cover, *but also* without the knowledge of the defenders.

2. Thou shalt have *neither* answer, *nor* aid, *nor* obedience at their hands.

Usually it is best to notice what kind of expression the second correlative precedes, and then to make the position of the first correspond to that of the second. In the above sentences, *not only* and *but also* are followed by phrases; *neither*, *nor*, *nor* are followed by nouns.

The following sentence is faulty :—

He *neither* exhausts himself *or* his hearers at each service.

The correct writing would be :—

He exhausts *neither* himself *nor* his hearers at each service.

225. The word *what* is sometimes incorrectly used as a conjunction, as in the sentence :—

I do not know *but what* his explanation is the best.

What is never a subordinate conjunction; *but*, *but that*, or *that . . . not* should be used.

It is well, however, for the student to note two types of correct sentences which are not to be confounded with that just given :—

1. In this he can be said to assume nothing *but what* he can readily prove.

2. O lady, we receive *but what* we give.

In 1, *but* is a preposition and *what* a relative pronoun; in 2, *but* is an adverb and *what* a relative pronoun; both sentences are clear, correct English.

226. Notice carefully this sentence :—

We can learn as much, if not more, out of school than in school.

In making a comparison of equality, *as* is the conjunction to use; but in making a comparison of inequality, *than* should follow the comparative word.

Hence, if a sentence has a comparison of equality and also one of inequality, both clauses should be so arranged that each conjunction may have the proper connection :—

We can learn *as* much out of school *as* in school if not *more* [*than* we can learn in school].

227. Besides these inaccuracies, several other errors may be spoken of in this connection :—

In the sense of attempt to, the proper expression is *try to* instead of *try and*.

The word *without* is never a conjunction, but is now and then wrongly used instead of *unless*.

The word *like* is not to be used as a conjunction instead of *as*, *as if*, or *as though* when a verb follows in the clause.

The conjunction *as* should not be used instead of *that* to introduce a noun clause; as, "I do not know *as* he shall have such a privilege."

The conjunctions *how* and *where* are sometimes improperly used for *that*, and *when* is used instead of a substantive word in the predicate; as, "Abdication is *when* a ruler gives up his throne." A correct expression would be, "Abdication is the *giving up* of a throne by a ruler."

PREPOSITIONS

228. Prepositions connect parts of sentences, but have in addition the quality of expressing the **relation** of one word or expression to another; as, "His first movement *after* the shock was to work *in* his loom." "A weaver who came *from* nobody knows where, worked wonders *with* a bottle of brown waters."

The word *after* introduces *after the shock*, and shows the relation of **time** between *movement* and *shock*; *in* shows the relation of **place**, and connects *to work* and *loom*; *from* expresses **separation**; *with*, **means** or **instrument**.

A **phrase** is a group of words, not containing a verb but used as a single modifier (see Section 273); as, *after the shock*, *with a bottle*.

A **preposition** is a word used to introduce an adjective phrase or an adverbial phrase, and to express relation between its object and the word modified.

CLASSES OF PREPOSITIONS

229. Prepositions may be single words or combinations of two or three words used as one; as, *through*, *by*, *with*, *out of*, *because of*, *by way of*, *in place of*, etc.

They cannot all be classified, on account of the great variety of relations expressed by them. The largest classes are those of **time** and **place**. The chief ones expressing **time** are: *after*, *during*, *pending*, *ere*, *since*, *till*, *until*. Some prepositions expressing other relations may be applied to time; as, *about*, *before*, *above*, *at*, *between*, *by*, *near*, *on*.

The prepositions of **place** may be divided into: (1) those of PLACE WHERE — *abaft, about, above, across, amid (amidst), among (amongst), around (round), at, below, beneath, beside, between (betwixt), beyond, in, on, over, under (underneath), upon, within, without*; (2) PLACE WHITHER — *into, through, throughout, to, towards, unto, up*; (3) PLACE WHENCE — *down, from, away from, down from, off, out of*.

Exercise. — Write sentences having five prepositional phrases modifying nouns, and five modifying verbs.

230. The object of a preposition may be : —

(1) **A word**, noun, pronoun, adverb, gerund, etc. ; as : —

In *coming from there*, he had to pass through the *village*.

(2) **A phrase** ; as : —

Aaron had made an outwork of his mother's chair, and was peeping round from *behind it*.

(3) **A clause** ; as : —

There was no word in it that could rouse a memory of *what he had known as religion*.

231. Some idiomatic constructions with prepositions may be mentioned and illustrated here : —

The preposition sometimes follows its object when this is an interrogative or a relative word ; as : —

1. Godfrey had better reason than any one else to know *what* his brother was capable *of*.

2. The head was held up to see *where* the cunning gleam came *from*.

The object of a preposition is sometimes not expressed, especially if it is a relative pronoun ; as : —

1. There was nothing that called out his love for the strangers [*whom*] he had come *amongst*.
2. The Squire was in higher spirits than [*those which*] we have seen him *in* at breakfast.

After an infinitive the preposition may be used without an object, the same being merely implied ; as :—

1. This authority carried with it the right to sell you the ground to be buried *in* [*in which* to be buried].
2. When you can see your face in a table, there's nothing else to look *for* [*for which* to look].

After the words *like* and *near*, which are adjectives or adverbs, according to their use in the sentence, the preposition *to* is usually omitted ; as :—

1. He must soon be getting *near* the Stone Pits.
2. The feast was not to end with a single evening, *like* a paltry town entertainment.

Some prepositions are used to complete the meaning of verbs and verbals, and may be considered a part of them ; as :—

1. Mr. M. did not doubt that he had been listened *to*.
2. There may still remain some creditors unpaid, even after all that I have shall have been disposed *of*.
3. This caused him to be looked *upon* as a prodigy.
4. Mrs. Siddons was prevailed *on* to read passages from both Shakespeare and Milton.

232. Some words may be prepositions or conjunctions, according to use, and a few may be prepositions, conjunctions or adverbs. The use must be closely watched. For example :—

1. No one *but* John was admitted (Preposition).
2. I will go *but* you must stay (Conjunction).
3. 'Tis *but* a little faded flower (Adverb).

Exercise

(a) Tell the use of the italicized words below, and point out what part of speech each is : —

1. Now he leads the same life as *before*.
 2. It was the very spot *for* a clergyman's residence.
 3. The wind, *after* blustering all day, hushes itself to rest.
 4. The timbers are green with half a century's growth of water-moss; *for* during that length of time the tramp of horses and human footsteps have ceased.
 5. The two soldiers have ever *since* slept peacefully.
 6. His soul was tortured by the blood stain *before* war had robbed human life of its sanctity.
 7. The old minister, *before* reaching his patriarchal age of ninety, ate the apples from this orchard.
 8. The cabbage swells to a monstrous circumference, *until* its ambitious heart often bursts asunder.
 9. Nothing *but* a becoming blush betrayed the moving thoughts that urged themselves upon her.
 10. There were two doors, *but* the lower one was closed.
 11. In such weather the camp afforded *but* a cheerless shelter.
 12. Ducks that had been floating there *since* the preceding eve were startled at our approach.
 13. *Until* now he had not been aware of the tyrannizing influence acquired by one idea.
 14. An old farmer, who had been down to New York several years *after*, brought the news.
 15. *Since* he would not obey he was unfit to command.
- (b) Write sentences of your own, using the above italicized words in as many ways as they are here used.

PARSING OF PREPOSITIONS

233. In parsing a preposition, it is necessary only to tell what kind of phrase it introduces, and between what words it shows relation ; as : —

At every pause *in* the general conversation he renewed his bantering.

Since *at every pause* modifies *renewed*, it is an adverbial phrase, and *at* shows the relation between *renewed* and *pause*; the phrase, *in . . . conversation*, modifying *pause*, is an adjective phrase, and *in* shows the relation between *pause* and *conversation*.

Sentences for General Exercise

1. This attack was commenced by the ladies, but it was continued throughout the dinner by the fat-headed gentleman.
2. When I returned to the drawing room, I found the company seated round the fire.
3. It was said to get up from the tomb and walk the rounds of the churchyard in stormy nights.
4. These tales were often laughed at by some of the sturdier among the rustics.
5. Methinks I hear the question asked by my graver readers, "To what purpose is all this?"
6. The approach to the Abbey through these gloomy monastic remains prepares the mind for its solemn contemplation.
7. The monuments are generally simple, for the lives of literary men afford no striking themes for the sculptor.
8. He has lived for them more than for himself.
9. A flight of steps leads up to it, through a deep and gloomy but magnificent arch.
10. How often did he shrink with curdling awe at the sound of his own steps on the frosty crust beneath his feet!
11. The place still continues under the sway of some witching power, that holds a spell over the minds of the good people, causing them to walk in a continual reverie.
12. He seldom sent either his eyes or his thoughts beyond the boundaries of his own farm.

SYNTAX OF PREPOSITIONS

234. Certain words must be followed by special prepositions, sometimes because of the original meaning, some-

times only because of customary usage. These must be learned gradually by observation and practice, but some of the important sets may be mentioned here:—

Absolve *from*, acquit *of*, bestow *upon*, comply *with*, conform *to*, conversant *with*, dependent *on* (*upon*), deprive *of*, different *from*, dissent *from*, independent *of*, profit *by*.

235. Certain words may be followed by two or more prepositions, with a difference in meaning; as:—

Agree *to* (a proposal); agree *with* (a person).

Confer *on* or *upon* (bestow upon); confer *with* (talk with).

Differ *from* (to be unlike in appearance or qualities); differ *from* or *with* (disagree with persons in opinions).

Disappointed *in* (a thing obtained); disappointed *of* (a thing wished for, but not obtained).

Taste *of* (food); taste *for* (art, reading, etc.).

236. Some sets of prepositions need to be noticed, so that the words of each set may not be confused with each other; *in* and *into*, *between* and *among*, *beside* and *besides*.

In indicates position, rest in a place; *into* indicates motion to a place within.

Between refers generally to two things or groups; *among*, to more than two.

Beside usually means near, by the side of; *besides* means in addition to.

237. Prepositions are often useful in helping to define action; as, to hear, to hear *of*; to laugh, to laugh *at*. Many words lose their function as prepositions and become adverbs, defining the action of the verb to which they are attached; as, to call *away*, to call *out* (some one), to call *in*, to call *off*, etc.

Words of either group are not to be used unless they really add to the meaning of the accompanying verb. In the sentences, "I do not recollect *of* having seen him before," "The boy raised *up* the window," the words *of* and *up* are quite unnecessary.

INTERJECTIONS

238. **Interjections** are words used to indicate emotion of some kind. Frequently they have no particular meaning; so that we cannot in some cases discover, without studying the whole sentence, what emotion is to be expressed. Some are merely imitative words; as:—

Alas! that cannot be.

'Ha! ha!' quoth he.

Bah! don't madam me!

H'm! you know what has happened.

Hallo! how do you know, Mr. Chaplain?

Pooh! pooh! stupid old man!

The owls have awakened the crowing cock. *Tu-whit! tu-whoo!*

Many of the parts of speech, however, may be used as exclamations, and are not to be called interjections. They may be nouns used independently, or imperative verbs, or adverbs, etc.; as:—

Up! up! my friend.

Milton! thou shouldst be living at this hour.

Help! help! sir, your honor!

Hush! for heaven's sake!

Indeed! I scarcely saw them.

EXERCISES IN SYNTAX

NOUNS

(Refer to Sections 234–237.)

ANALYSIS OF SENTENCES

260. **Analysis** is the process of separating a sentence into its elements.

The main matters connected with analysis have been presented in the discussion of parts of speech, and it remains now to arrange these facts in a convenient form and to add a few explanations.

CLASSIFICATION ACCORDING TO FORM

261. According to the way in which a thought is expressed sentences may be of three kinds :—

(1) A **declarative sentence** is one that makes a statement; as :—

1. Necessity is the mother of invention.
2. The mill stands by the little creek.

(2) An **interrogative sentence** is one that asks a question; as :—

1. Who can count the stars ?
2. Where is last year's snow ?

(3) An **imperative sentence** is one that expresses a command, an entreaty, or a request; as :—

1. Friends, Romans, countrymen, lend me your ears.
2. Go to the ant, thou sluggard.

(4) An **exclamatory sentence** is one that expresses strong emotion. It may be declarative, interrogative, or imperative; as :—

1. How are the mighty fallen!
2. Strike for your altars and your fires!
3. Oh death! Where is thy sting!

Exercise

Distinguish the following sentences as declarative, interrogative, or imperative. State which are exclamatory : —

1. Can such a man succeed ?
2. Though he slay me, yet will I trust him.
3. Dare to be brave !
4. A rare old plant is the ivy green !
5. Come to the sunset tree !
6. O grave ! Where is thy victory !
7. Cheerfulness and content are great beautifiers.
8. I dare do all that may become a man.
9. Honor the light brigade,
Noble six hundred !
10. Who can estimate the power of gentle influences ?

SIMPLE SENTENCES

262. Sentences may be **simple**, **complex**, or **compound**.

263. A **simple sentence** is one that contains only one statement, command, or question.

The simple sentence is made up of **principal** and **subordinate elements**. The principal elements are the subject and predicate; the subordinate elements are the objects, complements, modifiers, and independent words.

264. The **subject** of a sentence names that of which something is said, and which answers the question “**who?**” or “**what?**” placed before the predicate; as:—

The lives of our rural forefathers had a certain pathos in them.

The expression in italics answers the question, “What had a pathos in them?” and is the subject.

The **predicate** is that word or expression which says something of the thing named by the subject.

In the sentence just quoted, the expression *had a certain pathos in them*, being introduced by the verb *had*, declares something of the thing named by the subject, and hence is the predicate.

265. Generally when the word “subject” is used, the **simple subject** is meant—the substantive word without any modifiers, as *lives* in the sentence on p. 186.

The term “predicate” usually implies the **simple predicate**—the verb or verb phrase that does the asserting, as *had* in the sentence quoted.

It is better, however, for the student always to give the complete subject and predicate before giving the simple subject and predicate; then the single words may readily be found.

Exercise.—Write ten simple sentences, each having a subject and a predicate unmodified.

266. There are two kinds of objects: **direct** and **indirect**. The **direct object** names the person or thing that directly receives the action of the verb or verbal; as:—

1. A small minority shook their *heads*.
2. Nancy was capable of keeping her *word* to herself.

The **indirect object** names the person to or for whom something is done. It is equivalent to a phrase introduced by *to* or *for*, and usually precedes a direct object; as:—

1. I may as well tell the *Squire* everything.
2. You chose to be so obliging as to give *me* the money.

Exercise.—Write ten sentences, each having a direct and an indirect object. Draw one line under the direct objects, and two under the indirect objects.

267. The complements may belong to an intransitive or a transitive verb ; as : —

1. The transaction became more *complicated*.
2. He was very proud of his lithe son, whom he declared *to be* just like himself.

A complement may also follow a verbal ; as : —

1. (Participle) She was a good-looking woman, having her lips always tightly *screwed*.
2. (Infinitive) He tried to make the scene *easier* to himself by rehearsal.
3. (Gerund) He clutched strongly at the idea of the peddler's being the *culprit*.

Exercise

(a) Write five sentences having complements of intransitive verbs, and five having complements of transitive verbs.

(b) Write sentences to illustrate complements of the participle, infinitive, and gerund, two sentences for each.

268. The complement is retained when a transitive verb is changed from active to passive ; as : —

When any one exposed himself, this was made *evident* by the bullet which was sent in search of him.

When the active sentence with direct and indirect object is changed to passive, the indirect may become the subject by an idiomatic construction, the direct being retained with the passive verb ; as : —

He was offered the situation of brakeman.

269. The subject or the direct object may be : —

(1) **A noun** ; as : —

But *beauty* is never a delusion.

(2) An adjective or a participle used as a noun ; as : —

1. Is not *the past* all shadow ?
2. The grave should be surrounded by everything that might win *the living* to virtue.

(3) A pronoun ; as : —

I saw, and marked *him* well.

(4) An infinitive ; as : —

To turn and *fly* was now too late.

(5) A gerund ; as : —

Further *reading* and *thinking* only served to make this inclination more decided.

The complement may be the same kinds of words, and also adjectives or participles regularly used.

NOTE. — In complex sentences, see Section 277.

Exercise. — Write ten sentences using as subjects the classes of words in Section 269, two sentences for each use.

270. Since the subject and the object are always substantive words, the modifiers of these are adjectives or expressions used as such : —

(1) An adjective ; as : —

1. It was a *vast* and *noble* room.
2. Soon, however, he forgot *these mortifying* failures.

(2) A possessive noun or pronoun ; as : —

1. She could hear *his* voice.
2. He seemed to represent *man's* physical nature.

(3) A noun in apposition ; as : —

Stimulants — the only *mode* of treatment attempted — cannot quell disease.

(4) A prepositional phrase ; as : —

1. The greater part *of the place* is in shadow.
2. We have strange power *of speech*.

(5) An infinitive phrase ; as : —

I want breath and time *to discuss* the banquet.

(6) A participial phrase, restrictive or appositive ; as : —

1. Overhead is a lofty dome *supported by long rows of pillars*.
2. Brom Bones, *sorely smitten with love and jealousy*, sat brooding by himself in a corner.

NOTE. — In complex sentences, see Section 280.

Exercise. — Write twelve sentences, two to illustrate each kind of modifier in Section 270.

271. Since the simple predicate is a verb, any modifier of it must be an adverb or an expression used as such : —

(1) An adverb ; as : —

Their struggle has *long* been over.

(2) An adverbial objective, — a noun expressing time, value, distance, measure, etc. ; as : —

We one *day* descried some shapeless object floating at a distance.

(3) An indirect object ; as : —

I promise *myself* great pleasure in informing him of the fact.

(4) A prepositional phrase ; as : —

They have gone down *amidst the roar* of the tempest.

(5) An infinitive phrase, usually of purpose or result ; as : —

1. Her eye hurried over the ship *to catch some wished-for face*.
2. They started from their beds, *to be swallowed by the waves*.

(6) A participial phrase ; as : —

She came *courtesying forth*, with many expressions of simple joy.

NOTE. — In complex sentences, see Section 231.

Exercise. — Write twelve sentences, two to illustrate each kind of modifier in Section 271.

272. The independent elements are not a part of the sentence structure, though they add some meaning to it. Some of them are : —

(1) A noun or a pronoun of direct address ; as : —

1. Why, my dear *fellow*, they are old maids, every soul of them.
2. O *ye*, whom wrath consumes ! Shut up your senses.

(2) Exclamatory words ; as : —

1. "*Horror ! horror !*" exclaimed I.
2. *Ah !* and is that the rub ?
3. It was not I ! *never ! never !*

(3) An infinitive phrase used loosely ; as : —

To take familiar instances, here were the tales of Chaucer, etc.

(4) A participial phrase used absolutely ; as : —

His head being turned back, he passed a crook of the road. (See Section 29 (4), (c), and compare with Sections 270 (6) and 271 (6).)

(5) Single words merely introductory ; as : —

1. *Why*, here we are, all right again !
2. *Well*, what a strange man you are !
3. *Now*, are you not a little unreasonable ?

(6) The words *yes*, *yea*, *no*, *nay*, used in answering questions. They really stand for whole sentences, but are not a part of the sentence structure.

273. The words *there* and *it* are often used as introductory words, to throw the subject after the verb; as:—

1. *There* is an *emanation* from the heart in genuine hospitality.
2. *It* is gratifying to see that *home feeling* completely aroused.

There are three kinds of **phrases**, prepositional, infinitive, and participial, frequently used as modifiers.

The natural order of words is often departed from in the interrogative sentence, and should be restored before the sentence is analyzed; as:—

What right had I to exult in his misfortune? [I had what right to exult, etc.]

Sometimes in prose, often in poetry, the transposed order is preferred in an assertive sentence; as:—

1. Sudden had been the call upon us.
2. Out spoke he then.

Compound Subject, Compound Predicate, etc.

274. Frequently in a simple sentence the writer uses two or more predicates to the same subject, two or more subjects of the same predicate, several modifiers, complements, etc.; but it is to be noticed that, in all such sentences as we quote below, the writers of them purposely combined them *in single statements*, and they are not to be expanded into compound sentences. In a compound sentence the object is to make two or more full statements. (See Section 284.)

Examples of compound elements are:—

1. By degrees Rip's *awe* and *apprehension* subsided. (**Compound subject**.)
2. He *shook* his head, *shouldered* the rusty firelock, and, with a heart full of trouble and anxiety, *turned* his steps homeward. (**Compound predicate**.)

3. He caught his *daughter* and her *child* in his arms. (Compound object.)

And so with complements, modifiers, etc.

275. To analyze a simple sentence :—

(1) State whether it is declarative, interrogative, or imperative.

(2) Give the complete subject and the complete predicate.

(3) Give the simple subject, then its modifiers.

(4) Give the simple predicate, then its objects, complements, and modifiers.

(5) Give the independent elements, and connectives, if any.

For example, take this sentence for analysis :—

That night, and the following morning, came a further and a heavier fall of snow.

(1) This is a simple declarative sentence.

(2) Complete subject, *a further and a heavier fall of snow*; complete predicate, *came that night, and the following morning*.

(3) Simple subject, *fall*; modified by the adjectives, *a further* and *a heavier*, and the prepositional phrase, *of snow*.

(4) Simple predicate, *came*; modified by the adverbial objectives, *that night* and *the following morning*; the simple modifiers are *night*, modified by the adjective *that*, and *morning*, modified by the adjectives *the* and *following*.

(5) The conjunction *and* connects the adjectives *a further* and *a heavier*, also the nouns *night* and *morning*.

Simple Sentences for Analysis

1. The moonbeams fell through the upper part of the casement, partially lighting up the antiquated apartment.

2. There was a sloping lawn, a fine stream winding at the foot of it, and a track of park beyond, with noble clumps of trees, and herds of deer.

3. He was evidently most solicitous about the musical part of the service, keeping his eyes fixed intently on the choir, and beating time with much emphasis.

4. Through me did he become idolatrous.

5. Therefore, on every morrow, are we wreathing
A flowery band to bind us to the earth.

6. He pointed with pleasure to the indications of good cheer reeking from the chimneys of the comfortable farmhouses and low thatched cottages.

7. They made the times merrier and kinder and better.

8. The great picture of the crusader and his white horse had been profusely decorated with greens for the occasion.

9. Why should all virtue work in one and the same way?

10. How truly is a kind heart a fountain of gladness, making everything in its vicinity to freshen into smiles!

11. The effigy was said to get up from the tomb and walk the rounds of the churchyard in stormy nights.

12. One fine blue-eyed girl of about thirteen, with her flaxen hair all in beautiful confusion, her frock half torn off her shoulders, a complete picture of a romp, was the chief tormenter.

13. The worthy Squire contemplated these fantastic sports, and this resurrection of his old wardrobe, with the simple relish of childish delight.

14. My friend and I having stayed nearly four hours, a time quite sufficient to express a proper sense of the honor, we departed.

15. There was a noble way, in former times, of saying things simply, and yet saying them proudly.

16. Hail, Memory, hail! in thy exhaustless mine
From age to age unnumbered treasures shine!

17. His varied occupations and amusements had made him well known throughout the neighborhood.

18. I could only hear now and then the distant voice of the priest repeating the morning service.

19. Time is ever silently turning over his pages.

20. Never within my memory has it been my good fortune to spend a pleasanter evening.

21. The ancients called beauty the flowering of virtue.

22. She made a desperate and unhappy attempt to maintain her power over her two sons.

23. God is able out of thy own evil asking to weave snares for thy footing.

24. This caused me to be placed under Mr. Wilkes, the second master out of four.

25. His mission was to enlighten the whole benighted people of the Church.

26. And on that morning, through the grass,
And by the steaming rills,
We traveled merrily, to pass
A day among the hills.

27. His only resource on such occasions, either to drown thought or drive away evil spirits, was to sing.

28. Our last midday's repast was taken under a grove of olive trees on the border of a rivulet.

COMPLEX SENTENCES

276. A **complex sentence** is one that has one principal clause and one or more dependent clauses.

In beginning the analysis, it is best to regard the principal clause as a simple sentence, having the dependent clauses as objects, complements, modifiers, etc. For example, in the sentence, "Whether Faith obeyed he knew not," *he* is the subject, *knew not* is the predicate, and the clause *whether Faith obeyed* is the object; in this clause,

Faith is the subject, *obeyed* is the predicate, and *whether* is a conjunction connecting the clauses.

277. Dependent clauses are of three kinds: **noun, adjective, and adverbial** clauses.

The **noun clause** is one having the uses of a noun; that is, it may be the subject, object, etc.

(1) **Subject** : —

Whatever outrages have happened to a man may befall a man again.

(2) **Object** : —

I will receive from them not *what they have*, but *what they are*.

(3) **Complement** : —

The lessons which these observations convey is, "*Be, and not seem.*"

(4) **Appositional term** : —

The alarm arose *that the English host were coming upon them*.

(5) **Object of a preposition** : —

Let them discriminate between *what they remember* and *what they dreamed*.

Exercise. — Write ten sentences to illustrate these uses of the noun clause, two sentences for each use.

But attention is called to clauses in which only the connecting word is the object of a preposition. Such are **adjective clauses**; as : —

The upper end of the table was overshadowed by a canopy *beneath which* was a chair.

278. A clause after introductory *it* and a verb may be taken as the logical subject, or *it* may be called the subject and the clause an appositional term; as : —

It seems to me *that you put yourself into the power of the evil*.

- A clause used as direct object may follow a passive verb when the indirect object is made the subject; as : —

I was informed by Frank Bracebridge *that the parson had been a chum of his father's at Oxford.*

279. The word most used to introduce the noun clause is the conjunction *that*. Besides this are used the conjunctive adverbs, *if, whether, when, where, why, how*, and the pronouns *who, which, and what*. In most cases the last three are used to introduce indirect questions.

Often the clause has no introductory word; as : —

It is said *all martyrdoms looked mean* when they were suffered.

Especially common is the omission when a direct quotation is used as a noun clause; as : —

"Then it is a very foolish question," said he ;

also when the main clause is inserted between two parts of the dependent clause, —

Such trifles, I truly feel, afford no solid basis for a literary reputation.

280. Adjective clauses always modify a substantive word, hence they are not divided into classes.

The connectives introducing them are : —

(1) **Relative pronouns** — *who, which, that* ; as : —

He turned his eyes upon the withered face *that was puckering itself into a smile.*

(2) **Subordinate conjunctions** — *when, where, why, how, whether, if, that*, etc. ; as : —

At the hour *when I first drew breath* this plant sprang from the soil.

The relative pronoun is often omitted ; as : —

Every line [*that* or *which*] we can draw in the sand has expression.

Exercise. — Write five sentences having adjective clauses introduced by relative pronouns, and five introduced by subordinate conjunctions.

281. Adverbial clauses are usually introduced by subordinate conjunctions, and a review of these may be helpful : —

(1) **Time** : —

We had not been long home *when the sound of music was heard from a distance.*

(2) **Place** : —

Wherever the English stagecoach-man may be seen, he can not be mistaken for one of any other craft.

(3) **Manner** : —

We were put into our bodies *as a fire is put into a pan to be carried about.*

(4) **Cause or reason** : —

As it was the only monument of the kind in that part of the country, it had always been regarded with feelings of superstition.

(5) **Degree or comparison** : —

Nature is as truly beautiful *as it is good.*

The more we told of our troubles, the more they clung to the shelter of their houses.

Of two clauses introduced by *the . . . the*, the first is usually the subordinate, the words meaning “by how much . . . by so much.”

(6) **Purpose** : —

That he might make his appearance in the true style of a cavalier, he borrowed a horse.

(7) **Result** : —

Every man should be so much an artist *that he could report* what had befallen him.

(8) Condition : —

If I should ever wish for a retreat, I know of none more promising than this little valley.

Were I to adopt a pet idea, it would be that the great need which mankind labors under at this present period is — sleep!

(9) Concession : —

Though he had seen many specters in his time, yet daylight put an end to all these evils.

Exercise. — Illustrate the above classes of adverbial clauses by writing two sentences for each class.

282. A contracted clause should be completed before the analysis is begun ; as : —

Often *while [I have been] picking my way along the street after a heavy shower*, I have been scandalized, etc.

The Hall of Fantasy is likely to endure longer *than the most substantial edifice [will endure]*.

283. In analyzing a complex sentence, tell : —

(1) Whether it is declarative, interrogative, or imperative.

(2) Which words form the principal clause.

(3) Analyze this clause, treating dependent clauses as simple modifiers, objects, complements, etc.

(4) Classify the dependent clauses — as, adjective clause, noun clause used as a subject, etc., adverbial clause of time, etc.

(5) Analyze each dependent clause as a simple sentence.

Complex Sentences for Analysis

1. People should think of these matters before they trust themselves on a pleasure party.

2. There were circumstances around me which made it difficult to view the world precisely as it exists.

3. "You will think better of this by and by," said his acquaintance, composedly.

4. Now come hints, growing more and more distinct, that the owner of the old house was pining for his native air.

5. All that I had to show were these few tales and essays which had blossomed out like flowers in the calm summer of my heart and mind.

6. When the festivity of the banquet was at its most ethereal point, the Clerk of the Weather was observed to steal from the table and thrust his head between the purple and golden curtains of one of the windows.

7. There is this peculiarity in such a solitude—that the traveler knows not who may be concealed by the innumerable trunks and the thick boughs overhead.

8. The more we kept each other's company, the greater coxcombs we mutually grew.

9. One plant had wreathed itself round a statue, which was thus veiled and shrouded in a drapery of hanging foliage so happily that it might have served a sculptor for a study.

10. He was trying to discover why one leaf grew in this shape and another in that, and wherefore such and such flowers differed in hue and perfume.

11. There was one shrub, set in a marble vase in the midst of the pool, that bore a multitude of purple blossoms, each of which had the luster and richness of a gem.

12. With all the tenderness in her manner that was so strikingly expressed in her words, she busied herself with such attentions as the plant seemed to require.

13. It vexed him all the more because he could have sworn, were such a thing possible, that he recognized the voices.

14. He could not listen because an anthem of sin rushed loudly upon his ear.

15. Soon emerged from under a sculptured portal the figure of a young girl arrayed with as much richness of taste as the most splendid of the flowers, beautiful as the day, and with a bloom so deep and vivid that one shade more would have been too much.

16. As she came down the garden-path it was observable that she handled and inhaled the odor of plants which her father had most sedulously avoided.

17. The elder traveler discoursed so aptly that his arguments seemed rather to spring up in the bosom of his auditor than to be suggested by himself.

18. You have heard of this daughter, whom all the young men in Padua are wild about.

19. There is no other feeling like what is caused by the faint, doubtful yet real perception.

20. They think that to be great is to possess one side of nature,—the sweet, without the other side, the bitter.

21. The fiend in his own shape is less hideous than when he rages in the breast of man.

22. Thou shalt be paid exactly for what thou hast done.

23. I no longer wish to meet a good I do not earn, for example, to find a pot of buried gold.

24. What we buy in a broom, a mat, a wagon, is some application of good sense to a common want.

25. We do not see that angels only go out that archangels may come in.

26. Punishment is a fruit that unsuspected ripens within the flower of the pleasure which concealed it.

COMPOUND SENTENCES

284. A compound sentence is one that has two or more independent, or principal clauses.

It may include several independent clauses and any number of dependent clauses. It is made up of several sentences combined, as shown by the following examples : —

1. He had not left his resting place; their steps on the soundless snow he could not hear [two simple].

2. She paused; she saw the dreadful wildernesses of snow which already she had traversed [simple and complex].

3. Sleep is sometimes the secret chamber in which Death arranges his machinery: sleep is sometimes that deep, mysterious atmosphere in which the human spirit is slowly unsettling its wings for flight [two complex].

Exercise.— Write two compound sentences of each of these types.

A review of Sections 217 and 218 will help the student in the study of compound sentences.

285. Care must be taken lest a complex sentence be mistaken for a compound sentence; the conjunction may seem to introduce an independent clause when in reality a subordinate conjunction is omitted, the coördinate conjunction then connecting two dependent clauses; as:—

These little old volumes impressed me as if they had been intended for very large ones, but [*as if they*] had been blighted at an early stage of their growth.

286. The main divisions of the compound sentence are called **members**. The placing of the coördinate conjunctions or the division of the sentence by punctuation will usually guide one in separating the sentence into its main members; as:—

A third day came; | and whether it was on that or on the fourth I do not recollect; | but on one or the other there came a welcome gleam of hope [three members: 1. simple; 2. complex; 3. simple].

287. Compound sentences may be contracted by the omission of subject or predicate, or both; as:—

1. Yet not that storm was final, nor [was] that eclipse total.
2. According to the popular notion, he had no crown for himself; consequently [he had] none to lend.

288. Analyze a compound sentence thus:—

- (1) State whether it is declarative, interrogative, or imperative.
- (2) Separate it into divisions, or members.
- (3) Analyze the simple members, as in Section 275.
- (4) Analyze the complex members, as in Section 283.

Compound Sentences for Analysis

1. Wait a little, my reader ; give me time and I will tell you all.
2. Upon that opening he spoke to my mother ; and the result was that, within seven days from the above conversation, I found myself entering the university.
3. It must have been nearly midnight ; but so slowly did I creep along that I heard a clock in a cottage strike four before I turned down the lane to Eton.
4. And now they pause ; and the sweet voices of the choir break out into sweet gushes of melody : they soar aloft and warble along the roof, and seem to play about these lofty vaults like the pure airs of heaven.
5. He did not wish, it seemed, to mortify me by an absolute refusal ; for, after a little consideration, he promised, under certain circumstances, which he pointed out, to give his security.
6. He had been furnished with letters of recommendation to a gentleman who might have assisted him ; but when he landed at Fort St. George he found that this gentleman had sailed for England.
7. At length all is over ; the redoubt has been recovered ; that which was lost is found again.
8. Come thou hither, my little foot page,
Come hither to my knee ;
Though thou art young and tender of age,
I think thou art true to me.
9. Painters do not like white cottages, unless a good deal weather-stained ; but, as the reader now understands that it is a winter night, his services will not be required except for the inside of the house.

10. By this route they went ; and notwithstanding the snow lay on the ground, they reached their destination in safety.

11. No shout, it may be supposed, was ever heard ; nor could a shout, in any case, have been heard, for the night was one of tempestuous wind.

12. Few enough, and scattered enough, were these abbeys, so as in no degree to disturb the deep solitude of the region ; yet many enough to spread a network or awning of Christian sanctity over what else might have seemed a heathen wilderness.

13. The man certainly did utter the jest, seventeen hundred and fifty years ago ; but who it was that he stole it from is another question.

14. The Saxon is the aboriginal element, — the basis, and not the superstructure ; consequently it comprehends all the ideas which are natural to the heart of man.

15. You, if you are brilliant like themselves, they will hate ; you, if you are dull, they will despise.

16. We will not at present go into the general question of education ; but will confine our remarks to the subject which is immediately before us.

17. But we are pressed by heavy laws ;
And often, glad no more,
We wear a face of joy, because
We have been glad of yore.

18. Other men say wise things as well as he ; only they say a good many foolish things, and do not know when they have spoken wisely.

19. It had early been his amusement to torture beasts and birds ; and when he grew up, he enjoyed with still keener relish the misery of his fellow-creatures.

20. The only end of teaching is, that men may learn ; and it is idle to talk of the duty of teaching truth in ways which only cause men to cling more firmly to falsehood.
